Spectacle Of Corruption Uk:

The Financialisation of Power Sarah Bracking, 2016-05-05 The financial crash of 2008 led people all over the world to ask how far financiers are in control of our lives To what extent does what they do with our money affect our everyday lives This book asks whether the crisis and subsequent use of public subsidies to help the international economy recover was a unique event or a symptom of a wider malaise where financiers have effectively usurped the power of governments and are running the political economy themselves The Financialisation of Power in Africa argues that growth is not always a good thing The development of more derivatives and faster financial exchanges are draining businesses of investment capital rather than serving to supply it applying financial logic does not save nature or protect biodiversity and other species This book outlines the concept of financialisation and how it has been used in various ways to explain the post 2008 crisis and global political economy There is a particular focus on these issues in reference to Africa which has a particular dependence on international money It takes the perspective of the modern state exploring how the political economy of development actually works in relation to African governance This book is of interest to students of international development and political economy and is a key source for policy makers interested in African studies and economic development Fictions of Disease in Early Modern England

Corporate Totalitarianism Rowena Slope,2024-11-08 Corporate Totalitarianism reflects on the changing nature of economic political and social power in the global context and the ways in which this affects both individual and society Inspired by the thought of Hannah Arendt and informed by Weber s work on rationalisation and bureaucracy the book shows how fear and alienation are used to generate compliance in the population shedding light on the growing state capture by capital interests With attention to the manner in which propaganda censorship and surveillance are being used to monitor and disrupt dissenters through the exploitation of technology the author considers not only the potential use and misuse of technology to enforce compliance but also its capacity to challenge corruption and protect human rights with decentralised ledgers and blockchain technology currently offering the possibility of increased transparency accountability and trust in a variety of domains An engaging study of the growth of power and control in contemporary societies this book will appeal to scholars of social theory and political sociology with interests in the surveillance state and the social role of technology
