Syntactic Typology Studies In The Phenomenology Of Language:

Syntactic Typology Winfred Philipp Lehmann, 1978 **Ergativity in Amazonia** Spike Gildea, Francisco Queixalós, 2010

This volume presents a typological theoretical introduction plus eight papers about ergative alignment in 16 Amazonian languages. All are written by linguists with years of fieldwork and comparative experience in the region; all describe details of the synchronic systems and several also provide diachronic insight into the evolution of these systems. The five papers in Part I focus on languages from four larger families with ergative patterns primarily in morphology. The typological contribution is in detailed consideration of unusual splits, changes in ergative patterns, and parallels between ergative main clauses and nominalizations. The three papers in Part II discuss genetically isolated languages. Two present dominant ergative patterns in both morphology and syntax; the other a syntactic inverse system that is predominantly ergative in discourse. In each, the authors demonstrate that identification of traditional grammatical relations is problematic. These data will figure in all future typological and theoretical debates about grammatical relations.

Syntax Andrew Carnie, 2012-08-20. Andrew Carnie's bestselling textbook on syntax has guided thousands of students through the discipline of theoretical syntax, retaining its popularity due to its combination of straightforward language, comprehensive coverage, and numerous exercises. In this third edition, topics have been updated, new exercises added, and the online resources have been expanded. Supported by expanded online student and instructor resources, including extra chapters on HPSG, LFG, and time-saving materials for lecturers, including problem sets, PowerPoint slides, and an instructors' manual. Features new chapters on ellipsis, auxiliaries, and non-configurational languages. Covers topics including phrase structure, the lexicon, Case theory, movement, covert movement, locality conditions, VP shells, and control. Accompanied by a new optional workbook, available separately, of sample problem sets which are designed to give students greater experience of analyzing syntactic structure.

Verbs and Diachronic Syntax I.G. Roberts, 2012-12-06. This book combines several strands of my work, both individually and in collaboration with various people over the last couple of years. To a very large extent, I have been inspired by the many talks, classes, appointments, and other interactions that took place in the exciting intellectual environment that grew up among the linguists working in Geneva in the period 1989-90. It is impossible to mention by name everyone who influenced the development of this material, but I do particularly like to thank the students in my class *linguistique diachronique* during that period who had to suffer through preliminary versions of much of this book and often seemed to understand what I was getting at better than I did. Luigi Rizzi did more than anyone else to create the unique atmosphere here in the last couple of years, and so he deserves our gratitude for that. He was also my collaborator on the synchronic work on French inversion that inspired much of this book; he also read the whole manuscript in draft form and gave detailed comments. He is also, as anyone working in current comparative syntax knows, a wellspring of knowledge, ideas, and inspiration. Maria Teresa Guasti also read the entire manuscript and gave me invaluable comments. Sten Vikner was a great help for much more than just Danish data. Special

This book contributes to opening up disciplinary knowledge and offering connections between different approaches to language in contemporary linguistics Rather than focusing on a particular single methodology or theoretical assumption the volume presents part of the wealth of linguistic knowledge as an intertwined project which combines numerous practices positionalities and perspectives The editors believe together with the contributors to this volume that it is a crucial and timely task to emphasize the relevance of linguistic knowledge on power hospitality social class marginalization mobility history secrecy the structures of discourse and the construction of meaning as knowledge that needs to be brought together as it is brought together in personal discussions conversations and encounters To work along traces of linguistic connectivity marginalized narratives in and on lesser studied often stigmatized language practices and to shed light on the tasks of linguistics in making diverse knowledges transparent this offers spaces for critical discussion on the ethics of linguistics its challenges contributions and tasks These are the approaches that are characteristic for the work of Alexandra Y Aikhenvald to whom this book is dedicated

Reconnecting Language Anne-Marie Simon-Vandenberghe, Kristin Davidse, Dirk Noël, 1997-10-31 Although the contributors to this book do not belong to one particular school of linguistic theory they all share an interest in the external functions of language in society and in the relationship between these functions and internal linguistic phenomena In this sense they all take a functional approach to grammatical issues Apart from this common starting point the contributions share the aim of demonstrating the non autonomous nature of morphology and syntax and the inadequacy of linguistic models which deal with syntax morphology and lexicon in separate independent components The recurrent theme throughout the book is the inseparability of lexis and morphosyntax of structure and function of grammar and society The third and more specific common thread is case which in some contributions is adduced to illustrate the more general point of the link between word form on the one hand and clausal and textual relations on the other hand while in other papers it is at the centre of the discussion The interest of the proposed volume consists in the fact that it brings together the views of leading scholars in functional linguistics of various denominations on the place of morphosyntax in linguistic theory The book provides convincing argumentation against a modular theory with autonomous levels the dominant framework in mainstream 20th century linguistics and is a plea for further research into the connections between the lexicon and the linguistic and extralinguistic context

Seržant, Alena Witzlack-Makarevich, 2018 While there are languages that code a particular grammatical role e.g. subject or direct object in one and the same way across the board many more languages code the same grammatical roles differentially The variables which condition the differential argument marking or DAM pertain to various properties of the NP such as animacy or definiteness or to event semantics or various properties of the clause While the main line of current research on DAM is mainly synchronic the volume tackles the diachronic perspective The tenet is that the emergence and the development of differential marking systems provide a different kind of evidence for the understanding of the phenomenon The present volume consists of 18 chapters and primarily brings together diachronic case studies on particular languages or language groups including e.g. Finno-Ugric, Sino-Tibetan and Japonic languages The volume also includes a position paper which provides an overview of the typology of different subtypes of DAM systems a chapter on computer simulation of the emergence of DAM and a chapter devoted to the cross-linguistic effects of referential hierarchies on DAM **Tuvaluan** Niko Besnier, 2002-09-11 Tuvaluan is a Polynesian language spoken by the 9 000 inhabitants of the nine atolls of Tuvalu in the Central Pacific as well as small and growing Tuvaluan communities in Fiji, New Zealand and Australia This grammar is the first detailed description of the structure of Tuvaluan one of the least well documented languages of Polynesia Tuvaluan pays particular attention to discourse and sociolinguistics factors at play in the structural organization of the language **Contrastive Analysis in Language** D.
