Soviet And East European Law And The Scientific Technical Revolution:

Soviet and East European Law and the Scientific-Technical Revolution Gordon B. Smith, Peter B. Maggs, George Ginsburgs, 2013-10-22 Soviet and East European Law and the Scientific Technical Revolution discusses the various perceptions and understandings of the scientific technical revolution STR and its effect on the legal systems of the USSR and the East European nations This book is composed 11 chapters and begins with a description of the relationship of the STR and law and how law is used as a means of manipulating the STR and directing its development The succeeding chapters explore the STR in the realm of ideas or doctrine relating to management theory and jurisprudence These topics are followed by discussions of the constitutional enactments influenced by the STR and the developments of administrative and labor laws The remaining chapters highlight the tangible results of efforts to shape the STR These chapters also look into the development of mechanisms for the transfer of technology between the Soviet Union and the Eastern Europe This book is intended for historians and the general public who are interested in scientific technical revolution Soviet and East

European Law and the Scientific-technical Revolution Gordon B. Smith, Peter B. Maggs, George Ginsburgs, 1981 **Soviet and East European Law and the Scientific-technical Revolution**, 1980* **The Communist Party and Soviet Science** Stephen Fortescue, 1986-06-18 **The Soviet-Eastern European Research and Training Act of 1983** United States. Congress. House. Committee on Education and Labor. Subcommittee on Postsecondary Education, 1983 **Law And Economic Development In The Soviet Union** Peter B. Maggs, 2019-03-04 In the past Soviet policymakers planners and jurists in their enthusiasm for economic and technological development devoted little attention to the often negative consequences of modernization New concerns however have become apparent in recent literature statutes and decrees In this book political scientists and experts on Soviet law address many of those concerns analyzing the legal issues associated with economic modernization in the USSR The central themes of the book are the increasingly centralized nature of the policymaking process in the USSR and Eastern Europe and the marked tendency to rely on law as a principal mechanism for managing the undesirable consequences of scientific and technological progress The authors also assess the impact of the scientific technical revolution on Soviet East European relations and East West relations emphasizing the foreign policy consequences of increased financial and technological interdependence The study does not deal with narrow legalistic issues of technical progress rather its focus on policy questions reflects the inclination of Soviet and Eastern European governments to view those questions in terms of law and legislative activity and to see law as an instrument of social engineering

Comecon J. J. Brine, 1992 Comecon or the Council for Mutual Economic Assistance was founded by Joseph Stalin in 1949 to counteract the Marshall Plan and reinforce the bonds between the Soviet Union and the people's democracies of Eastern Europe Other Soviet Bloc nations later joined Comecon and for forty years it dominated the trade policies of the Soviet Bloc and profoundly influenced their domestic economic development and relations with the West Comecon collapsed in 1991

after the countries of Eastern Europe rejected communism It was often compared with the West European Common Market but differed vastly in its aims structure powers and activities Its influence is a critical factor in assessing both the economic failures of the Soviet Bloc and the problems facing former member states as they make the transition to free market economies This detailed annotated bibliography is an essential guide to the extensive English language literature about Comecon from its founding until its demise Chapters cover Comecon s history structure and law socialist economic integration the organization s arrangements for international trade and finance environment natural resources and energy labor industry and agriculture science and technology Comecon like the rest of the Soviet Bloc collapsed suddenly but its legacy will color international relations and worldwide economic issues for years to come An understanding of its institutions mechanisms and policies remains vital hi appreciating the economic organization of the former Soviet empire This bibliography will therefore be indispensable to policymakers economists historians and political scientists *East Europe (Albania, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, Rumania, Yugoslavia) ,1964*

The Making of Intellectual Property Law in Vietnam Tran Kien,2025-09-03 This book is about the making of intellectual property law in Vietnam across colonial and socialist space and time from 1864 to 1994 It provides a completely new provoking narrative disproving previously published scholarship which claimed that there was no intellectual property law in Vietnam during the colonial and socialist periods In doing so the book engages with an emerging field of historiographical inquiry into the intellectual property law history in Vietnam and worldwide which investigates how and why the scholarship about the history of intellectual property law has been construed and framed as such within a specific period and space This book is comprised of three knowledge components The first involves the reconstruction of the lost intellectual property law from 1864 to 1994 in Vietnam doctrinally Relying on newly discovered archives in Vietnam and worldwide it unravels a corpus of statutory and regulatory provisions and interesting at times contradictory juridical decisions that governed and interpreted copyright patent and trademark The second is the historiographical inquiry of the making of the intellectual property law history scholarship in Vietnam This will answer the questions of how and why the particular histories had been construed and framed as such at a particular time This involves the debate about sociopolitical ideologies underlying the meaning and application of the laws most notably colonialism and socialism Finally the third engages with the theory of legal transplantation It addresses a hypothetical question of colonial laboratory as a form of legal transplantation a new concept that this book offers to the global scholarship It demonstrates that the colonial empire had tried to use Vietnam as a laboratory for its legal reform and then transplanted the successful and feasible results back to the empire This book explains the distinctively ideological principles underlying the understanding and application of the law *The Journal of the Rutgers University Library ,1985*
