Sovereignty, Democracy, and Global Civil Society Elisabeth Jay Friedman, Kathryn Hochstetler, Ann Marie Clark, 2012-02-01 Sovereignty Democracy and Global Civil Society explores the growing power of nongovernmental organizations NGOs by analyzing a microcosm of contemporary global state society relations at UN World Conferences The intense interactions between states and NGOs at conferences on the environment human rights women s issues and other topics confirm the emergence of a new transnational democratic sphere of activity Employing both regional and global case studies the book charts noticeable growth in the ability of NGOs to build networks among themselves and effect change within UN processes Using a multidimensional understanding of state sovereignty the authors find that states use sovereignty to shelter not only material interests but also cultural identity in the face of external pressure This book is unique in its analysis of NGO activities at the international level as well as the complexity of nation states responses to their new companions in global governance

The United Nations and Civil Society Nora McKeon, 2013-07-04 The UN is able to recognize key global challenges but beset by difficulties in trying to resolve them In this it represents the current global political balance but is also the only international institution that could move it forward Civil society can be a catalyst for this kind of change In this book Nora McKeon provides a comprehensive analysis of UN engagement with civil society The book pays particular attention to food and agriculture which now lie at the heart of global governance issues McKeon shows that politically meaningful space for civil society can be introduced into UN policy dialogue The United Nations and Civil Society also makes the case that it is only by engaging with organizations which legitimately speak for the poor targeted by the Millennium Development Goals that the UN can promote equitable sustainable development and build global democracy from the ground up This book has strong ramifications for global governance civil society and the contemporary debate over the future of food

The Prevention and Intervention of Genocide Samuel Totten, 2008 Over the last twenty years the world has witnessed four major genocides There was the genocide in Iraq 1988 in Rwanda 1994 in Srebrenica 1995 and in Darfur 2003 and continuing Most observers agree there is an urgent need to assess the international community s efforts to prevent genocide and to intervene once a genocide is under way in an effective and timely manner This volume the latest in a widely respected series on the subject of genocide provides an overview of a host of issues germane to this task The book begins with a cogent discussion of the issues of prevention and intervention during the Cold War years The second chapter discusses the abject failures and moderate though in some cases highly controversial successes at prevention and intervention carried out in the 1990s and early 2000s Further chapters examine latest efforts to develop an effective genocide early warning system and examine the complexity of and barriers to prevention The pros and cons of sanctions and the problems of

enforcement and evaluation their effectiveness are then discussed Conflicts between state sovereignty and the protection of threatened populations are examined both in historical context and by incorporating the latest thinking Later chapters treat the issue of intervention why and how it has met with only limited success Concentrating on Rwanda and Srebrenica chapter 8 discusses various peace operations that were abject failures and those that were moderately successful The concept of an anti genocide regime is examined in terms of progress in developing such a regime as well as what the international community must do in order to implement it Chapters discuss key issues related to post genocidal periods those that need to be addressed in order to establish stability in a wounded land and populace as well as to prevent future genocides The final chapter asks whether bringing perpetrators to justice has any impact in breaking impunity ensuring deterrence and bringing about reconciliation The contributors to the volume are all noted scholars some of whom specialize in the study of genocide and others who specialize in such areas as early warning peacekeeping and sanctions

Genocide, Ethnonationalism, and the United Nations Hannibal Travis, 2013-01-17 Genocide Ethnonationalism and the United Nations examines a series of related crises in human civilization growing out of conflicts between powerful states or empires and indigenous or stateless peoples This is the first book to attempt to explore the causes of genocide and other mass killing by a detailed exploration of UN archives covering the period spanning from 1945 through 2011 Hannibal Travis argues that large states and empires disproportionately committed or facilitated genocide and other mass killings between 1945 and 2011 His research incorporates data concerning factors linked to the scale of mass killing and recent findings in human rights political science and legal theory Turning to potential solutions he argues that the concept of genocide imagines a future system of global governance under which the nation state itself is made subject to law The United Nations however has deflected the possibility of such a cosmopolitical law It selectively condemns genocide and has established an institutional structure that denies most peoples subjected to genocide of a realistic possibility of global justice lacks a robust international criminal tribunal or UN army and even encourages security cooperation among states that have proven to be destructive of peoples in the past Questions raised include What have been the causes of mass killing during the period since the United Nations Charter entered into force in 1945 How does mass killing spread across international borders and what is the role of resource wealth the arms trade and external interference in this process Have the United Nations or the International Criminal Court faced up to the problem of genocide and other forms of mass killing as is their mandate

Global Governance and NGO Participation Charlotte Dany, 2013 This book explores the limits of NGO influence and the conditions that constrain NGOs when they participate in international negotiations Through an empirically rich study of the UN World

Summits on the Information Society WSIS this book conceptualizes structural power mechanisms that shape global ICT governance and analyses the impact of NGOs on communication rights intellectual property rights financing and Internet governance The institutional framework of UN negotiations makes it easy for states to exclude NGOs from crucial meetings and to neglect their most relevant demands in part explaining why NGOs had only limited influence on the policy outcomes of the WSIS in Geneva 2003 and Tunis 2005 although high numbers of NGOs participated Using a critical perspective Dany demonstrates that despite the far reaching participation rights for civil society actors structural power mechanisms continued to limit the influence of participating NGOs and this contradicts the widely held assumption that extensive NGO participation necessarily increases NGO influence on the policy outcomes This book will be of interest to students and scholars of international relations global governance the United Nations and global information and communication politics

