The need for a research volume on European theatre music and sound is almost self evident Musical and sonic practices have been an integral part of theatre ever since the artform was first established 2 500 years ago not just in subsequent genres that are explicitly driven by music such as opera operetta ballet or musical theatre but in all kinds of theatrical forms and conventions Conversely academic recognition of the role of theatre music its aesthetics creative processes authorships traditions and innovations is still insufficient This volume unites experts from different disciplines and backgrounds to make a significant contribution to the much needed discourse on theatre music The term itself is a shapeshifter that signifies different phenomena at different times the book thus deliberately casts a wide net to explore both the highly contextual terminologies and the many ways in which different times and cultures understand theatre music By treating theatre music as a practice focusing on its role in creating and watching performances the book appeals to a wide range of readerships researchers and students of all levels journalists audiences and practitioners It will be useful to universities and conservatoires alike and relevant for many disciplines in the humanities
