## **South Korea's New Trade Unions The Struggle For Free Trade Unions:**

**Min-ju No-jo, South Korea's New Trade Unions** Asia Monitor Resource Center, 1987      **Social Development in Asia** Kwong-leung Tang, 2000-05-31 Most Asian countries have shown a strong commitment to rapid economic development. Economists have argued that the fruits from economic development will be spread equitably throughout the population. In the absence of a strong tradition of social rights, social development in Asia has long been taken for granted. This collection documents social development in the Asian countries of China, Hong Kong, Taiwan, South Korea, Thailand, and India and concludes that social development has lagged behind economic development. This has given rise to distorted development in many countries. Serious development problems of poverty and inequalities have lingered even in these economically advanced countries of Hong Kong, Taiwan, and Singapore. These problems have been exacerbated in the wake of the Asian economic crisis. In order to harmonize social development with economic growth, Asian states ought to be more proactive in their development agendas. As a text on social development in Asia, this book is primarily intended for practitioners and students of social work, social administration, and social policy. It is also relevant for students and practitioners of sociology, economics, and public policy.      *The Oxford Handbook of South Korean Politics* JeongHun Han, Ramon Pacheco Pardo, Youngho Cho, 2023-01-24 This Handbook presents and analyses contemporary South Korean politics, bringing together domestic political, economic, social, cultural, and demographic developments and putting them in the context of trends in fellow developed countries.      *Min-ju No-jo, South Korea's New Trade Unions*, 1987      Human Rights and Labor Solidarity Susan L. Kang, 2012-07-24 Faced with the economic pressures of globalization, many countries have sought to curb the fundamental right of workers to join trade unions and engage in collective action. In response, trade unions in developed countries have strategically used their own governments' commitments to human rights as a basis for resistance. Since the protection of human rights remains an important normative principle in global affairs, democratic countries cannot merely ignore their human rights obligations and must balance their international commitments with their desire to remain economically competitive and attractive to investors. *Human Rights and Labor Solidarity* analyzes trade unions' campaigns to link local labor rights disputes to international human rights frameworks, thereby creating external scrutiny of governments. As a result of these campaigns, states engage in what political scientist Susan L. Kang terms a normative negotiation process in which governments, trade unions, and international organizations construct and challenge a broader understanding of international labor rights norms to determine whether the conditions underlying these disputes constitute human rights violations. In three empirically rich case studies covering South Korea, the United Kingdom, and Canada, Kang demonstrates that this normative negotiation process was more successful in creating stronger protections for trade unions' rights when such changes complemented a government's other political interests. She finds that states tend not to respect stronger economically oriented human rights obligations due to the normative power of such rights alone. Instead, trade union transnational activism

coupled with sufficient political motivations such as direct economic costs or strong rule of law obligations contributed to changes in favor of workers rights

unions employers and the state The contributors highlight that this is the major cause and effect of union decline and argue that if there is to be any union revitalisation and return to former levels of influence then unions need to respond in appropriate political and practical ways Written in a clear and accessible style the Handbook examines unions efforts to date in many of the major economies of the world providing foundations for understanding each country Policymakers analysts academics researchers and advanced students in employment industrial and labour relations as well as political economy will find this unique Handbook an important resource to understanding the contemporary plight and activity of labour unions

Central Intelligence Agency,1962     **Free Trade and Transnational Labour** Andreas Bieler,Bruno Ciccaglione,John Hilary,Ingemar Lindberg,2016-04-14 Resistance against free trade agreements based on an expanded trade agenda including issues related to intellectual property rights trade in services and trade related investment measures has increased since the demonstrations at the WTO ministerial conference in Seattle in 1999 While the WTO Doha negotiations have broken down the EU and USA are increasingly engaged in bilateral free trade agreements building on this expanded trade agenda Free trade strategies have increasingly become a problem for the international labour movement While trade unions in the North especially in manufacturing have supported free trade agreements to secure export markets for their companies trade unions in the Global South oppose these agreements since they often imply deindustrialisation The purpose of this volume is to understand better these dynamics underlying free trade policy making Academics trade union researchers and social movement activists analyse these issues in detail in order to explore possibilities for transnational labour solidarity This book was published as a special issue of Globalizations     **Labour and Transnational Action in Times of Crisis** Andreas Bieler,Roland Erne,Darragh Golden,Idar Helle,Knut Kjeldstadli,Tiago Matos,Sabina Stan,2015-07-10 Processes of neoliberal globalization have put national trade unions under pressure as the transnational organization of production puts these labour movements in competition with each other The global economic crisis has intensified these pressures further And yet economic and political integration processes have also provided workers with new possibilities to organize resistance Emphasizing the importance of agency this book analyzes transnational labour action in times of crisis historically and now It draws on a variety of fascinating cases across formal and informal collectives in order to clarify which factors facilitate or block the formation of solidarity Moving beyond empirical description of cases to an informed understanding of collective action across borders the volume provides an insightful theorization of transnational action     *Free Trade Agreements and Global Labour Governance* Adrian Smith,James Harrison,Liam Campling,Ben Richardson,Mirela Barbu,2020-09-07 Exploring the contentious relationship between trade and labour this book looks at the impact of the EU s new generation free trade agreements on workers Drawing upon extensive original research including over 200 interviews with key actors across the EU and its trading partners it considers the effectiveness of the trade labour linkage in an era of global value chains The EU believes trade can work for all claiming that labour provisions in its free trade agreements ensure that economic growth and high labour standards go hand in hand Yet whether these actually make a difference to workers is strongly contested This book explains why labour provisions have been profoundly limited in the EU s agreements with the CARIFORUM group South Korea and Moldova It also shows how the

provisions were mismatched with the most pressing workplace concerns in the key export industries of sugar automobiles and clothing and how these concerns were exacerbated by the agreements commercial provisions This pioneering approach to studying the trade labour linkage provides insights into key debates on the role of civil society in trade governance the relationship between public and private labour regulation and the progressive possibilities for trade policy in the twenty first century This book will appeal to research scholars post graduate students trade policy practitioners policy researchers allied to labour movements and informed activists

**Organizing at the Margins** Jennifer Jihye Chun, 2009 Labor organizers now recognize both the needs and the importance of immigrants and women employed in the growing ranks of low paid and insecure service jobs This book compares the experiences of these groups in South Korea and the US

Constructing European Union Trade Policy Gabriel Siles-Brügge, 2014-02-18 With the stagnation of the Doha Round of multilateral talks trade liberalisation is increasingly undertaken through free trade agreements Gabriel Siles Brügge examines the EU's decision following the 2006 Global Europe strategy to negotiate such agreements with emerging economies Eschewing the purely materialist explanations prominent in the field he develops a novel constructivist argument to highlight the role of language and ideas in shaping EU trade policy Drawing on extensive interviews and documentary analysis Siles Brügge shows how EU trade policymakers have privileged the interests of exporters to the detriment of import competing groups creating an ideational imperative for market opening Even during the on going economic crisis the overriding mantra has been that the EU's future well being depends on its ability to compete in global markets The increasingly neoliberal orientation of EU trade policy has also had important consequences for its economic diplomacy with the developing economies of the African Caribbean and Pacific group of states