Non state actors such as international environmental organisations business associations and indigenous peoples organisations increasingly take on governance functions that can influence the delivery of global public goods This thesis examines the roles of these actors in the field of global climate change governance Specifically the thesis examines why and how non state actors are involved in global climate change governance the governance activities that they may perform and are perceived to perform and their views on climate change solutions The thesis also discusses the implications of their roles for how authority is shared between states and non state actors in global climate change governance The research questions are addressed by triangulating several empirical methods The results show that the roles of non state actors are continuously evolving and depend on the changing nature of relations between state and non state actors as well as efforts by non state actors to expand their policy space by justifying and seeking recognition for their participation Moreover the findings point to the importance of differentiating between groups of non state actors as they represent diverse interests and have different comparative advantages across governance activities Which non state actors participate and to what extent therefore has implications for the effects of their involvement in global climate change governance On the basis of a systematic assessment of a set of non state actors this thesis concludes that the key role categories of non state actors in global climate change governance are broadly shapers of information and ideas brokers of knowledge norms and initiatives and doers of implementing policies and influencing behaviours Different non state actors carry out activities within these role categories to different extents In addition to the empirical mapping of the roles of non state actors in global climate change governance this thesis contributes to two strands in the literature one theoretical focusing on the authority and legitimacy of non state actors in global environmental governance and the other methodological offering a toolbox that combines survey data with qualitative methods

Icke statliga aktörer exempelvis internationella miljöorganisationer ningslivsorganisationer och ursprungsbefolkningsorganisationer fyller alltmer framträdande funktioner i den globala klimatstyrningen Dessa organisationer kan bidra till utformningen av globala kollektiva nyttigheter Denna avhandling undersöker dessa aktörers roller inom den globala klimatstyrningen Avhandlingen utforskar varför och på vilket sätt icke statliga aktörer deltar i den globala klimatstyrningen uppfattningar om vilka styraktiviteter de utför och ifall de bidrar till en mer pluralistisk syn på klimatproblematikens lösningar I avhandlingen diskuteras vilka konsekvenser de icke statliga aktörernas roller har för hur auktoritet delas mellan stater och icke statliga aktörer i den globala klimatpolitiken Forskningsfrågorna behandlas genom att triangulera flera empiriska metoder Resultaten från dessa undersökningar visar att de icke statliga aktörernas roller utvecklas kontinuerligt och att dynamiken dels beror på den skiftande relationen mellan statliga och icke statliga aktörer dels på de icke statliga aktörernas egna ansträngningar att påverka sitt politiska

handlingsutrymme och för erkännande för sitt deltagande Dessutom pekar resultaten på vikten av att skilja mellan olika grupper av icke statliga aktörer eftersom de representerar skilda intressen och har komparativa fördelar i olika styraktiviteter En konsekvens av detta är att det spelar roll vilka grupper av icke statliga aktörer som ges tillträde till den internationella klimatdiplomatin Baserat på en systematisk bedömning av vad i synnerhet av de icke statliga aktörerna anses göra dras slutsatsen att de viktigaste rollkategorierna som icke statliga aktörer har är förmedling av information och identifiering av kunskap normer och initiativ och gärna genom att bidra till implementering och påverka beteenden men att olika icke statliga aktörer utför dessa roller i olika utsträckning Utöver den empiriska kartläggningen av icke statliga aktörers roller i den globala klimatstyrningen bidrar avhandlingen dels till den teoretiska litteraturen kring icke statliga aktörers auktoritet och legitimitet inom den globala miljöstyrningen dels metodologiskt genom att utveckla analysverktyg som kombinerar enkelt data med kvalitativa metoder

Do International Corruption Metrics Matter? Omar E. Hawthorne, 2015-10-08 Corruption often seen as the main hindrance to development and growth in many societies has led to greater demand for accountability and transparency in how governments conduct their businesses This text examines the impact of Transparency International's Corruption Perceptions Index and whether or not the CPI and hence TI matter It explores three areas the world's political and economic responses and Jamaica's policy responses to the CPI Jamaica is selected for a case study due to its high CPI rating from TI Jamaica is a country that has strong anti corruption laws but nonetheless sees its CPI ranking worsen almost yearly Taking into consideration the importance scholars and policymakers give to corruption's effect on development the findings show that the CPI the most cited corruption index does not change the behavior of world's political and economic policymakers Although the index is published yearly there is no measured change as it regards political and economic policymakers Nonetheless Jamaican policymakers pay significant attention to their performance on TI's CPI Transparency International's CPI is used as the authoritative tool to assess countries corruption perceptions scores by both international governments and several international agencies The use and reference of TI's CPI does not translate as the main factor in regards to the increase and or decrease of aid flow Surprisingly there was no evidence that the CPI affected the credit rating and or investment flow into Jamaica It did indicate however that TI's CPI is reflective of the global market perceptions of Jamaica's economy Research shows that the index does change policy responses in Jamaica as government officials across varying agencies pay attention to the index and the progression and or worsening of the country's score

Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence

the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts. The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based. Within particular societies, human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals, 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government. These rights commonly include the right to life, the right to an adequate standard of living, the prohibition of genocide, freedom from torture and other mistreatment, freedom of expression, freedom of movement, the right to self-determination, the right to education and the right to participation in cultural and political life. These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments. This new book brings together the latest book literature centred on this crucial topic.
