The 1992 Census of Construction Industries covers all employer establishments with payroll primarily engaged in contract construction or construction on their own account for sale as defined in the Standard Industrial Classification Manual 1987 SIC General contractors in both the building and the heavy construction field usually assume responsibility for an entire construction project but may subcontract to others all of the actual construction work or those portions of the project requiring special skills or equipment Special trade contractors may work for general contractors for other subcontractors or may work directly for the owner of the property Each establishment receiving a questionnaire was requested to report the percent of total dollar value of business done for each kind of business activity engaged in during 1992 This information was used for the computer assignment of appropriate industry classifications During this work various tests were also made using other data reported on the questionnaire The proportion of construction work to total business was checked to verify that the establishment was primarily in construction Also taken into consideration were the types of structures worked on during the year and the extent of work undertaken for other contractors Construction establishments often engage in various construction activities It is necessary however to assign a single industry code to the establishment based on its major activity Therefore the statistics shown for an industry reflect not only the primary activity of the establishments in the industry but also their secondary activities The industry reports however do present data on the extent of secondary activities **1992 Census of Construction Industries: Geographic area series** ,1994 **Monthly Catalog of United States Government Publications** ,1984-05 **The Industry Library** United States.
