South Africa's Foreign Policy J. Broderick, G. Burford, G. Freer, 2001-09-05 This edited collection provides a timely assessment of the foreign policy dilemmas faced by the new South Africa as it reemerges into the community of nations following its transition to democracy As such the book will appeal not only to students and academics specialising in Politics and International Relations but also to business people government officials aid workers and others with an interest in developments in South and Southern Africa Contributors to the book include Deputy Foreign Minister Aziz Pahad and notable academics such as Jack Spence Christopher Hill Fred Ahwireng Obeng and Patrick J McGowan **Inside South Africa's**

Foreign Policy John Siko, 2014-06-16 South Africa is a major player in African diplomacy Its economic diplomatic and military resources far outstrip those of other nations on the continent and it has since the country's 1994 democratic transition sought to take a lead role in the continent's relations with other power blocs particularly during the 1999-2008 presidency of Thabo Mbeki While Mbeki's push for greater African engagement in the global political sphere drew widespread praise other positions notably its seeming inaction toward Zimbabwe and perceived abandonment of its stated emphasis on human rights in foreign policy were more controversial both at home and abroad John Siko has had insider access to South Africa's leading foreign policy players and has been able to ask why Pretoria has taken its various stances and who has mattered in influencing those decisions a topic little examined since 1994 In addition he examines the foreign policy process over the past century determining that despite ANC promises of greater democratic engagement on foreign policy the process has changed quite little **South Africa's Post Apartheid Foreign Policy** Chris Alden, 2019-05-20 The

book presents and analyses South African foreign policy from the onset of the democratic transition of Nelson Mandela in 1994 to the contemporary period The focus of the study is on the question of South African leadership in the context of this transition **South African Foreign Policy** David R Black, David Hornsby, 2018-04-19 This book considers the identity direction and intentions embodied in post apartheid South African Foreign Policy It aims to deepen the understanding of this evolving post apartheid foreign policy through an exploration of the nature and trajectory of key bilateral relationships from both the global South Brazil China Iran the AU and North Japan and the UK This window on the country's international relations enriches understanding of the normative and structural factors that influence not only South African foreign policy but those of what Jordaan 2003 calls emerging middle powers as they seek to position themselves as influential actors in international affairs By sketching the contours of key South African relationships the contributors offer illuminating insights into the cross pressures shaping South African foreign policy In addition they also add depth to the emerging middle power concept by exploring four areas where the tendencies and tensions of emerging middle power foreign policies are apparent regionalism multilateralism reform of global governance and approach to moral leadership This book was previously published as a special issue of Commonwealth and Comparative Politics **South African Foreign Policy Review: Volume 1**

Chris Landsberg, Jo-Ansie van Wyk, 2012-12-27 The richness of public and academic discourses on the past present and future direction of South Africa's role in Africa and the world suggests that as a sub discipline of politics South African foreign policy is ready for a systematic and regular appraisal in the form of a series of publications that the Institute for Global Dialogue will call South African Foreign Policy Review This is also because constant changes in international and domestic circumstances impinge on the management and analysis of South Africa's foreign policy This the first review provides an important opportunity to build on existing foreign policy works in order to take stock of the road already travelled in the past decade or so This is crucial in laying some basis for anticipating the country's future role and considering the opportunities and challenges which future volumes of the review will consider This volume provides a wide ranging appraisal of the relationship between stated foreign policy goals and actual outputs and outcomes an assessment of how foreign policy has actually been operationalized and implemented To this end common themes in South African foreign policy provide the framework for the first review These include foreign policy decision making soft power dynamics in the foreign policy's strategic calculus diplomatic tools used economic diplomacy peace diplomacy and paradiplomacy South Africa's relations with key states in Africa in the global south and in the global north South Africa's approach to Africa multilateral global multilateralism governance The review hopes to stimulate further discussion and thinking on the challenges confronted and the future shape and direction of South Africa's foreign policy

Foreign Policy Posture in Post-Apartheid South Africa

Bhekithemba R. Mngomezulu, 2019-11-11 Foreign policy and domestic policy feed into each other To a large degree the latter informs the former This book demonstrates the relationship between the two paying particularly close attention to how South Africa envisioned its foreign policy during the negotiation process Importantly it spells out how South Africa's foreign policy has evolved since the early 1990s The critics of South Africa's foreign policy often question the motives behind the country's involvement in African and global affairs The contributions here demonstrate the complex nature of foreign policy making approaching the subject both from a broad theoretical perspective and specifically through empirical case studies The book will appeal to political scientists historians policy practitioners international relations specialists and government officials and their advisors as well as international relations theorists

