Mackey, 1882 A legend differs from an historical narrative only in this that it is without documentary evidence of authenticity It is the offspring solely of tradition Its details may be true in part or in whole There may be no internal evidence to the contrary or there may be internal evidence that they are altogether false But neither the possibility of truth in the one case nor the certainty of falsehood in the other can remove the traditional narrative from the class of legends It is a legend simply because it rests on no written foundation It is oral and therefore legendary **The Collected Works of L. S. Vygotsky** Robert W. Rieber, 2012-12-06 In this volume readers are introduced to Vygotsky s argument for a theoretical and methodological approach to differentiate A higher mental functions from the more basic brain processes that other theorists believed were at the center of the psychological apparatus The famed Soviet psychologist s view of developmental issues as an intricately woven tapestry of functions includes analyses of the development of speech and written language the mastering of attention and mnemonic skills self
