Copeland, 2013-11-11 As protein science continues to become an increasingly important aspect of academic and commercial sciences and technology the need has arisen for a ready source of laboratory protocols for the analysis and evaluation of these biological polymers *Methods for Protein Analysis* presents the methods most relevant to the generalist bench scientist working with proteins A concise yet thorough summary it covers laboratory methods that can be reasonably performed in a standard protein laboratory without specialized equipment or expertise Taking a how to approach this book examines the techniques used to answer common protein analytical questions and describes methods useful in daily laboratory work *Methods for Protein Analysis* is the ideal reference for protein laboratories in academic government and industrial settings It is an essential benchtop manual for first year graduate students beginning their laboratory experience as well as for chemists biochemists and molecular biologists in the pharmaceutical biotechnological food and specialty chemical industries and for analysts concerned with the purity and structural integrity of protein Featuring illustrations and a convenient spiral binding this guide offers a glossary of common abbreviations and a list of suppliers for protein science

Methods in Protein Structure Analysis M. Zouhair Atassi, Ettore Appella, 2013-06-29 The MPSA international conference is held in a different country every two years It is devoted to methods of determining protein structure with emphasis on chemistry and sequence analysis Until the ninth conference MPSA was an acronym for *Methods in Protein Sequence Analysis* To give the conference more flexibility and breadth the Scientific Advisory Committee of the 10th MPSA decided to change the name to *Methods in Protein Structure Analysis* however the emphasis remains on methods and on chemistry In fact this is the only major conference that is devoted to methods The MPSA conference is truly international a fact clearly reflected by the composition of its Scientific Advisory Committee The Scientific Advisory Committee oversees the scientific direction of the MPSA and elects the chairman of the conference Members of the committee are elected by active members based on scientific standing and activity The chairman subject to approval of the Scientific Advisory Committee appoints the Organizing Committee It is this latter committee that puts the conference together The lectures of the MPSA have traditionally been published in a special proceedings issue This is different from and more detailed than the special MPSA issue of the *Journal of Protein Chemistry* in which only a brief description of the talks is given in short papers and abstracts

In the I Oth MPSA about half the talks are by invited speakers and the remainder were selected from submitted short papers and abstracts
