Special Kind Of Caring:

Rethinking palliative care Sinclair, Paul, 2007-04-04 This book's striking message is that palliative care does not deliver on its aims to value people who are dying and make death and dying a natural part of life. This book draws from wider social science perspectives and critically and specifically applies these perspectives to palliative care and its dominant medical model. Applying Social Role Valorisation, the author argues for the de-institutionalisation of palliative care and the development of an alternative framework to the approaches found in hospices, palliative care units and community-based palliative care services. He offers a new conceptualisation of death and loss that refines and expands modern understandings in a way that also resonates with traditional religious views concerning death. Wide-ranging recommendations advise fundamental change in the concept of palliative care, the way support and services are organised and the day-to-day practice of palliative care. *Rethinking palliative care* will be of interest to academics, students and practitioners in palliative care as well as those in disability, social policy, sociology, social work, religion, thanatology, nursing and other health-related fields.

Intermediate Care for Veterans United States. Congress. House. Veterans' Affairs Committee, 1963 Thinking about Law Oren Ben-Dor, 2007-10-04 What calls for thinking about law? What does it mean to think about? What is aboutness? Could it be that law in its essence has not yet been thought about? In exploring these questions, this book closely reads Heidegger's thought, especially his later poetical writings. Heidegger's transformation of the very notion and process of thinking has destabilising implications for the formation of any theory of law; however critical this theory may be, the transformation of thinking also affects the notions of ethics and morality and the manner in which law relates to them. Interpretations of Heidegger's unique understanding of notions such as essence, thinking, language, truth and nearness come together to indicate the otherness of the essence of law from what is referred to as the legal. If the essence of law has not yet been

thought about what generates deafness to the call for such thinking thereby entrenching a refuge for legalism The ambit of the legal is traced to Levinasian ethics especially to his notion of otherness despite such a notion being apparently highly critical of the totality of the legal In entrenching the legal it is argued that Levinas's notion of otherness does not reflect thinking that is otherwise than ontology but rather radicalises and maintains a derivative ontology A call for thinking about law is then connected to Heideggerian ontologically based otherness upon which ethical reflection that the essence of law protects is grounded

Towards Neurobioethics Darlei Dall'Agnol, 2020-09-02 From time to time a particular science achieves such great success that people are tempted to elevate it to the condition of prima philosophia and then to try to explain everything else from its perspective Thus physics becomes physicalism history becomes historicism and so on Nowadays the big science is the investigation of the nervous system particularly the brain The new paradigm is then given by neuroscience and everything else seems to require its prefix neuroeconomy neuroeducation neurolaw neurotechnology neuroethics and neuropolitics among others However what does it really mean to use neuro as a prefix to a word as it appears in the title of this book To answer this question this work develops a metaethical theory namely practical cognitivism and the new normative concept of caring respect in order to examine the ethics of neuroscientific investigations and their associated neurotechnologies including for example the moral problems of cognitive enhancement using nootropics

The Sandwich Generation Ronald J. Burke, Lisa M. Calvano, 2017-02-24 Rising life expectancy has led to the growth of the Sandwich Generation men and women who are caregivers to their children of varying ages as well as for one or both parents whilst still managing their own household and work responsibilities This book considers both the strains and benefits of this position
