South Africa's Silent Revolution:

South Africa's Silent Revolution John Kane-Berman, 1991 Africa's Quiet Revolution Observed from Nigeri Dominic Okereke, 2012-07 This book prescribes rapid revolution in principal sectors of this African economy through radical paradigm changes And the resultant comprehensive transformation will guarantee significantly higher productivities and double digit annual economic growth Included in this paradigm shift is the joint reindustrialization of the African economy and the US ailing industries via a new Strategic trans Atlantic Alliance modeled on the balanced Euro US cooperation after World War II But it first takes readers through a thorough evaluation of the familiar subject corruption which haunts Nigeria the principal economy in the continent The fundamental difference with other texts on the subject is that this book identifies the most debilitating variant of that corruption That variant causes massive capital flight from a post colonial soft economy that is neither capitalist nor socialist The Nigerian corruption thrives on the native Philosophy of Commission hardened by intractable tribalism that coagulated and ossified with the imports substitution pattern preferred by European firms since independence The book then proceeds to earn its priced revolutionary credential by inventing very novel scientific methods that will skillfully turn this insidious source of structural rigidity and arrested development into a force for economic growth A new apex political leadership culture is recommended and to be fortified with a unifying lingua franca An inter ethnic marriage melting pot is advised for intensified nigerianization of Nigerian youths at birth Spiritual diversity is envisaged to significantly diminish religious intolerance and sectarian violence Modern bureaucracy and inward looking tourism are reformulated to reduce effervescent insecurity and minimize capital flight The resultant economic stability will enlarge domestic foreign investment inflow and will reverse the current dis industrialization and massive job loss and the conditions of under full employment Technological Functionalism Economic pan Africanism and the Alternative Policy of Inputs Substitution are among the several brand new blueprints that this book offers for the extensive transformation of Africa s economy into the robust emerging economy that will rival its counterparts in India and China in the immediate future

South Africa's Brittle Peace P. Toit, 2001-03-13 South Africa has succeeded in establishing a democracy but has yet to eliminate public violence from society This book takes up the issue of post settlement violence and ways of consolidating the newly found democratic peace The role of negotiated institutions such as the new police force economic factors relevant to the anticipated peace dividend external factors such as arms smuggling networks popular responses to rising threats to physical safety and symbolic factors in enhancing the capacity of the state to deal with this issue are examined The Dynamics of Change in Southern Africa Paul B. Rich, 2016-07-27 An up to date survey of political and economic trends in the Southern African region It brings together a well informed group of specialists who examine regional security issues the prospect for a constitutional settlement in South Africa and the problems facing Mozambique Angola Zimbabwe the BLS territories and Namibia The volume adopts an area studies approach and explores fresh analytical perspectives to

understand change in the region in the light of the end of the Cold War and the decline of super power involvement in its affairs

People's War Anthea Jeffery, 2019-05-15 More than 25 years have passed since South Africans were being shot or hacked or burned to death in political violence and the memory of the trauma has faded Nevertheless some 20 500 people were killed between 1984 and 1994 Conventional wisdom has it that most died as a result of the ANC s people s war Many books have been written on South Africa s political transition but none has dealt adequately with the people s war This book does It shows the extraordinary success of the people s war in giving the ANC a virtual monopoly on power as well as the great cost at which this was done The high price of it is still being paid Apart from the terror and killings it sparked at the time the people s war set in motion forces that cannot easily be tamed Violence once unleashed is not easy to stamp out Ungovernability once generated is not readily reversed For this new edition Anthea Jeffery has revised and abridged her seminal work She has also included a brief overview of the ANC s National Democratic Revolution for which the people s war was intended to prepare the way Since 1994 the NDR has been implemented in many different spheres It is now being speeded up in its second and more radical phase

