require the commitment of the United States to guarantee its security Although China is a tempting option Snyder argues that only the United States is both credible and capable in this role South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power and it must balance the contradiction of desirable autonomy and necessary alliance South Korea's Changing Foreign Policy Wonjae Hwang, 2017-02-06 South Korea has experienced new challenges both internally and externally with respect to its foreign policies Internally democratization has changed political terrain for domestic and international politics Democratization and the information revolution have reinvigorated civic life and citizens have become active in expressing very divergent and often polarized views on foreign policies Democratization also promotes South Korean nationalism Rising nationalist sentiments make it difficult for the U S to effectively handle regional security related issues such as the North Korean nuclear program balancing against China and dealing with the potential Sino Japanese conflict Externally globalization has brought significant changes to South Korea s foreign policies Economic dimension and issues rather than security related issues become salient and important For example although security concerns are still dominant in Korean society economic interests necessitate South Korea improve its relations with China and redefine its political position between the U S and China Globalization has also promoted Korea s national interests to reach out to other countries The Korean government has tried to develop new economic partnerships with developing countries for the purpose of securing energy and natural resources and expanding its soft power Economic globalization and democratization have brought about changes in South Korea that raise many interesting questions with respect to foreign policy Has South Korea s rise as an economic power and a democracy changed its relationship with neighboring powers Does economic integration between South Korea and China reshape their relationship How about its impact on U S Korea relations Are geopolitical and security related concerns still the dominant factor in explaining South Korea s foreign policies Does economic integration between Korea and Japan help to reduce tensions or emotional animosities that derive from historical disputes Has South Korea as a growing economic power sought to forge relations with other middle or small powers beyond the confines of its region Overall this book theoretically and empirically explores how democratization and economic globalization have changed domestic politics in South Korea and reshaped its foreign policies

Jaejoon Woo,2022-05-12 South Korea s economic miracle is a well known story However today Korea is confronting a new set of internal and external risks which may foreshadow the next crisis The Korean economy has been struggling with the faltering growth momentum and the rise of unprecedented socio economic problems over recent years well before the pandemic crisis After abrupt downshifts to markedly slower growth in the early 2000s economic growth has continued to decelerate Koreans are grappling with slow income growth all time high household debt high youth unemployment inequality and social polarization Politics is in disarray and is incapable of directing social discourse for the common good Rapid population aging along with the world s lowest fertility rates stokes fears of Japanification Simultaneously disruptive technologies and fast changing business environment such as the rise of China clash with a range of long standing structural problems The contemporary challenges are radically different from those seen in the early stages of industrialization There are multiple risks that threaten to self perpetuate low or stagnant growth over the next decade or so if not an outright financial crisis Motivated by these latest developments this book seeks to provide a timely and in depth analysis of key current issues and foreseeable challenges of the economy with a provocative reassessment of its future Based on extensive new empirical works it examines the underlying causes of the socio economic problems In a constructive spirit it puts in perspective what would constitute critical elements of ideal policy solutions and the direction of the future government s role

Administration has sought to diversify South Korean foreign policy by elevating ASEAN and India to the same strategic level as the United States China Russia and Japan To be sure the latter countries continue to be most significant to the Korean peninsula However this book offers different country and regional perspectives on Seoul s first regional grand strategy to play a role commensurate with its status as a middle power

Developmental Liberalism in South Korea Chang Kyung-Sup, 2019-05-07 This book characterizes South Korea's pre-neoliberal regime of social governance as developmental liberalism and analyzes the turbulent processes and complex outcomes of its neoliberal degeneration since the mid 1990s. Instead of repeating the politically charged critical view on South Korea's failure in socially inclusionary and sustainable development, the author closely examines the systemic interfaces of the economic, political, and social constituents of its developmental transformation. South Korea has turned and remained developmentally liberal rather than liberally liberal like the United States in its economic and sociopolitical configuration of social security, labor protection, population, education, and so forth. Initially conceived in the late 1980s, ironically along its democratic restoration, and radically accelerated during the national financial crisis in the late 1990s, South Korea's neoliberal transition has become incomparably volatile and destructive due crucially to its various distortive effects on the country's developmental liberal order.
