The Routledge Companion to the Sound of Space

Emma-Kate Matthews, Jane Burry, Mark Burry, 2024-11-11 This companion explores a range of conceptual and practical relationships between sound and space across various disciplines providing insights from technical creative cultural political philosophical psychological and physiological perspectives The content spans a wide range of spatial typologies from large reverberant buildings to modest and intimate ones from external public squares to domestic interiors and from naturally formed environments to highly engineered spaces These compiled insights and observations explore the vast diversity of ways in which sonic and spatial realms interact This publication therefore forms important bridges between the intricate and diverse topics of technology philosophy composition performance and spatial design to contemplate the potential of sound and space as tools for creative expression and communication as well as for technical innovation It is hoped that by sharing these insights this book will inspire practitioners scholars and enthusiasts to incorporate new perspectives and methodologies into their own work Through a rich blend of theory practice and critical reflection this volume serves as a valuable resource for anyone interested in exploring the intricacy of relationships between space and sound whether they are students professionals or simply curious Our companion provides a cross section through shared territories between sonic and spatial disciplines from architecture engineering sound design music composition and performance urban design product design and much more

Sound in the Ecstatic-Materialist Perspective on Experimental Music Riccardo D.

Wanke, 2021-08-10 What does a one hour contemporary orchestral piece by Georg Friedrich Haas have in common with a series of glitch noise electronic tracks by Pan Sonic This book proposes that despite their differences they share a particular understanding of sound that is found across several quite distinct genres of contemporary art music the ecstatic materialist perspective Sound in the ecstatic materialist perspective is considered as a material mass or element unfolding in time encountered by a listener for whom the experience of that sound exceeds the purely sonic without becoming entirely divorced from its materiality It is material by virtue of the focus on the texture consistency and density of sound it is ecstatic in the etymological sense that is to say that the experience of this sound involves an instability an inclination to depart from material appearance an ephemeral and transitory impulse in the very perception of sound to something beyond but still related to it By examining musical pieces from spectralism to electroacoustic domains from minimalism to glitch electronica and dubstep this book identifies the key intrinsic characteristics of this musical perspective To fully account for this perspective on sonic experience listener feedback and interviews with composers and performers are also incorporated Sound in the ecstatic materialist perspective is the common territory where composers sound artists performers and listeners converge

Advances in Multimedia Information Processing - PCM 2005 Yo-Sung Ho, Hyoung Joong Kim, 2005-10-19

We are delighted to welcome readers to the proceedings of the 6th Pacific Rim Conference on Multimedia PCM The first PCM was held in Sydney Australia in 2000 Since then it has been hosted successfully by Beijing China in 2001 Hsinchu Taiwan in 2002 Singapore in 2003 and Tokyo Japan in 2004 and finally Jeju one of the most beautiful and fantastic islands in Korea This year we accepted 181 papers out of 570 submissions including regular and special session papers The acceptance rate of 32% indicates our commitment to ensuring a very high quality conference This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews We would therefore like to thank the Program Committee and all reviewers The program of this year reflects the current interests of the PCM s The accepted papers cover a range of topics including all aspects of multimedia both technical and artistic perspectives and both theoretical and practical issues The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical

Architectures of Sound Michael Fowler, 2017-10-23 Architects are used to designing visually In order to expand their basic design tools this book explores the interactions between sound space hearing and architecture To this end the author uses contemporary and historic buildings and projects but also fictional philosophical and theoretical approaches the idea is not only to define sound as a source but also as an instrument of architectural space By introducing a metatheory of critical hearing designers are able to acoustically test their projects and contribute to their design with auditive input already at the design stage

Word, Sound, Image Saskia Kersenboom, 2020-08-25 This original and radical book challenges dominant parameters of literacy by comparing the oral tradition of the Tamils in South India with the Western culture of printed text In India traditional texts are always performed

as a result form and meaning can change depending on the occasion This is the opposite of Western communication through publication which is a static representation of knowledge The author examines the reasons for the differences between the Indian and Western textual traditions and describes how text lives through the performing arts of words sound and imagery She argues that interactive multimedia is the first Western communication form to represent oral traditions effectively

Sound, Space and Civility in the British World, 1700-1850 Peter Denney, Bruce Buchan, David Ellison, Karen Crawley, 2018-11-07 In this collection the essays examine the critical role that judgments about noise and sound played in framing the meaning of civility in British discourse and literature during the long eighteenth century The volume restores the sonic dimension to conversations about civil conduct by exploring how censured behaviours and recommended practices resonated beyond the written word As the contributors show understanding changing perceptions and valuations of noise and sound allows us to chart how civility was understood in the context of significant political social and cultural change including the development of urban life the extension of empire and the consolidation of legal procedure Divided into three parts *Sound Space and Civility in the British World* demonstrates how both noise and sound could be recognized by eighteenth century Britons as expressions of civility The essays also explore the audible implications of uncivil conduct to complicate our understanding of the sonic range of politeness The uses of sound and noise to interrogate British colonial anxieties about the distinction between civility and incivility are also investigated Taken together the essays identify the emergence of civility as a development that radically altered sonic attitudes and experiences producing new notions of what counted as desirable or undesirable sound

Sound, Space and Society Kimberley Peters, 2017-11-30 In 1964 rebel radio stations took to the seas in converted ships to offer listening choice to a young resistant audience against a backdrop of restrictive broadcasting policies This book draws on this exceptional moment in social history and the decades that followed teasing out the relations between sound society and space that were central to pirate broadcasting activities With a turn towards mediated life in geography studies of radio have been largely absent However radio remains the most pervasive mass communications medium This book breaks new ground discussing in depth the relationship between radio space and society considering how space matters in the production consumption and regulation of audio transmission through the geophysical spaces of sea land and air It is relevant for readers interested in geographies of media sensory spatial experience everyday geopolitics and the turn towards elemental and more than human geographies

Sound Worlds from the Body to the City Ariane Wilson, 2019-03-13 This volume reveals the extent to which aural perception influences our spatial awareness Spanning various fields and practices from psychology to geography and from zoology to urban planning it covers a range of environments in which sounds contribute to forming our sense of space and place The contributions gathered here lead from the mother's womb through the habitats of insects and owls to the resonating bodies of buildings and the city to artistic endeavours that aim to consciously reveal the spatiality of sound In this progression the book demonstrates the

profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological phenomenological and emotional importance of sound in relation to our construction of space As such it will appeal not only to architects town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with listening as a mode of attention

Sound and Signals Mikio Tohyama, 2011-06-12 This is an up to date reference and textbook on modern acoustics from a signal theoretic point of view as well as a wave theoretic approach for students engineers and researchers It provides readers the fundamental basis of acoustics and vibration science and proceeds up to recent hot topics related to acoustic transfer functions and signal analysis including a perceptual point of view In the first part the work uniquely introduces into the fundamentals without using heavy mathematics The following advanced chapters deal with new and deep insights into acoustic signal analysis and investigation of room transfer functions based on the poles and zeros