State Formation After Civil War Derek M Powell, 2016-08-05 State formation after civil war offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon Current models of peacebuilding and state building limit that possibility reproducing a fragmented selective view of this complex reality Placing too much emphasis on state building as design they place too little on understanding state formation as unplanned historical process The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state Mining ideas from many disciplines and evidence from 19 peace processes including South Africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice Despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control Though the kind of institutions created will differ with context how rules for state authority are institutionalized follows a consistent basic pattern That pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study Where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase the book uncovers a distinct local government dimension to peace transitions A civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation This path breaking book will be of

compelling interest to practitioners scholars and students of comparative constitutional studies international law peace building and state building **Manufacturing Militance** G. Seidman,1994-05-05 Challenging prevailing theories of development and labor Gay Seidman s controversial study explores how highly politicized labor movements could arise simultaneously in Brazil and South Africa two starkly different societies Beginning with the 1960s Seidman shows how both authoritarian states promoted specific rapid industrialization strategies in the process reshaping the working class and altering relationships between business and the state When economic growth slowed in the 1970s workers in these countries challenged social and political repression by the mid 1980s they had become major voices in the transition from authoritarian rule Based in factories and working class communities these movements enjoyed broad support as they fought for improved social services land reform expanding electoral participation and racial integration In Brazil Seidman takes us from the shopfloor where disenfranchized workers organized for better wages and working conditions to the strikes and protests that spread to local communities Similar demands for radical change emerged in South Africa where community groups in black townships joined organized labor in a challenge to minority rule that linked class consciousness to racial oppression Seidman details the complex dynamics of these militant movements and develops a broad analysis of how newly industrializing countries shape the opportunities for labor to express demands Her work will be welcomed by those interested in labor studies social theory and the politics of newly industrializing regions **Shades of Difference** Padraig O'Malley,2025-05-05 Mac Maharaj played a pivotal role in the liberation movement for nearly four decades suffering brutal tortures and twelve years imprisonment on Robben Island with Nelson Mandela It was Maharaj who smuggled out the manuscript of Mandela s autobiography and later re entered South Africa to establish a political and military underground on a mission so secret that only those at the highest levels were even aware of its existence Drawing from extensive interviews with Maharaj over eleven years and hitherto unavailable documents Padraig O Malley vividly renders a true tale of heroism and a gripping insider s look at the struggle for freedom in South Africa **Translations on Sub-Saharan Africa** United States. Joint Publications Research Service,1978 **The End of the Cold War and The Third World** Artemy Kalinovsky,Sergey Radchenko,2011-04-19 This book brings together recent research on the end of the Cold War in the Third World and engages with ongoing debates about regional conflicts the role of great powers in the developing world and the role of international actors in conflict resolution Most of the recent scholarship on the end of the Cold War has focused on Europe or bilateral US Soviet relations By contrast relatively little has been written on the end of the Cold War in the Third World in Asia Africa and Latin America How did the great transformation of the world in the late 1980s affect regional conflicts and client relationships Who won and who lost in the Third World and why do so many Cold War era problems remain unresolved This book brings to light for the first time evidence from newly declassified archives in Russia the United States Eastern Europe as well as from private collections recent memoirs and interviews with key participants It goes further than anything

published so far in systematically explaining both from the perspectives of the superpowers and the Third World countries what the end of bipolarity meant not only for the underdeveloped periphery so long enmeshed in ideological socio political and military conflicts sponsored by Washington Moscow or Beijing but also for the broader patterns of international relations This book will be of much interest to students of the Cold War war and conflict studies third world and development studies international history and IR in general

Politicians and Apartheid John Gardner,1997 Politicians and apartheid trailing in the people's wake seeks to explain why apartheid was abandoned by South Africa's ruling white National Party at the negotiating table with the African National Congress and other black political organizations While most books on South Africa's current affairs emphasize political organizations and activists as the central players Politicians and apartheid argues that political activity was of secondary importance in determining the fate of apartheid This book adopts instead an economic perspective focusing upon businesses consumers workers homeowners and taxpayers as the key groups responsible for bringing an end to apartheid Politicians and apartheid also examines the response of politicians to the decline of apartheid It argues that attempts by pro apartheid groups to restrict or obstruct change were futile while attempts by apartheid's opponents to topple the system were not only ineffectual but disastrous The book concludes that everyday people are better placed and more able to achieve real change than politicians

