Writing Southern Politics Robert P. Steed, Laurence W. Moreland, 2014-10-17 Scholars, journalists, writers, and pundits have long regarded the South as the nation's most politically distinctive region. Its culture, history, and social and economic institutions have fostered unique political ideas that intrigue observers and have had profound political consequences for the nation's citizens, politicians, and policymakers. *Writing Southern Politics* is the most comprehensive review of the large body of post-World War II literature on southern politics. Since the publication of V. O. Key Jr.'s landmark work *Southern Politics in State and Nation* (1949), scholars have produced an astounding number of books, monographs, professional journal articles, and research papers addressing elements of continuity and change in southern politics. The contributors to this book sort through the literature, identifying major themes, examining areas of scholarly disagreement, and making the key dimensions and contours of the region's politics understandable. Individually, the essays in this volume identify and clarify the key writing and research in selected subfields of southern politics, including religion, race, women, and political parties. Collectively, the essays identify and discuss the major components of and trends in southern politics over the past half century. The contributors, some of the foremost scholars in the field, have been heavily involved in researching and writing about southern politics during the past three decades and have observed the development of many of the research projects that form the foundation of southern political literature. In many instances, their own writings are included in the body of literature they discuss, bringing unique skills, research, and perspectives to their original essays. In addition to reviewing existing literature, *Writing Southern Politics* also includes suggestions for a future research agenda. Not all aspects of the region's dramatic fifty-year transformation have been fully explored, and the continuation of this development ensures new avenues to examine. The discussion of past research and writing is an invaluable tool for understanding the trends in southern politics over the past half century. By examining these trends and developing an agenda for future research, the authors provide a roadmap for identifying the changes that will likely shape the region over the next half century.

Congress at the Grassroots Richard F. Fenno Jr., 2003-06-19 However much politicians are demeaned and denounced in modern American society, our democracy could not work without them. For this reason, says Richard Fenno, their activities warrant our attention. In his pioneering book *Home Style*, Fenno demonstrated that a close look at politicians at work in their districts can tell us a great deal about the process of representation. Here Fenno employs a similarly revealing grassroots approach to explore how patterns of representation have changed in recent decades. Fenno focuses on two members of the U.S. House of Representatives who represented the same west-central Georgia district at different times: Jack Flynt, who served from the 1950s to the 1970s, and Mac Collins, who has held the seat in the 1990s. His on-the-scene observation of their differing representational styles: Flynt focuses on people, Collins on policy, reveals the ways in which

social and demographic changes inspire shifts in representational strategies More than a study of representational change in one district Congress at the Grassroots also helps illuminate the larger subject of political change in the South and in the nation as a whole *A Biographical Congressional Directory* United States.
