*Ritual and Its Consequences* Adam B. Seligman, Robert P. Weller, Michael J. Simon, 2008-03-24 This pioneering interdisciplinary work shows how rituals allow us to live in a perennially imperfect world Drawing on a variety of cultural settings the authors utilize psychoanalytic and anthropological perspectives to describe how ritual like play creates as if worlds rooted in the imaginative capacity of the human mind to create a subjunctive universe The ability to cross between imagined worlds is central to the human capacity for empathy Ritual they claim defines the boundaries of these imagined worlds including those of empathy and other realms of human creativity such as music architecture and literature The authors juxtapose this ritual orientation to a sincere search for unity and wholeness The sincere world sees fragmentation and incoherence as signs of inauthenticity that must be overcome Our modern world has accepted the sincere viewpoint at the expense of ritual dismissing ritual as mere convention In response the authors show how the conventions of ritual allow us to live together in a broken world Ritual is work endless work But it is among the most important things that we humans do

*Tonal Consciousness and the Medieval West* Fiona

McAlpine, 2008 Tonal consciousness in the sense of a clear intuition about which note or chord a piece of music will finish on is as much a part of our everyday experience of music as it is of contemporary music theory This book asks to what extent such tonal consciousness might have operated in the minds of musicians of the Middle Ages given the different tone world found in the modes of Gregorian chant in troubadour and trouv re music in Minnesang and in the early polyphony based upon chant The author's approach is analytical focusing on modality and balancing up to date concepts and methods of music analysis with those insights into their own compositional needs and processes that the people of the Middle Ages provided themselves through their writings about music The book examines a range of both music sources and theoretical sources from the ninth to the thirteenth centuries This is a ground breaking contribution both to the study of medieval music and to music analysis
