Zheng,2022-06-29 For thousands of years Cannabis sativa commonly called cannabis or marijuana has been used for many different purposes Due to its enormous medicinal values increasing numbers of countries and regions have started to legalise the cultivation of this plant When grown commercially cannabis is most often produced in controlled environments including greenhouse and indoor growing rooms to ensure consistent growth and high quality Even for field production propagation is frequently conducted in controlled environments Commercial operations and individual growers who cultivate cannabis for personal consumption require scientific information on how to cultivate cannabis most effectively and efficiently To meet these needs scientists have been conducting research on how to optimize cannabis cultivation both in small and large scales Handbook of Cannabis Production in Controlled Environments is the result of collaborations between some leading cannabis scientists and highly experienced practitioners Featuring full color illustrations and photographs throughout this book covers a broad range of topics include cannabis biology science and techniques for breeding and propagation management and optimization of both aerial and rootzone environments plant nutrition and nutrient disorder diagnosis crop training and pest management harvesting and post harvest processing Along with the basic aspects of controlled environment cannabis production this book summarises developments in these areas that may challenge old beliefs and improve production Led by Editor Youbin Zheng President of the Canadian Society for Horticultural Science La Soci t Canadienne de Science Horticole this book is a practical guide for cultivators consultants and researchers a reference for students and an information source for individuals who grow cannabis for personal consumption **Cannabis sativa L. - Botany and Biotechnology** Suman Chandra,Hemant Lata,Mahmoud A. ElSohly,2017-05-23 This book highlights current Cannabis research its botany authentication biotechnology in vitro propagation chemistry cannabinoids biosynthesis metabolomics genomics biomass production quality control and pharmacology Cannabis sativa L Family Cannabaceae is one of the oldest sources of fiber food and medicine This plant has been of interest to researchers general public and media not only due to its medicinal properties but also the controversy surrounding its illicit use Cannabis has a long history of medicinal use in the Middle East and Asia being first introduced as a medicine in Western Europe in the early 19th century Due to its numerous natural constituents Cannabis is considered a chemically complex species It contains a unique class of terpeno phenolic compounds cannabinoids or phytocannabinoids which have been extensively studied since the discovery of the chemical structure of tetrah

hydrocannabinol 9 THC commonly known as THC the main constituent responsible for the plant's psychoactive effects An additionally important cannabinoid of current interest is Cannabidiol CBD There has been a significant interest in CBD and CBD oil extract of CBD rich Cannabis over the last few years because of its reported activity as an antiepileptic agent particularly its potential use in the treatment of intractable epilepsy in children Cannabis Ernest Small, 2016-10-14 Cannabis sativa is best known as the source of marijuana the world's most widely consumed illicit recreational drug However the plant is also extremely useful as a source of stem fiber edible seed oil and medicinal compounds all of which are undergoing extremely promising research technological applications and business investment Indeed despite its capacity for harm as a recreational drug cannabis has phenomenal potential for providing new products to benefit society and for generating extensive employment and huge profits Misguided policies until recently have prevented legitimate research on the beneficial properties of cannabis but there is now an explosion of societal scientific and political support to reappraise and remove some of the barriers to usage Unfortunately there is also a corresponding dearth of objective analysis Towards redressing the limitation of information Cannabis A Complete Guide is a comprehensive reference summarizing botanical business chemical ecological genetic historical horticultural legal and medical considerations that are critical for the wise advancement and management of cannabis in its various forms This book documents both the risks and benefits of what is indisputably one of the world's most important species The conflicting claims for medicinal virtues and toxicological vices are examined based mainly on the most recent authoritative scientific reviews The attempt is made consistently to reflect majority scientific opinion although many aspects of cannabis are controversial Aside from the relevance to specialists the general public should find the presentation attractive because of the huge interest today in marijuana Unfortunately society has become so specialized and compartmentalized that most people have limited appreciation of the importance of science to their lives except when a topic like marijuana becomes sensationalized This review of cannabis can serve as a vehicle for public education in the realm of science and technology Indeed towards the goal of disseminating the important information in this book to a wide audience the presentation is user friendly concise and well illustrated in the hope that non specialists will find the topics both informative and entertaining **The Analytical Chemistry of Cannabis** Brian F.

Thomas, Mahmoud A. ElSohly, 2015-12-01 A volume in the Emerging Issues in Analytical Chemistry series The Analytical Chemistry of Cannabis Quality Assessment Assurance and Regulation of Medicinal Marijuana and Cannabinoid Preparations provides analytical chemistry methods that address the latest issues surrounding cannabis based products The plethora of marketed strains of cannabis and cannabinoid containing products combined with the lack of industry standards and labelling requirements adds to the general perception of poor quality control and limited product oversight The methods described in this leading edge volume help to support the manufacturing labelling and distribution of safe and consistent products with known chemical content and demonstrated performance characteristics It treats analytical chemistry within

the context of the diverse issues surrounding medicinal and recreational cannabis in a manner designed to foster understanding and rational perspective in non scientist stakeholders as well as scientists who are concerned with bringing a necessary degree of order to a field now characterized by confusion and contradiction Addresses current and emerging analytical chemistry methods an approach that is unique among the literature on this topic Presents information from a broad perspective of the issues in a single compact volume Employs language comprehensible to non technical stakeholders as well as to specialists in analytical chemistry
