The Science and Archaeology of Materials Julian Henderson, 2013-04-15 The Science and Archaeology of Materials is set to become the definitive work in the archaeology of materials Henderson's highly illustrated work is an accessible and fascinating textbook which will be essential reading for all practical archaeologists With clear sections on a wide range of materials including ceramics glass metals and stone this work examines the very foundations of archaeological study Anyone interested in ancient technologies especially those involving high temperatures kilns and furnaces will be able to follow in each chapter how raw materials are refined transformed and shaped into objects This description is then followed by appropriate case studies which provide a new chronological and geographical example of how scientific and archaeological aspects can and do interact They include Roman pale green and highly decorated glass 17th Century glass in Britain and Europe the effect of the introduction of the wheel on pottery technology the technology of Celadon ceramics early copper metallurgy in the Middle East chemical analysis and lead isotope analysis of British Bronzes early copper alloy metallurgy in Thailand the chemical analysis of obsidian and its distribution the origins of the Stonehenge bluestones This book shows how archaeology and science intersect and feed off each other Modern scientific techniques have provided data which when set within a fully integrated archaeological context have the potential of contributing to mainstream archaeology This holistic approach generates a range of connections which benefits both areas and will enrich archaeological study in the future

The Danish Resources c. 1000-1550 Nils Hybel, Bjorn Poulsen, 2007-09-30 This pioneering work presents the first comprehensive economic history of medieval Denmark It puts data produced by more than a century of historical research into a new context and includes a multitude of information based on primary research The book abounds in knowledge of natural and human resources rural life urban industries tax and commodity trade Arguing that the development of the Danish resources from the eleventh to the middle of the fourteenth century cannot be viewed simply as a period of prosperity and conversely that the Late Middle Ages were characterized as much by growth as by recession the book places itself in an international historiographical controversy The Danish Resources will become an indispensable standard work for students of Danish and north European medieval history

All the King's Women: Polygyny and Politics in Europe, 900-1250 Jan Rüdiger, 2020-09-25 Polygyny in Europe The grand narrative of Western history is the development of monogamous marriage culminating in the central Middle Ages Other kinds of relationships have often perhaps too lightly been dismissed as just lust In this book Jan Rüdiger investigates the plurality of man woman relationships in medieval Scandinavia and analyses the social and political uses of elite polygyny By way of comparison the findings from the North are then applied to England France and the Iberian Peninsula in order to propose a new overall image of elite polygyny including marriage in the medieval West See inside the book

World Literature and Postcolonial Studies, 2023-04-17 What is the role of literature in our global

landscape today How do local authors respond to the growing worldwide power of English and the persisting effects of the colonial systems that paved the way for globalization today These questions have often been approached very differently by postcolonialists and by students of world literature but over the past two decades a developing dialogue between these divergent approaches has produced robust scholarship and sometimes fractious debate as issues of language politics and cultural difference have come to the fore Drawing on a wide variety of cases from medieval Wales to contemporary Syria and Australia and on works written in Arabic Basque English Hindi and more this collection explores the mutual illumination that can be gained through the interaction of postcolonial and world literary perspectives **Anglo-Norman Studies XLV**

Stephen D. Church,2023 This year's volume is made up of articles that were presented at the conference in Bonn held under the auspices of the University The Romance of the Rose and the Making of Fourteenth-century English Literature Philip Knox,2022 This title provides a new account of the literary history of fourteenth century England arguing that many of this period's most distinctive literary experiments emerge through a productive dialogue with the Romance of the Rose a jointly authored medieval French poem **The Demise of Norse Religion** Olof Sundqvist,2023-12-18 When describing the transition from Old Norse religion to Christianity in recent studies the concept of Christianization is often applied To a large extent this historiography focuses on the outcome of the encounter namely the description of early Medieval Christianity and the new Christian society The purpose of the present study is to concentrate more exclusively on the Old Norse religion during this period of change and to analyze the processes behind its disappearance on an official level of the society More specifically this study concentrates on the role of Viking kings and indigenous agency in the winding up of the old religion An actor oriented perspective will thus be established which focuses on the actions methods and strategies applied by the early Christian Viking kings when dismantling the religious tradition that had previously formed their lives In addition the resistance that some pagan chieftains offered against these Christian kings is discussed as well as the question why they defended the old religious tradition **Cambridge IGCSE® and O Level Geography Coursebook with CD-ROM** Gary Cambers,Steve Sibley,2018-03-07 Cambridge IGCSE and O Level Geography has been written specifically for Cambridge International syllabuses 0460 and 2217 Filled with sources graphs and case studies the coursebook requires students to examine a range of information helping to build their analytical skills Written by highly experienced authors and Cambridge trainers this coursebook is updated to support both Cambridge IGCSE and O Level students It includes clear and practical support case studies from 25 different countries fieldwork ideas and a range of interesting content The accompanying CD ROM contains support sheets for the topics covered outline maps and sample exam style questions Answers to the activities are in the teacher's resource **Ismaili Sources, Studies, History and Traditions** Farhad Daftary,2025-09-25 Until recently Ismailis were studied and evaluated almost exclusively on the basis of evidence often fabricated by adversaries Thus a variety of legends and misrepresentations circulated in Europe as well as among other Muslim communities regarding the

teachings and practices of this Shi'i Muslim community. With the access of modern scholars to numerous Ismaili manuscript sources preserved in Yemen, Syria, Iran, Central Asia, and India, a completely new image of the Ismailis has emerged. A leading authority in Ismaili studies, Farhad Daftary draws on the results of modern scholarship in the studies collected here on Ismaili history and aspects of Ismaili thought and traditions.

