**Coaching Cultures** Neil Carter, 2014-06-11 Coaches are amongst the most visible figures in sport today but little is known about the history of their profession. This book examines the history of coaching from the early nineteenth to the late twentieth century. It uses a number of sports as case studies that includes cricket, swimming, rugby union, athletics, football and tennis. The focus is largely English but international examples are used to illuminate the British context. A number of themes are explored. Initially in the 1800s the coach was like an artisan who learned his skills on the job and coaching was similar to a craft. Early coaches were professionals but from the late nineteenth century an amateur elite governed British sport who inhibited and in some sports banned coaching. As the twentieth century progressed though different sports at different stages began to embrace coaching as international competition intensified. In addition the nature of coaching changed as a more scientific and managerial approach was applied. Finally in football the export of early British coaches is examined in light of the migration of international athletes and also as a process of knowledge transfer. This book was published as a special issue of *Sport in History*.

**Coaching Swimming Effectively** Jean G. Larrabee, 1987 Veteran coach Jean Larrabee outlines a winning approach to teaching strokes, organizing practices and training properly.

**Swimming Greats** Ava Thompson, 2025-01-11 *Swimming Greats* presents a compelling journey through the evolution of competitive swimming, focusing on the remarkable athletes who have shaped this demanding sport. Through a unique blend of historical narrative and scientific analysis, the book examines how the perfect storm of physical ability, psychological resilience and technological advancement has produced swimming's most exceptional performers. The chronological exploration spans seven decades from the amateur era of the 1950s to today's highly professional landscape, revealing how the sport has been transformed by innovations in training methods, pool design and performance analysis. At its core, the book demonstrates how elite swimmers have systematically integrated scientific principles with psychological preparation to achieve extraordinary results. Through exclusive interviews, training logs and competition data, readers gain unprecedented insight into watershed moments that revolutionized the sport, such as the introduction of underwater dolphin kicks and the emergence of advanced performance analysis tools. The text particularly shines in its examination of specific

athletes contributions from distance specialists who transformed endurance training to sprint specialists who pioneered new technical approaches The book s organization into three distinct eras The Foundation Years The Scientific Revolution and The Modern Era provides a clear framework for understanding how competitive swimming has evolved By combining statistical analysis with compelling narratives and practical applications it serves both as a historical record and a valuable resource for current athletes coaches and swimming enthusiasts This comprehensive approach makes complex concepts accessible while maintaining the depth required for serious students of the sport

*Sports Coaching Cultures* Kathleen M. Armour, Robyn Jones, Paul Potrac, 2004-07-31 The art of coaching is recognising the situation recognising the people and responding to the people you are working with that s the big thing to handle people Steve Harrison Coach Middlesbrough Football Club Responding to the fast growing subject in academic sports departments this groundbreaking new coaching studies text offers a view that focuses the coach as a person and the coaching practice as a complex social encounter Unlike existing titles in the field which look at coaching as a science this book examines the personalities histories relationships and individual styles of eight coaches at the top of their profession One to one interviews with some of the best known and respected elite sports coaches include Steve Harrison Hope Powell and Graham Taylor from football Ian McGeechan and Bob Dwyer from rugby Di Bass from swimming Lois Muir from netball and Peter Stanley from athletics and form the basis for subsequent exploration of four key themes in sports coaching coaching pedagogy the coach s role the coach s interaction with athletes the coach s power This text will be of significant interest to students of coaching science and sports science and will appeal to the considerable body of amateur sports coaches with an interest in the styles of those at the top
