Corridor Kate Marshall,2013-06-01 Corridor offers a series of conceptually provocative readings that illuminate a hidden and surprising relationship between architectural space and modern American fiction By paying close attention to fictional descriptions of some of modernity s least remarkable structures such as plumbing ductwork and airshafts Kate Marshall discovers a rich network of connections between corridors and novels one that also sheds new light on the nature of modern media The corridor is the dominant organizational structure in modern architecture yet its various functions are taken for granted and it tends to disappear from view But as Marshall shows even the most banal structures become strangely visible in the noisy communication systems of American fiction By examining the link between modernist novels and corridors Marshall demonstrates the ways architectural elements act as media In a fresh look at the late naturalist fiction of the 1920s 30s and 40s she leads the reader through the fetus clogged sewers of Manhattan Transfer to the corpse choked furnaces of Native Son and reveals how these invisible spaces have a fascinating history in organizing the structure of modern persons Portraying media as not only objects but processes Marshall develops a new idiom for Americanist literary criticism one that explains how media studies can inform our understanding of modernist literature
