

AN INTRODUCTION TO THE STUDY OF
**SOUTHWESTERN
ARCHAEOLOGY**

ALFRED VINCENT KIDDER

Southwestern Archaeology

Robert Hill Lister, Florence Cline Lister

Southwestern Archaeology:

An Introduction to the Study of Southwestern Archaeology Alfred Vincent Kidder, 2000-01-01 Alfred Vincent Kidder's Introduction to the Study of Southwestern Archaeology was the first regional synthesis and summary of Pueblo archaeology. It is a guide to historic and prehistoric sites of the Southwest as well as a preliminary account of Kidder's exemplary excavation at Pecos.

A Study of Southwestern Archaeology Stephen H. Lekson, 2018 In this volume Steve Lekson argues that for over a century southwestern archaeology got the history of the ancient Southwest wrong. Instead, he advocates an entirely new approach, one that separates archaeological thought in the Southwest from its anthropological home and moves to more historical ways of thinking. Focusing on the enigmatic monumental center at Chaco Canyon, the book provides a historical analysis of how Southwest archaeology confined itself, how it can break out of those confines, and how it can proceed into the future. Lekson suggests that much of what we believe about the ancient Southwest should be radically revised. Looking past old preconceptions brings a different Chaco Canyon into view. More than an eleventh-century Pueblo ritual center, Chaco was a political capital with nobles and commoners, a regional economy, and deep connections to Mesoamerica. By getting the history right, a very different science of the ancient Southwest becomes possible, and archaeology can be reinvented as a very different discipline. Provided by publisher.

Earl Morris & Southwestern Archaeology Florence Cline Lister, Robert Hill Lister, 1993 Reprint edition of this important look at the life and times of one of the true pioneers of Southwest archaeology. Includes a new preface by Florence C. Lister. Historical photos. Includes index.

Living Histories Chip Colwell-Chanthaphonh, 2010-11-16 This book is about the tangled relationship between Native peoples and archaeologists in the American Southwest. Even as this relationship has become increasingly significant for both real-world archaeological practice and studies in the history of anthropology, no other single book has synthetically examined how Native Americans have shaped archaeological practice in the Southwest and how archaeological practice has shaped Native American communities. From oral traditions to repatriations to disputes over sacred sites, the next generation of archaeologists, as much as the current generation, needs to grapple with the complex social and political history of the Southwest's Indigenous communities, the values and interests those communities have in their own cultural legacies, and how archaeological science has impacted and continues to impact Indian country.

Behind Painted Walls Florence Cline Lister, 2000 An anecdotal history of a formative period in Southwestern archaeology that involved the discovery and preservation of kiva murals in five important ancestral Pueblo settlements.

Ruins and Rivals James E. Snead, 2022-02-08 Published in cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University. Ruins are as central to the image of the American Southwest as are its mountains and deserts, and antiquity is a key element of modern southwestern heritage. Yet prior to the mid-nineteenth century, this rich legacy was largely unknown to the outside world. While military expeditions first brought word of enigmatic relics to the eastern United States, the new intellectual frontier

was seized by archaeologists who used the results of their southwestern explorations to build a foundation for the scientific study of the American past. In *Ruins and Rivals*, James Snead helps us understand the historical development of archaeology in the Southwest from the 1890s to the 1920s and its relationship with the popular conception of the region. He examines two major research traditions: expeditions dispatched from the major eastern museums and those supported by archaeological societies based in the Southwest itself. By comparing the projects of New York's American Museum of Natural History with those of the Southwest Museum in Los Angeles and the Santa Fe-based School of American Archaeology, he illustrates the way that competition for status and prestige shaped the way that archaeological remains were explored and interpreted. The decades-long competition between institutions and their advocates ultimately created an agenda for Southwest archaeology that has survived into modern times. Snead takes us back to the days when the field was populated by relic hunters and eastern museum men who formed uneasy alliances among themselves and with western boosters who used archaeology to advance their own causes. Richard Wetherill, Frederic Ward Putnam, Charles Lummi, and other colorful characters all promoted their own archaeological endeavors before an audience that included wealthy patrons, museum administrators, and other cultural figures. The resulting competition between scholarly and public interests shifted among museum halls, legislative chambers, and the drawing rooms of Victorian America but always returned to the enigmatic ruins of Chaco Canyon, Bandelier, and Mesa Verde. *Ruins and Rivals* contains a wealth of anecdotal material that conveys the flavor of digs and discoveries, scholars and scoundrels, tracing the origins of everything from national monuments to Santa Fe Style. It rekindles the excitement of discovery, illustrating the role that archaeology played in creating the southwestern past and how that image of antiquity continues to exert its influence today.