[The Pitfalls of Liberal Democracy and Late Nationalism in South Africa](#) M. between rich and poor **AIDS, South Africa, and the Politics of Knowledge** Jeremy R. Youde, 2016-03-23 Through an in depth examination of the interactions between the South African government and the international AIDS control regime Jeremy Youde examines not only the emergence of an epistemic community but also the development of a counter epistemic community offering fundamentally different understandings of AIDS and radically different policy prescriptions In addition individuals have become influential in the crafting of the South African government s AIDS policies despite universal condemnation from the international scientific community This study highlights the relevance and importance of Africa to international affairs The actions of African states call into question many of our basic assumptions and challenge us to refine our analytical framework It is ideally suited to scholars interested in African studies international organizations global governance and infectious diseases *Political Science in South Africa* Peter Vale, Pieter Fourie, 2016-01-13 In 2013 and in 2014 respectively the South African Association of Political Studies SAAPS and Politikon the South African Journal of Political Studies celebrate their 40th anniversary Also in April 2014 South Africa celebrates twenty years since the advent of the post Apartheid democracy and the birth of the rainbow nation This book provides a timely account of the birth and evolution of South African politics over the past four decades but also of the study of Political Science and International Relations in this country Fourteen political scientists contribute chapters to this volume situating the study of politics within its global context and recounting the development of politics as a field of study at South African universities The fourteen contributions evaluate the state of the discipline s and suggest conclusions that are surprising and in many instances unsettling not only with regards to what and how politics is taught but also how its study has variously gained and lost pertinence for South Africans understanding of their own polity as well as its place in the world The implications are uncomfortable and pose interesting challenges for South African scholarship pedagogy and national self reflection This book was published as a special issue of Politikon [Africa in the New World Order](#) Olayiwola Abegunrin, 2014-07-08 This book examines the role of the emerging African nations in the new international order of the twenty first century Since the end of the Cold War little significance has been placed on the African continent in the security and political considerations of the Western world However post 9 11 international security has been redefined and new challenges have been identified Thus at the beginning of the twenty first century Africa is facing a variety of new security challenges Africa has become an increasingly important battleground in the fight against terrorism Since the beginning of 2011 the new revolutions now known as the Arab Spring that swept through North Africa have created new challenges for the African continent and are compounding the African peoples struggles for poverty alleviation state stability security socio political and socio economic development democracy and good governance In addition to these crises of civil war ethnic conflict state insecurity and rampant corruption at all levels the HIV AIDS pandemic has ravaged the continent for the past four decades The only major pan African organization the African Union is unable to lead and defend the continent effectively At this crucial period when the continent is

The U S Department of Defense is fighting a new shadow war in Africa Africa is the battlefield of tomorrow and the United States military is spreading secret wars in the continent This book explores how and why this has happened Since the beginning of the twentieth century the formulation of the United States policy towards Africa has always been based on the strategic importance of the natural resources of Africa and how these can be used in the national interests of the United States However most Americans gave very little thought to Africa but instead referred to it as the Dark Continent not only because its peoples are dark skinned but also because it was unknown to them Africa is no longer dark but is rather becoming one of the lions on the move This book examines and analyzes Nigeria and U S policy on the continent since the Cold War It looks at Nigeria and the challenges facing the country including problems of development good governance and security It particularly focuses on the impacts of terrorism on Nigeria and U S Africa relations since the Cold War and the realities of September 11 2001 in relations to Nigeria and United States Islamists jihadists terrorism in Africa There is huge potential in Nigeria the country has the largest population in Africa and is well endowed in terms of both natural and human resources Nigeria also has the largest economy on the continent the largest black population in the world a burgeoning and vibrant youthful population and a tradition of international engagement since its independence Its advantageous geographical location in West Africa enables trade within the continent as well as with Europe North and South America and Asia Nigeria is the most important strategic partner for the United States in the African continent and will become

increasingly so in this century **Integrating Africa** Martin Welz,2013 The African Union AU is a continental organization that comprises every African state except for Morocco is indeed a pioneering undertaking Its ambitious aim is to integrate all member states with the ultimate goal of forming the United States of Africa Despite several attempts to build a union the AU has remained an intergovernmental organization one reason being a perceived unwillingness of the AU states to pool their national sovereignties This study seeks to comprehend why Africa s integration process has not moved towards a supranational organization using a novel approach It shifts the usual perspective away from the organization level and provides the first comprehensive and systematic analysis of the AU from the perspective of the states themselves It includes 8 comprehensive case studies Algeria Burkina Faso Ethiopia Mauritius South African Swaziland Uganda and Zimbabwe to

help understand their foreign policy and provide key insights into why they are unwilling to yield sovereignty This work will be of great interest to students and scholars of African politics international relations and international organizations

Contesting Sovereignty Joel Ng, 2021-07-22 Sovereignty is a foundational idea upon which regional organisation of nations is built yet its demise has often been predicted Regionalism which commits states to common frameworks such as rules and norms tests sovereignty as states relinquish some sovereign power to achieve other goals such as security growth or liberalisation This book examines the practice of normative contestation over sovereignty in two regional organisations of Africa and Asia the AU and ASEAN A structured comparison of three case studies from each organisation determines whether a norm challenging sovereignty was accepted rejected or qualified Ng has carried out interviews about and detailed analysis of these six cases that occurred at formative moments of norm setting and that each had very different outcomes This study contributes to the understanding of norms contestation in the field of international relations and offers new insights on how the AU and ASEAN are constituted
