Sport Motivation:

The Social Psychology of Exercise and Sport Martin Hagger, Nikos Chatzisarantis, 2005-06-16 This new textbook examines the role that social psychology has in the explanation of exercise and sport behaviour. It devotes considerable attention to key social psychological issues within the two disciplines: health related exercise behaviour and the behaviour of competitive sport participants and the spectators of elite sport. Rather than presenting a broad superficial overview of diverse areas in exercise and sport, the book focuses on a range of selected topics and provides a comprehensive in depth and analytical coverage using social psychology as a framework. It thoroughly examines how social psychological research and intervention has contributed to the understanding of key topics in exercise and sport behaviour including: The social psychology of exercise and health, Social cognitive theories of exercise behaviour, Exercise and the physical self, Eating disorders in exercise and sport, Emotion and mood in athletes, Social psychology and motivation in sport, Group processes in sport, Aggression and crowd violence. The *Social Psychology of Exercise and Sport* is key reading for undergraduate and postgraduate students on social or sport psychology courses and on health related or sports science courses. The ability to focus the mind, overcome pressure and deal with nerves is crucial in all sports, especially in competition. *The Complete Guide to Sport Motivation* is an indispensable guide to sport psychology for coaches, personal trainers, athletes and anyone involved with sports performance, revealing how anyone can develop the self confidence and mental toughness needed to succeed. *Advances in Sport Psychology* Thelma S. Horn, 2008 This third edition presents a thorough review of the literature and terminology in key topic areas. The clear explanation of potential research directions and the list of contributors make this a must have book for students of sport psychology. **Advances in Motivation in Sport and Exercise** Glyn C.
