South East Asian Food Rosemary Brissenden, 2011-08-01

Chinese Food and Foodways in Southeast Asia and Beyond Tan Chee-Beng, 2012-08-01 Chinese cuisine has had a deep impact on culinary traditions in Southeast Asia where the lack of certain ingredients and access to new ingredients along with the culinary knowledge of local people led Chinese migrants to modify traditional dishes and to invent new foods. This process brought the cuisine of southern China, considered by some writers to be the finest in the world, into contact with a wide range of local and global cuisines and ingredients. When Chinese from Southeast Asia moved on to other parts of the world, they brought these variants of Chinese food with them, completing a cycle of culinary reproduction, localization, and invention, and globalization. The process does not end there for the new context offers yet another set of ingredients and culinary traditions, and the embedding and fusing of foods continues, creating additional hybrid forms. Written by scholars whose deep familiarity with Chinese cuisine is both personal and academic, *Chinese Food and Foodways in Southeast Asia and Beyond* is a book that anyone who has been fortunate enough to encounter Southeast Asian food will savour, and it provides a window on this world for those who have yet to discover it. **South East Asian Food** Rosemary

Brissenden, 2003 Since its first publication in 1970, *South East Asian Food* has become the authoritative book on the subject. Covering modern and traditional dishes from Indonesia, Malaysia, Thailand, Laos, Cambodia, and Vietnam, Rosemary Brissenden reveals how to make authentic Asian food at home. With the help of her easy-to-follow instructions and knowledge of local foods, you'll be able to recreate delightful dishes. With hundreds of recipes, *South East Asian Food* is a must-have guide for anyone who wants to discover the art of Asian cuisine. **Food Culture in Southeast Asia** Penny Van Esterik, 2008-08-30

Southeast Asian cuisines such as Thai have become quite popular in the United States, even though immigrant numbers are low. The food is appealing because it is tasty, attractive, and generally healthful, with plentiful vegetables, fish, noodles, and rice. *Food Culture in Southeast Asia* is a richly informative overview of the food and foodways of the mainland countries, including Burma, Thailand, Laos, Vietnam, Cambodia, and Malaysia, and the island countries of Singapore, Brunei, East Timor, Indonesia, and the Philippines. Students and other readers will learn how diverse peoples from diverse geographies feed themselves and the value they place on eating as a material, social, and symbolic act. Chapter 1, *Historical Overview*, surveys the archaeological and historical evidence concerning mainland Southeast Asia, with emphasis on the Indianized kingdoms of the mainland and the influence of the spice trade on subsequent European colonization. Chapter 2, *Major Foods and Ingredients*, particularly illuminates the rice culture as the central source of calories and a dominant cultural symbol of feminine nurture, plus fish and fermented fish products, local fresh vegetables and herbs, and meat in variable amounts. The *Cooking* chapter discusses the division of labor in the kitchen, kitchens and their equipment, and the steps in acquiring, processing, and preparing food. The *Typical Meals* chapter approaches typical meals by describing some common meal elements, meal format, and the timing of

meals Typical meals are presented as variations on a common theme with particular attention to contrasts such as rural urban and palace village Iconic meals and dishes that carry special meaning as markers of ethnic or national identity are also covered Chapter 6 Eating Out reviews some of the options for public eating away from home in the region including the newly developed popularity of Southeast Asian restaurants overseas The chapter has an urban middle class bias as those are the people who are eating out on a regular basis The Special Occasions chapter examines ritual events such as feeding the spirits of rice and the ancestors Buddhist and Muslim rituals involving food rites of passage and universal celebrations around the coming of the New Year The final chapter on diet and health looks at some of the ideologies underlying the relation between food and disease particularly the humoral system and then considers the nutritional challenges related to recent changes in local food systems including food safety
