hardly do to pass over the features of this new civilization for these are quite as unique in their way as are the natural features of the land Southern California has in a few years changed as no other part of the world has ever changed and the transition is one not of degree but of kind Though limited it seems boundless within those limits and increases in geometrical progression as the years go on About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
