South Africa Prospects For Successful Transition:

South Africa Bob Tucker, Bruce R. Scott, 1992 An analysis of South Africa's prospects for successful transition to democracy The book summarizes the findings and conclusions of a team of people who worked together over a six month period to analyze South Africa's past and present and to consider its alternative paths into the future *Poverty Knowledge in South Africa* Grace Davie, 2015-02-05 Poverty is South Africa's greatest challenge But what is poverty How can it be measured And how can it be reduced if not eliminated In South Africa human science knowledge about the cost of living grew out of colonialism industrialization apartheid and civil resistance campaigns which makes this knowledge far from neutral or apolitical South Africans have used the Poverty Datum Line PDL Gini coefficients and other poverty thresholds to petition the state to chip away at the pillars of white supremacy and more recently to criticize the postapartheid government's failures to deliver on some of its promises Rather than promoting one particular policy solution this book argues that poverty knowledge teaches us about the dynamics of historical change the power of racism in white settler societies and the role of grassroots protest movements in shaping state policies and scientific categories Readers will gain new perspectives on today's debates about social welfare redistribution and human rights and will ultimately find reasons to rethink conventional approaches to advocacy

Sustainable Development for a Democratic South Africa Ken Cole, 2014-04-08 After the multi racial elections in April 1994 South Africa has been set on a new course For a country emerging from 45 years of apartheid democracy should prove to be the vital first step on the path to sustainability and equitability There are sure to be pitfalls along the way but the potential offered by long awaited equality is enormous and realising that potential is the key to the country's chances of achieving sustainable development This book analyses the changes which are needed and which might result from the new political culture It discusses the policy requirements necessary for sustainable development and looks at how the economy regional integration land reform the law local government NGOs health care and AIDs prevention education and the media will all be affected drawing on the experience of other countries in Africa which have witnessed the transition to black majority rule Accessible to general readers as well as to specialists it provides a comprehensive overview of the issues involved and a basis for understanding what prospects the future holds for South Africa *Security and Politics in South Africa* Peter C. J. Vale, 2003 Exploring how the region is changing today as transnational solidarity and a single regional economy remove the distinctions between national and international politics he asks whether South African domination can finally be overcome and considers what sort of cosmopolitan political arrangement will be appropriate for southern Africa in the new century

BOOK JACKET [Township Politics: Civic Struggles for a New South Africa](#) Mzwanele Mayekiso, 2023-02-24 This insider's account of an extraordinary period of national political transition is also a primer on a new radical philosophy the street smart Marxism that developed in South Africa's sprawling townships between 1985 and 1995 and rendered them ungovernable for the apartheid state Mzwanele Mayekiso a young leader of the civics as South

Africa's popular community organizations are called spent almost three years in prison as a result of the civics militant organizing. Here he interlaces his personal story with caustic assessments of apartheid's hand-picked township leaders with rebuttals of armchair academics and with impassioned but self-critical analyses of the civics struggles and tactics. He ends with a vision of an international urban social movement that he argues must be a crucial component of any emancipatory project.

From Technology Transfer to Intercultural Development S. Srijbos, Jan van der Stoep, 2012-02-01 The idea for this book has been born in a dialogue between the authors of *In Search of an Integrative Vision for Technology* 2006 and a group of scholars and practitioners from South Africa whose research and development activities focuses on problems of traditional African society and culture. Although there existed awareness in the writing of the earlier book that the search for normativity for our technological society should encompass the different cultural spheres of the world, no attention has been paid to the problem of interculturality. Focussing on the development of technology in the developed societies, the emphasis was laid on finding a basis for interdisciplinarity bridging the gaps between the sciences and humanities as well as between theory and practice. According to the vision that has been elaborated on in the above book, not the autonomous dynamics of technology as a free flying projectile should determine the future of our global world, but guidance has to be provided by a normative perspective on technology for the common good of all people and cultures. Following further this line of research, the current book aims to address explicitly the intercultural dimension of technology in our globalising world.

South Africa in Transition Aletta J. Norval, David Howarth, 2016-07-27 South Africa in Transition utilises new theoretical perspectives to describe and explain central dimensions of the democratic transition in South Africa during the late 1980s and early 1990s, covering changes in the politics of gender and education, the political discourses of the ANC, NP and the white right, constructions of identity in South Africa's black townships and rural areas, the role of political violence in the transition and accounts of the democratization process itself.

Globalization, the Third World State and Poverty-Alleviation in the Twenty-First Century B. Ikubolajeh Logan, 2017-11-22 This title was first published in 2002. Bringing together an inspiring mix of US and African contributors, this book explores the dynamics of the unfolding globalized economic, political, socio-cultural and environmental systems. Featuring incisive international commentary on the causes and consequences of poverty in the Third World, it presents a powerful study of the strategies by which Third World governments and civil society can overcome poverty by insinuating themselves more creatively into the global order. The result is one of the defining works so far produced on the tensions between globalization and development.

Thabo Mbeki and the Battle for the Soul of the ANC William Mervin Gumede, 2008-05-15 As a spokesman for a country a continent and the developing world Thabo Mbeki plays a crucial role in world politics but to many people he is an enigma Is this simply because Mbeki is a secretive man or are there complicated political factors at play In this book experienced journalist William Gumede pulls together the insights he has gained from years of reporting on the Mbeki presidency to create a sophisticated but readable account of South Africa's seat of power He explores the complex position that Mbeki occupies following in Nelson Mandela's footsteps heading a party with roots as a liberation movement and ruling an intensely divided country Revealing the political and personal tensions behind the scenes Gumede explains the forces that have created one of the world's most powerful and enigmatic leaders Covering Mbeki's attempts to modernise the economy and kick start an African Renaissance and investigating his controversial stance on issues from AIDS to Zimbabwe the book offers invaluable insights into the machinations behind political decisions that touch the lives of millions every day

Transitions to Democracy Kathryn Stoner,Michael McFaul,2013-04-15 Fifteen case studies by scholars and practitioners demonstrate the synergy between domestic and international influences that can precipitate democratic transitions As demonstrated by current events in Tunisia and Egypt oppressive regimes are rarely immune to their citizens desire for democratic government Of course desire is always tempered by reality therefore how democratic demands are made manifest is a critical source of study for both political scientists and foreign policy makers What issues and

consequences surround the fall of a government what type of regime replaces it and to what extent are these efforts successful Kathryn Stoner and Michael McFaul have created an accessible book of fifteen case studies from around the world that will help students understand these complex issues Their model builds upon Guillermo O Donnell Philippe C Schmitter and Laurence Whitehead s classic work Transitions from Authoritarian Rule using a rubric of four identifying factors that can be applied to each case study making comparison relatively easy Transitions to Democracy yields strong comparisons and insights For instance the study reveals that efforts led by the elite and involving the military are generally unsuccessful whereas mass mobilization civic groups and new media have become significant factors in supporting and sustaining democratic actors This collection of writings by scholars and practitioners is organized into three parts successful transitions incremental transitions and failed transitions Extensive primary research and a rubric that can be applied to burgeoning democracies offer readers valuable tools and information
