Symbols, the News Magazines and Martin Luther King Richard Lentz,1999-03-01 More than two decades after his death Martin Luther King Jr remains America s preeminent symbol of the civil rights movement In the early years of the movement King advocated a policy of nonviolent resistance to the racism ingrained in American society In later years however King adopted a more militant stance toward racial and other forms of injustice In this innovative book Richard Lentz considers King as a cultural symbol from the Montgomery bus boycott of 1955 1956 to the Poor People s Campaign which King helped organize shortly before his assassination in 1968 In particular Lentz examines the ways the three major news weeklies Newsweek Time and U S News World Report presented King to their readers It is primarily through media institutions that Americans shape and interpret their values Newsweek Time and U S News though representing different shadings of political ideology ranging from left of center to conservative were all aimed at the same audience middle class Americans Therefore their influence on the nation s values during a period of enormous social upheaval was significant In the mid 1960s when King shifted from reform to radicalism the news magazines were thrust into what Lentz calls a crisis of Symbols because King no longer fit the symbolic mold the magazines had created for him Lentz investigates how the magazines responded to this crisis discussing the ways in which their analyses of King shifted over time and the means they employed to create a new symbolic image that made sense of King s radicalization for readers This is an important perceptive study of Martin Luther King Jr s career and an astute critical analysis of the reporting practices of the news media in the modern era

Cognitive Development in Adulthood Mark L. Howe, Charles J. Brainerd, 2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e.g. logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series A fairly broad definition of cognitive development is being used in the selection of books for this series
