Southern African Wildlife, 1989 *World Who Is Who and Does What in Environment and Conservation* Nicholas Polunin, 2013-11-05 Qaidu 1236 1301 one of the great rebels in the history of the Mongol Empire was the grandson of Ogedei the son Genghis Khan had chosen to be his heir This book recounts the dynastic convolutions and power struggle leading up to his rebellion and subsequent events

FCS Sustainable Tourism in SA L2 Clive Duncan, 2008 **African Wild Life**, 1999 Transfrontier Conservation in Africa Maano Ramutsindela, 2007 Transfrontier conservation is a global concept which encompasses the protection of biodiversity spanning the borders of two or more countries in ways that support local economic development international relations and peace Nowhere is this more relevant but highly debatable than in Africa which is home to a third of the world's terrestrial biodiversity while at the same time hosting its poorest nations This is one of the first books to account for the emergence of transfrontier conservation in Africa against international experiences in bioregional planning The roles of the state and local populations are analysed as well as the ecological socio economic and political implications

The Myth of Wild Africa Jonathan S. Adams, Thomas O. McShane, 1996 Africa's wildlife heritage is under siege and its worst enemy may be traditional conservation methods The authors tell of new conservation programs that include more Africans in the planning execution and financial benefits of this multi billion dollar business

Elephant management Robert (Bob) Scholes, Kathleen G

Mennell,2008-03-01 Elephants are among the most magnificent but also most problematic members of South Africa s wildlife population While they are sought after by South African and foreign tourists alike they also have a major impact on their environment As a result elephant management has become a highly complex and often controversial discipline The information needed to underpin vital decisions about elephant management has largely been unavailable to decision makers contested by experts or simply unknown As a result the South African Minister for Environmental Affairs and Tourism convened a round table to advise him on this issue The round table recommended that a scientific assessment of elephant management be undertaken to gather evaluate and present all the relevant information on this topic Its main findings and recommendations are contained in this volume Elephant Management is the first book of its kind combining the work of more than 60 national and international experts Extensively reviewed by policy makers and other stakeholders it is the most systematic and comprehensive review of savanna elephant populations and factors relevant to managing them to date As such it is of interest to a broad spectrum of readers in South Africa and elsewhere Above all it is aimed at helping conservation policy makers and practitioners to choose the best possible options for the sustainable preservation of these iconic animals

Evolution and Innovation in Wildlife Conservation Brian Child,Helen Suich,Spenceley Anna,2012 The crucible of innovation in wildlife and habitat conservation is in southern Africa where it has co evolved with decolonization political transformation and the rise of development ownership management and livelihood debates Charting this innovation early chapters deal with the traditional fines and fences conservation that occurred in the colonial and early post independence period with subsequent sections focussing on the experimentation and innovation that occurred on private and communal land as a result of the break from these traditional methods The final section deals with more recent innovations in the sector focussing on building and strengthening the relationships between parks and society Importantly the book provides a data rich summary of experimentation with more inclusive models of conservation in terms of ecological social political and economic indicators Published with the Southern African Sustainable Use Specialist Group SASUSG of IUCN

African Economic Development Steven Langdon,Archibald R.M. Ritter,Yiagadeesen Samy,2018-03-05 Sub Saharan Africa is at a turning point The barriers to economic growth seen in the 1980 2000 era are disappearing and new optimism is spreading However difficult goals of eliminating poverty achieving equity and overcoming environmental threats continue This much needed and insightful textbook has been written to help us understand this combination of emerging improvements and significant challenges Opening with an analysis of the main theories relating to development in Sub Saharan Africa the book explores all the key issues including Human development Rapid urbanization Structural and gender dimensions Sustainable development and environmental issues and Africa s role in the world economy The authors use economic tools and concepts throughout in a way that makes them accessible to students without an economics background Readers are also aided by a wide range of case studies on the ground examples and statistical information which provide a