Traditions, Transitions, and Technologies

Sarah Schlanger, 2002. *Traditions, Transitions, and Technologies* offers diverse perspectives on the state of Southwestern archaeology at the end of the twentieth century, linking the legacies of the past to present trends by placing current research into historical context. Organized around classic themes central to the history of the discipline, this volume explores important new research avenues for understanding the connections between historic Pueblo communities and their distant ancestors, the origins of farming traditions, and the development of the Southwest's distinctive tools and technologies. Providing a unique overview of past and present work in this important region, *Traditions, Transitions, and Technologies* will be of interest to all doing archaeological research in the Southwestern United States.

Those who Came Before

Robert Hill Lister, Florence Cline Lister, 1983. The arid American Southwest rightfully boasts of more natural and manmade attractions than any comparable part of the New World. High among its many wondrous features is the treasury of ruins, mute testimony that many people before us found a bountiful haven in the land's embrace. The spirits lingering in the abandoned hunting camps and in the villages and towns of the more developed agricultural people have an eloquence of their own if we will only listen.

The Archaeology of Art in the American Southwest

Marit K. Munson, 2011-04-16. Archaeologists seldom study

ancient art even though art is fundamental to the human experience The Archaeology of Art in the American Southwest argues that archaeologists should study ancient artifacts as artwork as applying the term art to the past raises new questions about artists audiences and the works of art themselves Munson proposes that studies of ancient artwork be based on standard archaeological approaches to material culture framed by theoretical insights of disciplines such as art history visual studies and psychology Using examples drawn from the American Southwest The Archaeology of Art in the American Southwest discusses artistic practice in ancestral Pueblo and Mimbres ceramics and the implications of context and accessibility for the audiences of painted murals and rock art Studies of Hohokam figurines and rock art illustrate methods for studying ancient images while the aesthetics of ancient art are suggested by work on ceramics and kivas from Chaco Canyon This book will be of interest to archaeologists working in the Southwest who want to broaden their perspective on the past It will also appeal to archaeologists in other parts of the world and to anthropologists art historians and those who are intrigued by the material world aesthetics and the visual

Pushing Boundaries in Southwestern Archaeology Stephen E. Nash, Erin L. Baxter, 2023-04-07 Pushing Boundaries in Southwestern Archaeology draws together the proceedings from the sixteenth biennial Southwest Symposium In exploring the conference theme contributors consider topics ranging from the resuscitation of archaeomagnetic dating to the issue of Athapaskan origins from collections based studies of social identity foodways and obsidian trade to the origins of a rock art tradition and the challenges of a deeply buried archaeological record The first of the volume s four sections examines the status history and prospects of Bears Ears National Monument the broader regulatory and political boundaries that complicate the nature and integrity of the archaeological record and the cultural contexts and legal stakes of archaeological inquiry The second section focuses on

chronological big data in the context of pre Columbian history and the potential and limits of what can be empirically derived from chronometric analysis of the past The chapters in the third section advocate for advancing collections based research focusing on the vast and often untapped research potential of archives previously excavated museum collections and legacy data The final section examines the permeable boundaries involved in Plains Pueblo interactions obvious in the archaeological record but long in need of analysis interpretation and explanation Contributors James R Allison Erin Baxter Benjamin A Bellorado Katelyn J Bishop Eric Blinman J Royce Cox J Andrew Darling Kaitlyn E Davis William H Doelle B Sunday Eiselt Leigh Anne Ellison Josh Ewing Samantha G Fladd Gary M Feinman Jeffrey R Ferguson Severin Fowles Willie Grayeyes Matthew Guebard Saul L Hedquist Greg Hodgins Lucas Hoedl John W Ives Nicholas Kessler Terry Knight Michael W Lindeman Hannah V Mattson Myles R Miller Lindsay Montgomery Stephen E Nash Sarah Oas Jill Onken Scott G Ortman Danielle J Riebe John Ruple Will G Russell Octavius Seowtewa Deni J Seymour James M Vint Adam S Watson *Living Histories* John Stephen Colwell, 2010-11-16 This book is about the tangled relationship between Native peoples and archaeologists in the American Southwest Even as this relationship has become increasingly significant for both real world archaeological practice and studies in the history of anthropology no other single book has synthetically examined how Native Americans have shaped archaeological practice in the Southwest and how archaeological practice has shaped Native American communities From oral traditions to repatriations to disputes over sacred sites the next generation of archaeologists as much as the current generation needs to grapple with the complex social and political history of the Southwest s Indigenous communities the values and interests those communities have in their own cultural legacies and how archaeological science has impacted and continues to impact Indian country *A History of the Ancient Southwest* Stephen H.
