

of an object,” not a “identifier of a digital object” DOI is a unique alphanumeric string assigned by a registration agency. In the digital environment DOI system is compatible for identifying and exchanging intellectual property. DOI assigned to the article when it gets accepted for publication. DOI is unique, persistent, international public identifier. All DOIs begin with the number 10 and it can be assigned once and only once. DOI names are case sensitive. The DOI system uses the Handle System. The DOI is currently limited to 128 characters and minimum 40-character substitutions such as letters, numbers, and symbols allowed for each place in the DOI code. The DOI System has been developed to ensure conformance with relevant generic external formal standards which are relevant in the Internet communities including URI and URN. This enable automated copyright management for all types of media and in digital environment it provides framework for managing intellectual content, helps to connect users with content suppliers. A resolution system and a metadata framework the two technical tools on which DOI is build. There are three parts of DOI that are the Identifier, the directory and the database. And four primary components Enumeration, Description, Resolution and Policies. The role of the International DOI Foundation (IDF) is to “support the needs of the intellectual property community in the digital environment, by the development and promotion of the DOI System as a common infrastructure for content management. The Foundation is international in its membership and activities”. More than 50 million DOI names had been assigned by 4,000 organizations till April 2011. In April 2013 this number had increases to 85 million DOI names assigned through 9,500 organizations. Publishers assign a unique alpha-numeric identification to each publication. The Foundation publishes a regular e-mail news bulletin, and holds annual meetings for members.
