The Malay World of Southeast Asia Patricia Lim Pui Huen, 1986 Over 5 000 entries arranged in four parts Part I comprises reference and general works to provide a guide to information on Southeast Asia Part II provides the setting of space and time Part III features the people and Part IV the many facets of culture and society language ideas beliefs values institutions creative expression and social and cultural change Within each section the arrangement is geographical beginning with Southeast Asia as a whole followed by the various countries in alphabetical order *Southeast Asia* Lennox A. Mills, 1965 **The Changing Face of Southeast Asia** Amry Vandembosch, Richard Butwell, 2021-10-21 Southeast Asia whose alienation might tilt the balance of power in favor of the Communist bloc has become the focus of American foreign policy Amry Vandembosch and Richard Butwell here trace the development of the eight nations which comprise Southeast Asia and appraise their current role in international affairs Although led to adopt state forms similar to those of the departing colonial powers each nation traditionally had quite different political systems It is the authors thesis that their historical patterns of political and social behavior are re emerging and that the chief differences among the national political systems and related ways of life can largely be explained in these terms They feel that the main changes in Southeast Asia in the past two decades reflect the peculiar wedding of such historical considerations and the worldwide forces of democracy communism and economic development Southeast Asia the authors hold can be viewed as a single collective political entity for no country is free from direct or indirect influence from its neighbors and this interaction is increasing in quantity and intensity The pattern of political development the authors assert is much colored by national variations of common occurrences but paradoxically Southeast Asia has never meant more in terms of an interdependent unit historically than it does today Asia ... coordination amongst ASEAN countries in dealing with China or if both these countries gave way for Malaysia to be the first. The book also looks at the policy debates within some ASEAN countries regarding relations with China either conducted officially or unofficially bilaterally or otherwise. This book will be of interest to scholars of Asian Politics, Asian History, International Relations and Foreign Policy.

Developmental Change Allan A. Spitz, 2014-07-15. Developmental change and the related problems of modernization have attracted the attention of scholars in many disciplines. In this bibliography derived and expanded from an earlier compilation by Mr Spitz and Edward Weidner, the author orders and annotates nearly 2 500 articles appearing between 1945 and 1969 in 234 journals from 25 countries. Organized by subject and indexed by both author and journal, the citations include studies of social problems, economic factors, political questions, public administration and international cooperation and assistance. Special emphasis has been given to new and little known sources. In addition, a selected bibliography of monographs and book-length studies dealing with the modernization of underdeveloped countries and areas is included in the volume.

Emerging Global Cities Alejandro Portes, Ariel C. Armony, 2022-12-27. Certain cities, most famously New York, London and Tokyo, have been identified as global cities whose function in the world economy transcends national borders. Without the same fanfare formerly peripheral and secondary cities have been growing in importance, emerging as global cities in their own right. The striking similarity of the skylines of Dubai, Miami and Singapore is no coincidence despite following different historical paths; all three have achieved newfound prominence through parallel trends. In this groundbreaking book, Alejandro Portes and Ariel C. Armony demonstrate how the rapid and unexpected rise of these three cities recasts global urban studies. They identify the constellation of factors that allow certain urban places to become emerging global cities: centers of commerce, finance, art and culture for entire regions. The book traces the transformations of Dubai, Miami and Singapore, identifying key features common to these emerging global cities. It contrasts them with global hopeful cities that at one point or another aspired to become global and analyzes how Hong Kong is threatened with the loss of this status. Portes and Armony highlight the importance of climate change to the prospects of emerging global cities, showing how the same economic system that propelled their rise now imperils their future. *Emerging Global Cities* provides a powerful new framework for understanding the role of peripheral cities in the world economy and how they compete for and sometimes achieve global standing.

The Wheel of Death Philip Kapleau, 2013-05-13. Originally published in 1972, this anthology examines death through the eyes of great Buddhist, Taoist, Hindu and Western masters. Instructions and specific rites are set forth to enable people to guide the mind of the dying through death and the intermediate stage which follows. The sections on Rebirth and Karma deal succinctly with these complex and often misunderstood doctrines.
