## **Southern Africa's Mammals A Field Guide:**

**Stuart's Field Guide to Mammals of Southern Africa** Chris Stuart, Mathilde Stuart, 2015-03-27 Greater southern Africa has a wealth of mammal species almost 400 all of which are covered in this fully updated comprehensive field guide. Now expanded to include species found in Angola, Zambia and Malawi, it has also been extensively revised to include the most recent research and taxonomy, revised distribution maps and many new images, colour-coded grouping of families, spoor and size icons, skull photographs grouped for easy comparison, detailed descriptions of each species offering insight into key identification characters, typical behaviour, preferred habitat, food choice, reproduction and longevity. **Stuart's Field**

**Guide Mammals of Southern Africa (including Angola, Zambia and Malawi)** Chris Stuart, Mathilde Stuart, 2025-10-30 Southern Africa has about 530 mammal species ranging from little shrews and bats to elephant, lion and rhino. The region is also home to many marine species: seals, dolphins and whales that inhabit both coastal and deeper waters. Now updated to reflect the latest taxonomic findings, *Field Guide to Mammals of Southern Africa* will help with the identification of the iconic larger animals as well as the often bewildering array of smaller species. The detailed descriptions of each species offer insight into key identification characters, typical behaviour, preferred habitat, food choice, reproduction and longevity. Full colour images and revised distribution maps complement the species accounts. *Field Guide to Mammals of Southern Africa* Chris

Stuart, Tilde Stuart, 2007 Southern Africa has a wealth of mammal species, a total of 337 all of which are covered in this fully revised comprehensive field guide. While the term African mammals conjures up the more celebrated species of elephant, lion, buffalo, leopard and rhino, it is in fact the smaller animals: shrews, genets, suricates and bats that comprise the bulk of the region's mammal species. And often overlooked but included here too is the diversity of marine mammals: seals, whales and dolphins that are found in our oceans. This new edition of *Field Guide to Mammals of Southern Africa* has been extensively revised to include the most recent research in line with new findings and new taxonomy. Up-to-date information, revised distribution maps and new images where available have been combined in a modern full colour layout. Color coding has been introduced according to family groupings and spoor and size icons are included for quick reference with each mammal entry. Another new feature is the inclusion of skulls grouped at the back of the book for easy comparison. In addition to detailed descriptions of each species, the text offers insight into key identification characters, typical behavior, preferred habitat, food choice and reproduction. *The Mammals of the Southern African Sub-region* J. D. Skinner, Christian T.

Chimimba, 2005-11-15 This third extensively revised edition of *The Mammals of the Southern African Subregion* contains detailed descriptions of all mammals that occur naturally on the African mainland south of the Cunene and Zambezi rivers together with all mammals indigenous to the subregion's coastal waters. The rapid accumulation of new information resulting from mammal research in southern Africa together with radical taxonomic changes across all levels of mammalian classification have necessitated this new edition which presents the best and latest data accurately in one comprehensive

volume for use not only by scientists but also by an increasingly wide audience of general readers with an interest in the natural history of southern Africa J D Skinner and C T Chimimba have revised expanded and updated the text in a major project overseen by an editorial committee constituted by the Mammal Research Institute at the University of Pretoria Specialists on each mammalian order have served as subeditors and a range of independent and internationally recognised authorities have reviewed every species description In this edition all the distribution maps and many of the illustrations of mammal prints have been updated and redrawn several new colour plates have been added and the whole design of this definitive reference work has been enhanced to ensure easy access to information
