Yarbrough, 1988 Many jurists give lip service to the idea that judicial interpretation of constitutional provisions should be based on the intent of the framers Few if any have been as faithful to that conception as Hugo Black a U S Senator from Alabama Once on the court he played a leading role in establishing freedom of speech and other guarantees the interpretation he and others believed were warranted by the language and intent of the framers Late in his career however Black s commitment to literalism and intent led him to assume apparently conservative positions in civil liberties cases The

author analyzes Black s judicial and constitutional philosophy as well as his approach to specific cases through the eyes of Black s critics and through an assessment of scholarly opinion of his jurisprudence from book jacket

Corporate First Amendment Rights and the SEC Nicholas Wolfson, 1990-10-24 In the 1970s the Supreme Court directly ruled for the first time that commercial speech is protected by the free speech clause of the Constitution The Court however did not grant it the full protection afforded to political and artistic speech The SEC regulates a vast array of corporate speech that it considers to be a type of commercial speech In this book Professor Nicholas Wolfson examines the SEC s considerable powers in the control of corporate information and argues that the Court s distinction between political artistic speech and corporate speech is erroneous Wolfson demonstrates that much of so called political speech is concerned with economic self interest He finds no fundamental difference between it and corporate speech In the domain of SEC regulated speech he demonstrates that traditional notions of commercial speech do not fit the parameters of SEC regulated speech Wolfson proposes that the SEC s regulation of proxy statements prospectuses investment advisory literature and hostile takeover information should be subject to full protection of the First Amendment He fully delineates the doctrine of commercial speech as well as the court cases that have determined the status of SEC speech He analyzes the law and economics literature on commercial speech Finally Wolfson compares governance of a publicly held corporation to the governance of a political entity and demonstrates that shareholder democracy is a political notion that should lead to full rights of free speech and freedom of association This important critique of the regulation of corporate speech will be a valuable reference for securities and corporate lawyers First Amendment attorneys and institutional investors as well as for students in business and law programs Corporate law academic and public libraries will also find it to be a notable addition to their collections

The Right to See with Technology Marc Jonathan Blitz, 2025-09-01 This book asks if we have a

constitutional right to see or sense our surroundings with technology Do we have a constitutional right to record our surroundings with cameras embedded in smartphones or drones Or to enhance our vision with extended reality technology bionic eyes or brain computer interfaces Courts in the United States have already provided a possible foundation for answering such questions There is they have said a right to document matters of public concern by creating and sharing recordings with others Such recordings extend our perception They let us watch events that are remote in space and time Yet sharing them is also a kind of communication and thus the creation of speech protected by the First Amendment So too might be other ways of seeing with technology This emerging case law raises interesting questions and challenges such as how enhancement of our perceptions can leave room for others privacy This book explores such questions focusing on American constitutional jurisprudence It also argues that in doing so it is helpful to recognize that our interest in using and enhancing our perceptual power isn't only an interest in doing so as part of First Amendment communication It is also linked closely to other rights to personal integrity and the liberty to use our body's perceptual powers and to the constitution's protection for freedom of thought or what some scholars call cognitive liberty Our exercise of perception and our use of it to learn about our surroundings is a crucial part of exercising our and shaping our mind
