Syntax Of Silence Sluicing Islands And The Theory Of Ellipsis:

The Syntax of Silence Jason Merchant, 2001 A primary goal of contemporary theoretical linguistics is to develop a theory of the correspondence between sound or gesture and meaning This sound meaning correspondence breaks down completely in the case of ellipsis and yet various forms of ellipsis are pervasive in natural language words and phrases which should be in the linguistic signal go missing How this should be possible is the focus of Jason Merchant's investigation He focuses on the form of ellipsis known as sluicing a common feature of interrogative clauses such as in Sally's out hunting guess what and Someone called but I can't tell you who It is the most frequently found cross linguistic form of ellipsis Dr Merchant studies the phenomenon across 24 languages and attempts to explain it in linguistic and behavioural terms

The Syntax of Silence Jason Merchant, 1999 **Sluicing: Cross-Linguistic Perspectives** Jason Merchant, Andrew Simpson, 2012-05-03 This book of new research by leading experts expands our current understanding of the ways in which languages allow for ellipsis of the sluicing type to occur and shows how sluicing constructions reveal important information about the general architecture of grammar **Verb Doubling and Dummy Verb** Johannes Hein, 2020-06-22 This monograph provides the first cross linguistic study of repair strategies in verbal fronting verb doubling and do support addressing both typological properties and theoretical aspects First it brings together data hitherto scattered across the empirical and theoretical literature and adds newly collected data from two African languages For each of the 47 languages the properties of verbal fronting are documented in detail Based on this sample the empirical part establishes two novel typological generalizations regarding the interaction between the size of the fronted category and the type of repair strategy used The first of these identifies a systematic typological gap No language that allows both verb and verb phrase fronting has do support with the former and verb doubling with the latter In the theoretical part it is shown that previous theories of verb doubling do support are unable to account for both generalizations A new approach within the Copy Theory of the Minimalist Framework is developed that rests on the interaction of head movement copy deletion and the properties of different movement types The book thus provides the first comprehensive empirical and theoretical overview of repair patterns in verbal fronting Repairs Patrick Brandt, Eric Fuß, 2013-03-01 Grammatical structures connect systems of thought and articulation the conditions of which hardly seem to fit each other Repairs are productive mechanisms that solve translation problems between modules or levels by adapting derivations or representations to requirements that have to be met unconditionally Compensating for derivational and interpretive defects repairs determine core properties of natural language grammars and their interfaces **The size of things I** Zheng Shen, Sabine Laszakovits, 2021 This book focuses on the role size plays in grammar Under the umbrella term size fall the size of syntactic projections the size of feature content and the size of reference sets The contributions in this first volume discuss size and structure building The most productive research program in syntax where size plays a central role revolves around clausal complements Part 1 of Volume I contributes to this

program with papers that argue for particular structures of clausal complements as well as papers that employ sizes of clausal complements to account for other phenomena The papers in Part 2 of this volume explore the interaction between size and structure building beyond clausal complements including phenomena in CP vP and NP domains The contributions cover a variety of languages many of which are understudied The book is complemented by Volume II which discusses size effects in movement agreement and interpretation Information Structure and Agreement Victoria

Camacho-Taboada, Ángel L. Jiménez-Fernández, Javier Martín-González, Mariano Reyes-Tejedor, 2013-01-30 This collection consists of thirteen contributions focusing on the latest trends of information structure and agreement couched in the most current developments of Minimalism Cartography and Optimality Some chapters focus on the syntax of information structure in relation with the position occupied by different constituents in the CP domain and their interpretation such as the distinction between contrastive and corrective focus the inclusion of given information in focus the interplay of information structure and binding the relative position of complementisers and discourse based constituents in the left periphery Information structure is also analysed with regards to prominence phenomena at word level Other chapters deal with the notion of agreement and its role in the syntax of specific constructions such as applicatives correlatives or different types of CP like relatives or embedded interrogatives This selection of papers was originally presented at the 21st Colloquium on Generative Grammar held at the University of Seville in April 2011 **Advances in the study of Siouan languages and linguistics** Catherine Rudin, Bryan James Gordon, 2016-05-18 The Siouan family comprises some twenty languages