detailed analysis of each topic This text is also accompanied by an e resource featuring additional sources for students and instructors African Economic Development is a clear and comprehensive textbook suitable for courses on African economic development development economics African studies and development studies Wild Ways Peter Apps,2014-05-01 Wild Ways brings together all the latest studies of the behaviour of southern Africa s rich and accessible mammal fauna describing not only what mammals do but also the often surprising reasons why they do it and covers species as diverse as fruit bats pangolins lions rats and whales Well established as an invaluable resource for visitors to parks and reserves hikers hunters farmers and outdoor enthusiasts this classic guide has now been thoroughly updated and revised has a fresh lively design and is packed with new and engrossing detail *Cosmopolitan Animals* Kaori Nagai,Caroline Rooney,Donna Landry,Monica Mattfeld,Charlotte Sleight,Karen Jones,2015-08-25 Cosmopolitan Animals asks what new possibilities and permutations of cosmopolitanism can emerge by taking seriously our sharing and becoming with animals It calls for a fresh awareness that animals are important players in cosmopolitics and that worldliness is far from being a human monopoly **The Southern African Environment** Sam Moyo,Michael Sill,2014-06-03 The Southern African Environment provides a comprehensive and up to date description of the countries of the SADC region Angola Botswana Lesotho Malawi Mozambique Namibia Swaziland Tanzania Zambia and Zimbabwe The area is one of rapid political economic and social change and each of the 10 country profiles in this book provides full and detailed information on the physical and human geography environmental problems resource base institutional structures for environmental management and the issues associated with institutional change Each profile was drafted by local environmental experts and is based on extensive fieldwork and research originally commissioned by the Dutch government The report provides a unique synthesis of this richly endowed but troubled region Exploiting the Wilderness Greg L. Warchol,2017-11 Illegally harvested ivory and endangered plants mammals reptiles birds and even insects are easily found for sale throughout East and Southern Africa And this is just one part of the multi billion dollar illegal global trade in wildlife Wildlife is an important and even vital asset for both intrinsic and economic reasons Yet it is illegally exploited on a massive scale to the point where some species now risk extinction Exploiting the Wilderness provides a concise overview of this shameful business describing some of the main species being exploited and examining select wildlife whose survival is imperiled due to heavy pressure from poachers to meet consumer demand Greg Warchol draws on his firsthand experience and research in Africa to examine the structure and operation of the illegal trade in wildlife He identifies the participants as well as their motivations and operations and explains the behavior of poachers traffickers and consumers of illegally obtained goods He concludes with a description of legislative and law enforcement efforts to control and prevent wildlife exploitation along with a number of contemporary conservation initiatives designed to improve the ability of rangers to protect wildlife Handbook of Road Ecology Rodney van der Ree,Daniel J. Smith,Clara Grilo,2015-04-02 Winner of the IENE Project Award 2016 This authoritative volume brings together some of the world s

leading researchers academics practitioners and transportation agency personnel to present the current status of the ecological sustainability of the linear infrastructure primarily road rail and utility easements that dissect and fragment landscapes globally It outlines the potential impacts demonstrates how this infrastructure is being improved and how broad ecological principles are applied to mitigate the impact of road networks on wildlife Research and monitoring is an important aspect of road ecology encompassing all phases of a transportation project This book covers research and monitoring to span the entire project continuum starting with planning and design through construction and into maintenance and management It focuses on impacts and solutions for species groups and specific regions with particular emphasis on the unique challenges facing Asia South America and Africa Other key features Contributions from authors originating from over 25 countries including from all continents Each chapter summarizes important lessons and includes lists of further reading and thoroughly up to date references Highlights principles that address key points relevant to all phases in all road projects Explains best practices based on a number of successful international case studies Chapters are stand alone but they also build upon and complement each other extensive cross referencing directs the reader to relevant material elsewhere in the book Handbook of Road Ecology offers a comprehensive summary of approximately 30 years of global efforts to quantify the impacts of roads and traffic and implement effective mitigation As such it is essential reading for those involved in the planning design assessment and construction of new roads the management and maintenance of existing roads and the modifying or retrofitting of existing roads and problem locations This handbook is an accessible resource for both developed and developing countries including government transportation agencies Government environmental conservation agencies NGOs and road funding and donor organisations
