## **Symposium In Memory Of Kei Mori Studies In Economic Dynamics:**

Symposium In Memory Of Kei Mori: Studies In Economic Dynamics Lawrence R Klein, 1995-05-31 Kei Mori pursued dual research interests as an economist and an engineer. During the 1960s he worked at the Keio University on problems of dynamic economics and anticipated many later developments in this field both in the construction and application of macrodynamic models. He approached the problem from the point of view of both economics and control engineering. He had advanced ideas at an early stage in computer development about distributed processing, international data management and control of the dynamic properties of economic systems. As a visiting scholar at the University of Pennsylvania during the late 1960s he participated fully in the new developments there in global model building. During the later years of his life he turned his attention to engineering research harnessing sunlight for interior plant growth but he left a lasting impression on economics. These accomplishments are commemorated in this volume by some of his Japanese colleagues and Lawrence Klein with whom he worked at the University of Pennsylvania. This volume contains papers by Kei Mori's colleagues Fumimasa Hamada and Kiroyuki Kosaka who interpreted and analyzed Kei Mori's dynamic models. In addition Mitsuo Saito and associates take up dynamic properties of asset market models. It is rounded up with active discussions by leading Japanese economic scholars and a reprinting of one of Kei Mori's original works in econometrics. Symposium in Memory of Kei Mori Lawrence Robert Klein, 1995

Global Economic Modeling: A Volume In Honor Of Lawrence R Klein Peter Pauly, 2018-04-25 Global econometric models have a long history. From the early 1970s to the present as modeling techniques have advanced, different modeling paradigms have emerged and been used to support national and international policy making. One purpose of this volume, based on a conference in recognition of the seminal impact of Nobel Prize winner in Economic Sciences Lawrence R Klein whose pioneering work has spawned the field of international econometric modeling, is to survey these developments from today's perspective. A second objective of the volume is to shed light on the wide range of attempts to broaden the scope of modeling on an international scale. Beyond new developments in traditional areas of the trade and financial flows, the volume reviews new approaches to the modeling of linkages between macroeconomic activity and individual economic units, new research on the analysis of trends in income distribution and economic wellbeing on a global scale, and innovative ideas about modeling the interactions between economic development and the environment. With the expansion of elaborated economic linkages, this volume makes an important contribution to the evolving literature of global econometric models. *Directory of Published Proceedings*, 2004 American Book Publishing Record, 1995

*Bibliographic Guide to East Asian Studies* New York Public Library Staff, 1996-07 An aid for researching non-western cultures, the *Bibliographic Guide to East Asian Studies* covers Japan, China, North and South Korea, Hong Kong, and Taiwan with approximately 3,500 listings from LC/MARC tapes and the Oriental Division of The New York Public Library.
