H Kauffman

South Wales Miners Glowyr De Cymru A History Of The South Wales Miners Federation 19141926:

South Wales Miners: Glowyr de Cymru Robert Page Arnot, 2023-07-14 First published in 1975 South Wales Miners starts with the War of Empires when nearly 50 000 Welsh miners almost one fifth of the total manpower of their coalfield responded to the call and voluntarily enlisted in the British armed forces The author uncovers how the coalowners in the meantime took advantage of the war emergency to deny the remaining miners a fair recompense for their toil and of the bitter strife that followed The book tells the story of what led up to the General Strike and here the author uses hitherto hidden sources of information The picture is revealed of what was a virtual conspiracy between the Baldwin Churchill Government and the mineowners not only to cut wages and lengthen hours but to cripple British trade unionism When the miners held out through a seven month lockout the efforts of these highly placed conspirators recoiled on their own heads and on the whole economy of British Empire This book will be of interest to students of history labour studies economics and political science Strikes and Solidarity Roy A. Church, Quentin Outram, 2002-05-09 In this important contribution to the study of industrial relations Roy Church and Quentin Outram present research into the strike activity of British coalminers from the late nineteenth century to the mid 1960s The authors consider not only the major national strikes and lock outs which made the industry a byword for industrial militancy but also the multitude of small scale strikes which formed a routine part of British colliery lives Strikes and Solidarity first published in 1998 is multi disciplinary in approach and views coalfield conflict from the perspectives offered by sociologists industrial relations specialists and economists as well as social and economic historians Church and Outram have successfully blended quantitative and qualitative investigations to explain the long standing issues presented by industrial relations in the coalfields **From Labouring to Learning** Michael R.M. Ward, 2016-04-29 Highly Commended in the Society of Educational Studies Book Prize This book explores how economic changes and the growing importance of educational qualifications in a shrinking labour market particularly effects marginalized young men It follows a group of young working class men in a de industrial community and challenges commonly held representations that often appear in the media and in policy discourses which portray them as feckless out of control educational failures and lacking aspiration Ward argues that for a group of young men in a community of social and economic deprivation expectations and transitions to adulthood are framed through the industrial legacy of geographically and historically shaped class and gender codes These codes have an impact on what it means to be a man and what behaviour is deemed acceptable and what is not The Red International of Labour Unions (RILU) 1920 - 1937 Reiner Tosstorff, 2016-09-07 The Red International of Labour Unions RILU Russian abbreviation Profintern was a central instrument for the spreading of international communism during the inter war period This comprehensive and scholarly history of the organisation based on extensive research in the former communist archives in Moscow and East Berlin sheds significant light on the international trade union movement of the period Tosstorff shows how the RILU began as a revolutionary alliance of

syndicalists and communists in defiance of the social democratic International Federation of Trade Unions His text presents a full account of the organisation's main stages the decline of the revolutionary wave after World War One after which many syndicalists left and others were integrated into the communist parties the continuation of the RILU as an international communist apparatus and its dissolution in 1936/7 as part of communism's popular front policy First published in German as Profintern Die Rote Gewerkschaftsinternationale 1920-1937 by Ferdinand Schlingensiefen Paderborn in 2004

Towards a Comparative History of Coalfield Societies Andy Croll, 2017-05-15 Few areas of labour history have received as much attention as the coal industry with miners often finding themselves at the centre of studies on working class political and industrial history Yet whilst much has been written about the struggles of miners and their unions in particular countries their national confrontations and political organization much less work has been done on the regional communities and how they related both to the national and international picture The central theme of this volume is to transcend such overarching national models and to focus instead on local coal mining societies which can then be compared and contrasted to similar communities elsewhere In so doing the book is able to tackle a number of familiar labour history themes in a more nuanced way exploring issues of political activism and class relationships from the perspectives of gender ethnicity race and specific localized cultural traditions As the chapters in this volume illustrate such an approach can offer rich and often surprising conclusions in many cases challenging the accepted notion of miners as the vanguard of militant working class political activism Adopting a regional approach that compares coalfield communities from five continents this volume reflects coalfield experiences on a truly global scale By looking at what made communities unique as well as what they shared in common a much fuller understanding of the workplace neighbourhood family identity and political organization is possible Underlining the strong connections between politics community and identity this work emphasizes the challenges and opportunities available to labour historians pushing forward the boundaries of the discipline in new and exciting ways

Historical Studies in Industrial Relations, 2006 **The Politics of Identity and Civil Society in Britain and Germany** Leighton S. James, 2008-10-15 This study compares the making and remaking of the political identities of the miners movements in Britain and Germany Examining this intersection through discourse analysis and the concept of the lifeworld this book brings together the miners social world and the realm of organized politics to advance historical understanding of two of the most powerful European labor movements Taking the south Wales and Ruhr coalfields as case studies it focuses on the public discourse of the trade unions and political parties as disseminated in local newspapers trade union publications pamphlets and election leaflets It reveals how the miners movements utilized ideas such as class religion the people or Volk socialization and nationalization to construct organizational identities during the turbulent period between 1890 and 1926 **South Wales Miners** Robert Page Arnot, 1975 *Wales* Gwilym Huws, D. Hywel E. Roberts, 1991 In a series of 14 chapters this book brings together contemporary research findings on the involvement of word internal structure

for the purpose of word reading especially morphological structure Contributors include many leading experts in this research domain Llafur ,1979 *Bibliography of the British Coal Industry* Great Britain. National Coal Board,1981

Industrial Politics and the 1926 Mining Lockout John McIlroy,Alan Campbell,Keith Gildart,2004 The seven month British national mining lockout of 1926 was one of the most important European industrial disputes of the twentieth century It not only came to symbolize the defeat of the labor movement in the interwar years but it also cast a long shadow over industrial relations in the mining industry and epitomized the predicament of British miners in the early decades of the century Industrial Politics draws on new methodological perspectives that have emerged in recent labor studies in order to comprehensively survey this event at the national local and regional levels and makes a significant contribution to the social and political history of the industrial working class *Employee Relations Bibliography and Abstracts* ,1987 **The Carmarthenshire Antiquary** ,1982 Subject Catalog Library of Congress, Subject Catalog, 1977 Library of Congress,1977 *The History of the British Coal Industry* Michael Walter Flinn,1984 This volume studies the decline of a staple industry at a time of worldwide upheaval caused by war and economic slump In 1913 British coalmining was at the height of its achievement and prosperity by 1946 it was an ominous symbol of twentieth century Britain s inability to adapt to technological and economic change and its social consequences Written in the light of industrial and government records this study gives full weight to the political aspects of economic decision making and economic change It demonstrates the extent to which the problems of the coal industry were and still are deeply rooted in its social political and economic history It is also a classic case study of inflexibility in British industry **National Union Catalog** ,1973 Includes entries for maps and atlases **Bibliographic Guide to Business and Economics** New York Public Library. Research Libraries,1976 **Bibliotheca Celtica** ,1981