Historian Hermann Giliomee,2018-01-04 In this eloquent memoir already widely read and praised in the author's native South Africa Hermann Giliomee weaves together the story of his own life with that of his country a nation that continues to absorb and inspire him both despite and because of its tortuous history An internationally respected historian his landmark *The Afrikaners* writes J M Coetzee includes an account of the origins and demise of apartheid that must rank as the most sober objective and comprehensive we have Giliomee has devoted a lifetime to exploring the origins and perpetuation of the deep divisions in South African society Although he grew up in the heart of the Afrikaner nationalist movement he soon began to cut his own path in examining the rise and entrenchment of exclusive Afrikaner power and became one of the National Party's chief critics As an outside insider or to his critics a snake in the grass Giliomee has an understanding of Afrikaner power that is informed and nuanced He has engaged with members on all sides of South Africa's debates many of whom appear in these pages through vivid and insightful portraits and his outspokenness has hit nerves across the political spectrum The personal journey of this original and courageous thinker will appeal to anyone interested in the complexities of South Africa's past and present

Reconsiderations in Southern African History

Overcoming Intractable Conflicts Miriam F. Elman,, Catherine Gerard,, Galia Golan, Louis Kriesberg, 2019-09-26 Despite considerable progress in research and practice in the constructive transformation of intractable conflicts beginning in the 1970s many terribly destructive conflicts have recently erupted New circumstances have emerged that have resulted in regressions The contributions in this book examine many of the new challenges and obstacles to the transformation of intractable conflicts It also offers an array of new and promising opportunities for constructive transformations The book brings together analyses of U S based conflicts with those from many regions of the world International intra state and local conflicts are explored along with those that have been violent and non violent The diversity in disciplines among the authors provides a wide range of theoretical approaches to explaining how a variety of intractable conflicts can be transformed Case studies of local national and transnational conflicts serve to illustrate this new landscape These analyses are complemented by conceptual discussions relating to new conflict systems actors dynamics and strategies Policy implications of findings are also presented

Losing the Plot Leon de Kock, 2016-09-01 In *Losing the Plot* well known scholar and writer Leon de Kock offers a lively and wide ranging analysis of postapartheid South African writing which he contends has morphed into a far more flexible and multifaceted entity than its predecessor If postapartheid literature s founding moment was the transition to democracy writing over the ensuing years has viewed the Mandelaplan project with increasing doubt Instead authors from all quarters are seen to be reporting in different ways and from divergent points of view on what is perceived to be a pathological public sphere in which the plot the mapping and making of social betterment appears to have been lost The compulsion to detect forensically the actual causes of such loss of direction has resulted in the prominence of creative nonfiction A significant adjunct in the rise of this is the new media which sets up a wounded space within which a cult of commiseration compulsively and repeatedly plays out the facts of the day on people s screens This De Kock argues is reproduced in much postapartheid writing And although fictional forms persist in genres such as crime fiction with their tendency to overplot more serious fiction underplots yielding to the imprint of real conditions to determine the narrative construction

Constructive Conflicts Louis Kriesberg, 2007 Highly regarded by instructors as the most comprehensive and insightful textbook on conflict resolution *Constructive Conflicts* has been significantly revised and updated in this third edition The new edition builds on the strengths of the first two especially its organization around the different stages at which conflicts emerge escalate and resolve Kriesberg s analysis utilizes diverse theoretical perspectives and data and is relevant for strategies that a variety of people can employ to foster the resolution of conflicts

landscape of one man's past *Lost and Found in Johannesburg* is an existential guide to one of the most complex cities on earth Gevisser is unflinching in his account of the complex contradictions that still haunt his country *The New Yorker* Outstanding Mark Gevisser does for Johannesburg what Orhan Pamuk did for Istanbul as intimate and sophisticated a guide as one would wish for to this great troubled metropolis Teju Cole PEN Hemingway Award winning author of *Open City* Brilliantly maps out multiple worlds fractured by race class and history as complex and beautiful as any memoir I've ever read Dinaw Mengestu author of *Someone Like Us* An often moving account of the ways we navigate our emotional and geographical landscapes *Kirkus Reviews*