historically spoken across a broad swath of the central North American plains and woodlands as well as in parts of the southeastern United States In spite of its geographical extent and diversity and the size and importance of several Siouan speaking tribes this family has received relatively little attention in the linguistic literature and many of the individual Siouan languages are severely understudied This volume aims to make work on Siouan languages more broadly available and to encourage deeper investigation of the myriad typological theoretical descriptive and pedagogical issues they raise The 17 chapters in this volume present a broad range of current Siouan research focusing on various Siouan languages from a variety of linguistic perspectives historical genetic philological applied descriptive formal generative and comparative typological The editors preface summarizes characteristic features of the Siouan family including head final and verb centered syntax a complex system of verbal affixes including applicatives and subject possessives head internal relative clauses gendered speech markers stop systems including ejectives and a preference for certain prosodic and phonotactic patterns The volume is dedicated to the memory of Professor Robert L Rankin a towering figure in Siouan linguistics throughout his long career who passed away in February of 2014 *Prosody in Syntactic Encoding* Gerrit Kentner, Joost Kremers, 2020-07-06 What is the role of prosody in the generation of sentence structure A standard notion holds that prosody results from mapping a hierarchical syntactic structure onto a linear sequence of words A radically different view conceives

of certain intonational features as integral components of the syntactic structure Yet another conception maintains that prosody and syntax are parallel systems that mutually constrain each other to yield surface sentential form The different viewpoints reflect the various functions prosody may have On the one hand prosody is a signal to syntax marking e g constituent boundaries On the other hand prosodic or intonational features convey meaning the concept intonational morpheme as e g an exponent of information structural notions like topic or focus puts prosody and intonation squarely into the syntactic representation The proposals collected in this book tackle the intricate relationship of syntax and prosody in the encoding of sentences The contributions build their cases on the basis of solid empirical evidence adducing data from experiments or from the careful analysis of natural speech The volume thus represents a state of the art survey of research on the syntax phonology interface

The Syntax of Mauritian Creole Anand Syya, 2013-01-01 A detailed study of different aspects of the syntax of Mauritian creole within a Chomskyan theoretical framework

Comparative Germanic Syntax Peter Ackema, 2012 The present volume contains a selection of papers presented at the 23rd and 24th Comparative Germanic Syntax Workshop held at the University of Edinburgh and the Hogeschool Universiteit Brussels The contributions provide new perspectives on several topics of current interest for syntactic theory on the basis of comparative data from a wide range of Germanic languages Among the theoretical and empirical issues explored are various ellipsis phenomena the internal structure of the DP the syntax morphology interface the syntax semantics interface Binding Theory various diachronic developments and do support type phenomena This book is of interest to syntacticians with an interest in theoretical comparative and or diachronic work as well as to morphologists and semanticists interested in the connections their fields have with syntax It will also be of interest to graduate and advanced undergraduate students in linguistic disciplines

InterPhases Kleantes K. Grohmann, 2009 This book addresses the fundamental issues in the phase based approach to the mental computation of language that have arisen from the recent developments in the Minimalist Program Leading linguists and promising young scholars from all over the world focus on two topics that are in the centre of current theorizing in syntax the interaction of syntax with the conceptual intentional and sensorimotor interfaces and current formulations of phase theory Phases are a recent way of theorizing and modelling the computational system of human language in relation to the interfaces between syntactic derivation and logical form and phonological form What exactly for example does Spell Out do Where do morphology and phonology kick in Are these two levels of representation sufficient too many or not enough How can the interaction between syntax and prosody be formally represented The authors discuss these and other central questions including the degree to which phases are the right way to think about the dynamic system of language They consider how far the answers are likely to come from conceptual and theoretical considerations or from experimental and empirical research which key components might be missing and how the system can be improved Both in its parts and as a whole the book explains and contributes to some of the liveliest and most central debates in contemporary linguistics

Interaction Between Linguistic and Nonlinguistic Factors Masatoshi Koizumi, 2023-12-04 Issues in Japanese Psycholinguistics from Comparative Perspectives compiles over 30 state of the art articles on Japanese psycholinguistics It emphasizes the importance of using comparative perspectives when conducting psycholinguistic research Psycholinguistic studies of Japanese have contributed greatly to the field from a cross linguistic perspective However the target languages for comparison have been limited Most research focuses on English and a few other typologically similar languages As a result many current theories of psycholinguistics fail to acknowledge the nature of ergative absolutive and or object before subject languages The cross linguistic approach is not the only method of comparison in psycholinguistics Other prominent comparative aspects include comprehension vs production native speakers vs second language learners typical vs aphasic language development Many of these approaches are underrepresented in Japanese psycholinguistics The studies reported in the volumes attempt to bridge these gaps Using various experimental and or computational methods they address issues of the universality diversity of the human language and the nature of the relationship between human cognitive modules Volume 2 Interaction Between Linguistic and Nonlinguistic Factors provides studies on the interaction between linguistic and non linguistic factors

