yourself what you must do in order to do it right or as good as possible This imagination should not be just a picture It should be like a whole movie with many of your senses involved just like in a detailed dream Like if you can imagine the whole ski turn with many clear details what basic movements you have to do how it should feel in your body how it should look like how it should change during the development of your turn this will prepare your correct movements in the real life But this must happen step by step starting by the easiest skills and developing further when you have tried out the first steps first For this reason I have divided the material in 3 different levels You will need quite a long time for this So please be patient take your time work with my book do not just read it Understanding and explaining skiing is complicated and it takes time My suggestion is to read carefully take several breaks and think carefully about the sections you find difficult to understand If you are a beginner start reading the book as soon as possible before you start your skiing You can stop reading after the beginner level and go skiing on green and blue slopes The homepage of the book <https://skiingtechnique.wordpress.com> If this link does not work write the link into an internet browser google or other You can also find a short free book about downhill ski tech on my homepage [Allen & Mike's Really Cool Telemark Tips](#) Allen O'Bannon, Mike Clelland, 1998 Following up on the phenomenal success of their debut backcountry ski book Allen and Mike's Really Cool Telemark Tips is the perfect book for anybody who's ever yearned to master the subtleties of the telemark turn Over 100 clear concise telemark tips are complemented by hilarious and helpful illustrations Written for beginners and experts alike this book is a must for tele skiers who really want to shred *My Ten Secrets of Skiing* Bob Beattie, 1968 Discusses getting in shape equipment basic static maneuvers fall line maneuvers traversing sideslipping turns parallel christies and wedeln
