Sources For The History Of The Science O:

Sources for the History of Science 1660-1914 David M. Knight, *The Sources for the Early History of Ireland: an Introduction and Guide* James Francis Kenney, 1929 **New NCERT CBSE Class 6 Social Science: Exploring Society India and Beyond**, New NCERT CBSE Class 6 Social Science Exploring Society India and Beyond *History as a Science* Jan van der Dussen, 2020-05-11 Since its appearance in 1981 *History as a Science* by Jan van der Dussen has been welcomed as a coherent and comprehensive study of the many aspects of Collingwood's philosophy of history including its development and reception. The book was the first to pay attention to Collingwood's unpublished manuscripts and to his work as an archaeologist and historian herewith opening up a new angle in Collingwood studies. The republication of this volume meets an increasing demand to make the book available for future Collingwood scholars and people interested in Collingwood's philosophy. The present edition of *History as a Science* includes updated references to the published manuscripts and an added preface. *Secondary Sources in the History of Canadian Medicine* Charles G. Roland, Jacques Bernier, 2010-11-22 Volume Two of this retrospective bibliography is both a continuation and an expansion of Volume One 1984. It contains references to Canadian medical historical literature published between 1984 and 1998 and also includes much additional material published prior to 1984. Finally it substantially enlarges the content of French language material. Every effort has been made to be as inclusive as possible of articles, theses, book chapters and books both in English and in French relating to the history of medicine. No single electronic source can replace this bibliography. The contents are divided into three sections. The first is a listing of material expressly biographical. Section two lists material under a wide variety of subject headings related to medicine and the third is a complete listing of the authors who have contributed these articles. Simply organized and easy to use, this bibliography will be of value to historians, archivists, librarians and anyone interested in the history of medicine. *Sources in the History of Psychiatry, from 1800 to the Present* Chris Millard, Jennifer Wallis, 2022-04-19 This book offers a general introduction to historical sources in the history of psychiatry delving into the range of sources that can be used to investigate this dynamic and exciting field. The chapters in this volume deal with physical sources that might be encountered in the archive such as asylum casebooks, artwork, material artefacts, post mortem records, more general types of source including medical journals, literature, public enquiries and key themes within the field such as feminist sources, activist and survivor sources. Offering practical advice and examples for the novice as well as insightful suggestions for the experienced scholar, the authors provide worked through examples of how various source types can be used and exploited and reflect productively on the limits and constraints of different kinds of source material. In so doing it presents readers with a comprehensive guide on how to read such sources to research and write the history of psychiatry. Methodically rigorous, clear and accessible, this is a vital reference for students just starting out within the field through to more experienced scholars experimenting with new and unfamiliar sources in the history of medicine and history of psychiatry more specifically.

Chapters 4 8 9 10 and 13 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com They have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Scientific Sources and Teaching Contexts Throughout History: Problems and Perspectives Alain Bernard, Christine Proust, 2013-11-26 This book examines the textual social cultural practical and institutional environments to which the expression teaching and learning contexts refers It reflects on the extent to which studying such environments helps us to better understand ancient or modern sources and how notions of teaching and learning are to be understood Tackling two problems the first is that of certain sources of scientific knowledge being studied without taking into account the various contexts of transmission that gave this knowledge a long lasting meaning The second is that other sources are related to teaching and learning activities but without being too precise and demonstrative about the existence and nature of this teaching context In other words this book makes clear what is meant by context and highlights the complexity of the practice hidden by the words teaching and learning Divided into three parts the book makes accessible teaching and learning situations presents comparatist approaches and emphasizes the notion of teaching as projects embedded in coherent treatises or productions

Historiography of Mathematics in the 19th and 20th Centuries Volker R. Remmert, Martina R. Schneider, Henrik Kragh Sørensen, 2016-12-08 This book addresses the historiography of mathematics as it was practiced during the 19th and 20th centuries by paying special attention to the cultural contexts in which the history of mathematics was written In the 19th century the history of mathematics was recorded by a diverse range of people trained in various fields and driven by different motivations and aims These backgrounds often shaped not only their writing on the history of mathematics but in some instances were also influential in their subsequent reception During the period from roughly 1880 1940 mathematics modernized in important ways with regard to its content its conditions for cultivation and its identity and the writing of the history of mathematics played into the last part in particular Parallel to the modernization of mathematics the history of mathematics gradually evolved into a field of research with its own journals societies and academic positions Reflecting both

a new professional identity and changes in its primary audience various shifts of perspective in the way the history of mathematics was and is written can still be observed to this day Initially concentrating on major internal universal developments in certain sub disciplines of mathematics the field gradually gravitated towards a focus on contexts of knowledge production involving individuals local practices problems communities and networks The goal of this book is to link these disciplinary and methodological changes in the history of mathematics to the broader cultural contexts of its practitioners namely the historians of mathematics during the period in question *Foreign Social Science Bibliographies*, 1964 **Bibliography of the History of Medicine**, 1984 *History of Psychiatry and Medical Psychology* Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s D B Weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