Coreference, Modality, and Focus Luis Eguren, Olga Fernández-Soriano, 2007-11-21 This volume is a collection of selected papers originally presented at the XVIth Colloquium on Generative Grammar that was held at the Universidad Aut noma de Madrid All the papers deal with current issues within the generative framework mostly paying attention to phenomena pertaining to the syntax semantics interface The major concerns are coreference relations modals and modality and focus ellipsis More specifically the contributions present research findings from different languages often adopting a comparative perspective and include studies on sub extraction from subjects and objects on obviation and Control structures on specificity and Weak Crossover effects and on reconstruction without movement as well as papers that address the scopal interactions between tense aspect and modals the syntactic and semantic properties of different types of left periphery operators and the role focus plays in elliptical constructions

The Morphosyntax of Gender Ruth T. Kramer, 2015 This book presents a new approach to gender and its effects on morphosyntax Using data from genetically diverse languages such as Amharic Somali and Romanian it provides one of the first large scale cross linguistically oriented theoretical approaches to the word and sentence structure effects of gender

The Morphosyntax of Imperatives Daniela Isac, 2015 This book studies the properties of imperative clauses in the context of a theory of Universal Grammar Daniela Isac argues that the specificity of imperative clauses cannot be the result of a unique imperative Force feature instead the type of imperative clauses can be traced back to a plurality of finer grained features such as Modality and phi features hosted by the Mod Infl and Speech Event heads among others The data are drawn from a wide range of languages including various Romance Slavic and Germanic languages as well as Finnish and Inuktitut The analysis accounts for recurrent patterns in the interaction of imperative mood with phenomena like negation restrictions on grammatical subjects

and the possibility of embedding imperative clauses The approach which focuses exclusively on morphosyntactic rather than semantic features is potentially transferable to the analysis of other clause types such as exclamatives interrogatives and declaratives

The Morphosyntax of Transitions Víctor Acedo-Matellán, 2016-02-18 This book examines the cross linguistic expression of changes of location or state taking as a starting point Talmy's typological generalization that classifies languages as either satellite framed or verb framed In verb framed languages such as those of the Romance family the result state or location is encoded in the verb In satellite framed languages such as English or Latin the result state or location is encoded in a non verbal element These languages can be further subdivided into weak satellite framed languages in which the element expressing result must form a word with the verb and strong satellite framed languages in which it is expressed by an independent element an adjective a prepositional phrase or a particle In this volume Víctor Acedo Matellán explores the similarities between Latin and Slavic in their expression of events of transition neither allows the expression of complex adjectival resultative constructions and both express the result state or location of a complex transition through prefixes They are therefore analysed as weak satellite framed languages along with Ancient Greek and some varieties of Mandarin Chinese and stand in contrast to strong satellite framed languages such as English the Germanic languages in general and Finno Ugric This variation is expressed in terms of the morphological properties of the head that expresses transition which is argued to be affixal in weak but not in strong satellite framed languages The author takes a neo constructionist approach to argument structure which accounts for the verbal elasticity shown by Latin and a Distributed Morphology approach to the syntax morphology interface

Perspectives on Arabic Linguistics XXXII Elly van Gelderen, 2020-08-15 This volume presents a collection of seven peer reviewed articles on Arabic phonetics phonology syntax semantics and applied linguistics The authors address stress assignment the phenomenon of imala the place of articulation of the dorsal fricative the structure of correlatives the CP layer sluicing and sprouting and clinical linguistics They do so by using data from Standard Arabic and from Egyptian Jordanian Palestinian and Saudi Arabian varieties of Arabic The book will be of interest to linguists working in descriptive and theoretical areas of Arabic linguistics

Rarely Used Structures and Lesser-Studied Languages Emily Manetta, 2019-08-29 This book investigates a set of marginal syntactic structures which have been singularly influential in the development of generative theory spotlighting lesser studied languages of the Indic family while emphasizing implications for linguistic theory more broadly After first defining what constitutes a marginal syntactic structure this book then undertakes a micro comparative approach to the rigorous exploration of fundamental properties of human language including displacement ellipsis unbounded dependencies and the role of clausal peripheries in such languages as Kashmiri and Romani In so doing Manetta interrogates and ultimately affirms the relevance of marked and marginal strings which have proven to be crucial to generative syntax while simultaneously advocating for the role of lesser studied languages to the study of such properties This book is key reading for graduate students and researchers in

linguistics and syntax more specifically as well as those interested in the study of Indic languages **Deconstructing Ergativity** Maria Polinsky, 2016-04-12 Building upon theoretical innovations and extensive empirical findings this book explains variation in the syntactic behavior of ergative arguments across languages It offers a new analysis of ergativity by recognizing two distinct types PP ergative and DP ergative languages Each type is characterized by a set of correlated features which result in structural consistency
