The Geographical Distribution of Animals Alfred Russel Wallace, 1876 **The Geographical Distribution of Animals** , 1876 **The Geographical Distribution of Animals** Alfred Russel Wallace, 2011-11-03 First published in 1876 these

volumes present the findings of a leading biologist on thousands of animals and birds Historical Animal Geographies Sharon Wilcox, Stephanie Rutherford, 2018-05-11 Arguing that historical analysis is an important yet heretofore largely underexplored dimension of scholarship in animal geographies this book seeks to define historical animal geography as the exploration of how spatially situated human animal relations have changed through time This volume centers on the changing relationships among people animals and the landscapes they inhabit taking a spatio temporal approach to animal studies Foregrounding the assertion that geography matters as much as history in terms of how humans relate to animals this collection offers unique insight into the lives of animals past how interrelationships were co constructed amongst and between animals and humans and how nonhuman actors came to make their own worlds This collection of chapters explores the rich value of work at the contact points between three sub disciplines demonstrating how geographical analyses enrich work in historical animal studies that historical work is important to animal geography and that recognition of animals as actors can further enrich historical geographic research **Research Awards Index** , *The Geographical Distribution of*

Animals. With a Study of the Relations of Living and Extinct Faunas as Ducidating the Past Changes of the Earth's Surface Alfred Russel Wallace, 2024-06-13 Reprint of the original first published in 1876 **Animal Geographies** Jennifer

Wolch, Jody Emel, 1998-09-17 Each year billions of animals are poisoned dissected displaced killed for consumption or held in captivity usually for the benefit of humans The animal world has never been under greater peril and this broad ranging collection contributes to a much needed fundamental rethinking about our relation with it Animal Geographies explores the diverse ways in which animals shape the formation of human identity Essays on zoos and wolves for example reveal how animals figure in social constructions of race gender and nationality From questions of identity and subjectivity it moves to a consideration of the places where people and animals confront the realities of coexistence on an everyday basis by way of case studies of species such as mountain lions and the golden eagle It then examines the ways in which animals figure in the ongoing globalization of production and mass consumption illustrated by essays on the US meatpacking industry and meat production in the Indian state of Rajasthan and finally takes up legal and ethical approaches to human animal relations Animal Geographies compels a profound rethinking of the nature of human animal relations and offers a series of proposals for reconstituting this relationship on a progressive basis Contributors Kay Anderson Glen Elder Andrea Gullo Unna Lassiter William S Lynn Suzanne M Michel Chris Philo James D Proctor Paul Robbins Frances M Ufkes James L Wescoat Jr
