Signs of Change Transformations of Christian Traditions and their Representation in the Arts 1000 2000 focuses on the changing relationships between what gradually emerged as the Arts and Christianity the latter term covering both a stream of ideas and its institutions The book as a whole is addressed to a general academic audience concerned with issues of cultural history while the individual essays are also intended as scholarly contributions within their own fields A collaborative effort by twenty five European and American scholars representing disciplines ranging from aesthetics to the history of art and architecture from literature music and the theatre to classics church history and theology the volume is an interdisciplinary study of intermedial phenomena generally in larger cultural and intellectual contexts The focus of topics extends from single concrete objects to sets of abstract concepts and values and from a single moment in time to an entire millennium While Signs of Change acknowledges the importance of synthesizing efforts essential to hermeneutically informed scholarship in order to counterbalance generalized historical narratives with detailed investigations broad accounts are juxtaposed with specialized research projects The deliberately unchronological grouping of contributions underlines the effort to further discussion about methodologies for writing cultural history     Symbols Of The Occult II Max Ivanova, Hidden within the vast realms of occultism exists a reality that remains invisible to the ordinary mind a reality of archaic origin that whispers in the secret language of the cosmos the Symbol Far from being a mere drawing or decorative sign the Symbol is a vessel of power a bridge between the visible and the invisible a silent code through which the universe reveals its eternal mysteries In these pages you will encounter the hidden meaning of many of the most revered symbols in the esoteric traditions those used for centuries by alchemists in their search for transmutation by magicians in their invocations and rituals and by sages of sacred geometry who saw in numbers and forms the reflection of divine order Each symbol is a key and each key opens a door to an inner world where knowledge and transformation await For those who have already set foot upon the esoteric path the study of symbols is not optional but fundamental To understand them is to learn the secret grammar of existence to awaken to the truths that lie beneath appearances and to enter into communion with the hidden forces that shape reality This book is an invitation to cross the threshold and discover the silent yet eloquent voice of the universe speaking through the eternal language of symbols     The Descent of the Soul and the Archaic Paul Bishop, Terence Dawson, Leslie Gardner, 2022-09-30 The Descent of the Soul and the Archaic explores the motif of katabasis a descent into an imaginal underworld and the importance it held for writers from antiquity to the present with an emphasis on its place in psychoanalytic theory This collection of chapters builds on Jung's insights into katabasis and nekylia as models for deep self descent and the healing process which follows The contributors explore ancient and modern notions of the self as obtained

through a descent to a deeper level of imaginal experience With an awareness of the difficulties of applying contemporary psychological precepts to ancient times the contributors explore various modes of self formation as a process of discovery Presented in three parts the chapters assess contexts and texts goddesses and theoretical alternatives This book will be of interest to scholars and analysts working in wide ranging fields including classical studies all schools of psychoanalysis especially Jung s and postmodern thought especially the philosophy of Deleuze
