spent the rest of his life In 1861 he took deacon s orders but shyness and a stammer prevented him from seeking the priesthood His most famous works Alice s Adventures in Wonderland 1865 and Through the Looking Glass 1872 were originally written for Alice Liddell the daughter of the Dean of his college Charles Dodgson died of bronchitis in 1898 Gillian Beer is King Edward VII Professor Emeritus of English at the University of Cambridge and past President of Clare Hall College She is a Fellow of the British Academy and of the Royal Society of Literature Among her works are Darwin s Plots 1983 third edition 2009 George Eliot 1986 Arguing with the Past Essays in Narrative from Woolf to Sidney 1989 Open Fields Science in Cultural Encounter 1996 and Virginia Woolf The Common Ground 1996 Lewis Carroll in Numberland Robin Wilson,2008-07-30 Lewis Carroll s books have delighted children and adults for generations but behind their exuberant fantasy and delightful nonsense was the mind of a brilliant mathematician Now his forgotten achievements in the world of numbers are brought to light by acclaimed author and mathematician Robin Wilson Here he explores the curious imagination of a man whose pioneering work at Oxford University included investigations into voting patterns and tennis seeding who dreamt up numerical conundrums in bed at night and who filled his writings with problems paradoxes puzzles and teasing games of logic Taking us into a world of mock turtles and maps gryphons and gravity Lewis Carroll in Numberland reveals the singular mind of a genius *Slithy Toves* Sally Haines,2000 **Assessing Feasibility with Value-laden Models** Simon Hollnaicher,2025-01-31 In this Open Access book the author investigates the value dimension of Integrated Assessment Models and their application to questions of feasibility Integrated models provide a quantified representation of the interaction between the socio economic system with the climate and serve as a pivotal tool at the intersection of climate science policymakers and society This book critically examines how IAMs approach the concept of feasibility It unpacks the value assumptions embedded within integrated modeling critiques the implicit normativity of these models and proposes principles for responsibly managing value judgments in scientific advice Arguing for a thick conception of feasibility one that integrates key normative dimensions it highlights the gap between conceptual discussions of feasibility and the scientific practices that inform feasibility assessments Addressed to both philosophers and integrated modelers this book sheds light on the implicit values shaping our collective visions for the future **A World of Many** Norbert Ross,2023-01-13 A World of Many explores the world making efforts of Tzotzil Maya children from two different localities within the municipality of Chenalh Chiapas The research demonstrates children s agency in creating their worlds while also investigating the role played by the surrounding social and physical environment Different experiences with schooling parenting goals and values but also with climate change water scarcity as well as racism and settler colonialism form part of the reason children create their emerging worlds These worlds are not make believe or anything less than the ontological products of their parents Instead Norbert Ross argues that by creating different worlds the children ultimately fashion themselves into different human beings quite literally being different in the world A World of Many combines experimental research from the cognitive

sciences with critical theory exploring children's agency in devising their own ontologies. Rather than treating children as somewhat incomplete humans, it understands children as tinkerers and thinkers, makers of their worlds amidst complex relations. It regards being as a constant ontological production where life and living constitutes activism. Using experimental paradigms, the book shows that children locate themselves differently in these emerging worlds; they create, becoming different human beings in the process.

**Mapping Reality** Geoff King, 1996-04-12. An original and wide-ranging study of the mappings used to impose meaning on the world. *Mapping Reality* argues that maps create rather than merely represent the ground on which they rest. Distinctions between map and territory questioned by some theorists of the postmodern have always been arbitrary. From the history of cartography to the mappings of culture, sexuality, and nation, Geoff King draws on an extensive range of materials, including mappings imposed in the colonial settlement of America, the Cold War, Vietnam, and the events since the collapse of the Soviet bloc. He argues for a deconstruction of the opposition between map and territory to allow dominant mappings to be challenged, their contours redrawn, and new grids imposed.
