Sensory and aroma marketing Angel A. Carbonell-Barrachina, 2023-08-07 This book explains

how sensory and aroma marketing is used by food companies to improve the sales of their products at different locations. It starts with an introductory section about the current relevance of this field and the foundation of how senses can affect consumers' behaviours. Then it moves into different chapters highlighting the importance of each one of the senses in marketing strategies: smell, sight, sound, taste, and touch. Perhaps for readers, the role of smell, sight, and taste are obvious in selling strategies and in bringing positive experiences, memories, and feelings, but the book also provides examples of how touch and sound guide consumer decisions. The final chapter looks into the future. Sensory and aroma marketing should be easily understood by university students interested in Food Science and Technology, make sensory marketing reachable and useful at the industry as well as at the academic and research levels. Readers will be able to answer questions which all consumers bear in mind. For example, is it possible to manipulate consumers in choosing a specific food by using a specific aroma or locating the product at a proper height in a supermarket, and is it possible to control how much time a consumer spends in a hypermarket by using a specific music rhythm.

Buzz Emanuel Rosen, 2010-10-01 Buzz is the most valuable marketing tool there is and yet it is under researched and overlooked as a method of reaching customers. The groundbreaking *The Anatomy of Buzz* told us why buzz matters, studies and real life phenomena from the iMac to Cold Mountain prove that consumer recommendations are the best form of advertising or marketing. Now Rosen, who has spent years studying buzz, has added findings from cutting edge research and 100 new interviews with field leaders to show you how to create it. The result, with tips on subjects from seeding the market to accelerating natural contagion, is essential reading not only for marketers but for anyone who wants to spread their message.

Society 5.0 Bruno Salgues, 2018-10-16 Following the rapid development of connected technologies which are now highly sophisticated and spread across the globe, Society 5.0 has emerged and brought with it a dramatic societal shift. In 1998 Kodak, the world leader in photographic film, had 170 000 employees. It thus seemed unthinkable that just 3 years later the majority of people would stop taking photographs on paper film and that Kodak would have disappeared. These are the stakes of this new society that is taking shape. This book, which does not seek to critique current politics, management, or marketing literature, aims to fight against the excesses of this often misunderstood Society 5.0 and to present the ideas and associated technologies that comprise it, all working towards societal improvement. Among these technologies, artificial intelligence, robotics, digital platforms, and 3D printing are undoubtedly the most important and thus receive the greatest focus.