Kings' Sagas and Norwegian History Shami Ghosh, 2011-09-20 This book is an examination of some of the principal issues arising from the study of the kings sagas, the main narrative sources for Norwegian history before c. 1200. Providing an overview of the past two decades of scholarship, it discusses the vexed relationship between verse and prose and the reliability as historical sources of the verse alone or the combination of verse and prose; the possibility and extent of non-native influence on the composition of these texts; and the function of the past in particular, given that most of the historiography of Norway was produced in Iceland. This book aims to stimulate studies of medieval Scandinavian historiography with its critical perspective on the texts and the scholarship while also providing a useful work of reference in order to make this area of research accessible to scholars in cognate fields.

Tracing Textile Production from the Viking Age to the Middle Ages Ingvild Øye, 2022-05-05 This book concerns textile production at the fringes of north-western Europe, areas in western Norway and the North Atlantic in the expanding dynamic and transformative period from the early Viking Age into the Middle Ages. Textiles constitute one of the basic needs in human life to protect and keep the body warm but also to show social status and affiliations. Textiles had a wide spectrum of use areas and qualities, fine and coarse in various contexts and in the Viking Age not least related to the production of sails, all essential for the development and character of the period. So what were the tools and textiles like? Who made them? Who used them? And who exposed them? By tracing textile production from the remains of tools and textiles in varied landscapes and settings, Viking Age graves and in situ workplaces from the whole period and combining this with textual information, many layers of information are exposed about technology and qualities as well as gender, gender roles, social relations, power, and networks. By combining tools, textiles, and texts in various settings, this book aims to contextualize dispersed archaeological finds of tools and textiles to uncover patterns across larger areas and in a long-term perspective of half a millennium.

A Reference Guide for English Studies Michael J. Marcuse, 1990-01-01 This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies which Marcuse defines as all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature. Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews of research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross-references are liberally supplied where appropriate. Although cost-conscious librarians will probably consider the several other excellent

literary bibliographies in print such as James L Harner s Literary Research Guide Modern Language Assn of America 1989 larger academic libraries will want Marcuse s volume Jack Bales Mary Washington Coll Lib Fredericksburg Va Library Journal

King Arthur Rodney Castleden,2003-03-13 King Arthur is often written off as a medieval fantasy the dream of those yearning for an age of strong just rulers and a contented kingdom Those who accept his existence at all generally discard the stories that surround him This exciting new investigation argues not only that Arthur did exist as a Dark Age chieftain but that many of the romantic tales of Merlin Camelot and Excalibur are rooted in truth In his quest for the real King Arthur Rodney Castleden uses up to date archaeological and documentary evidence to recreate the history and society of Dark Age Britain and its kings He revives the possibility that Tintagel was an Arthurian legend and proposes a radical new theory that Arthur escaped alive from his final battle A location is even suggested for perhaps the greatest mystery the whereabouts of Arthur s grave King Arthur The Truth Behind the Legend offers a more complete picture of Arthur s Britain and his place in it than ever before The book s bold approach and compelling arguments will be welcomed by all readers with an interest in Arthuriana

Reading Old English Texts Katherine O'Brien O'Keeffe,1997-08-28 Reading Old English Texts first published in 1997 focuses on the critical methods being used and developed for reading and analysing writings in Old English The collection is timely given the explosion of interest in the theory method and practice of critical reading Each chapter engages with work on Old English texts from a particular methodological stance The authors are all experts in the field but are also concerned to explain their method and its application to a broad undergraduate and graduate readership The chapters include a brief historical background to the approach a definition of the field or method under consideration a discussion of some exemplary criticism with a balance of prose and verse passages an illustration of the ways in which texts are read through this approach and some suggestions for future work

The Female Voice in The Assembly of Ladies Simone Celine Marshall,2009-05-27 The Assembly of Ladies is a fifteenth century secular love poem in Middle English that adheres closely to conventional poetic structures but throws these conventions into relief as it presents the narrative from a woman s point of view a rare occurrence for poetry of this period Who wrote it for whom and why are questions about which we can speculate but never ultimately answer the poem itself gives us few clues Yet the poem has had a remarkable shelf life in subsequent centuries the poem has continued to be noticed read and debated as a small but significant artefact from fifteenth century England This book examines how fifteenth century English social conventions impact upon gender relations in The Assembly of Ladies By drawing on contemporary and clearly influential texts from the fifteenth century as a comparison Marshall shows how The Assembly of Ladies has integrated social conventions into its themes and structure elevating for the reader the ways that social and literary conventions impact on women in the production and consumption of literature
