

# NEW INFRASTRUCTURE'S TRANSFORMATIVE IMPACT ON POST-SOVIET ENERGY MARKETS

In the 30 years since the Soviet Union collapsed, Russia and its neighbors have developed major new production and export projects. Several Western majors joined production sharing agreements in the 1990s, and new pipelines have strengthened crude and gas export capacity to Europe, as well as new markets in Asia.

**Neil Robinson**

## **Soviet Energy System Resource Use And Policies:**

**Energy in Soviet Policy** ,1981      **The Soviet Energy System** Leslie Dienes,Theodore Shabad,1979 Analyses energy needs and policies within the Soviet Union      Energy Abstracts for Policy Analysis ,1988      **World Petroleum Resources And Reserves** Joseph Riva,2019-04-25 This book describes and analyzes the geological basis for the current world petroleum situation It explains the formation and accumulation of conventional and unconventional oil and gas and the methods used by geologists in the search for petroleum and petroleum containing basins      Export Pipelines from the CIS Region Andreas,2014-04-15 This timely collection offers fresh perspectives to the analysis of the New Great Game the fight for access to the Caspian Sea region s energy resources To date the export of the Caspian crude oil and natural gas has only been assessed geopolitically which oversimplifies the political dynamics of the region and neglects to acknowledge the Caspian countries as actors in their own right      **Industrial Decision-making and High-risk Technology** Charles K. Dodd,1994 Geographer Dodd examines the process of forming policy concerning the siting of commercial nuclear power plants in the Soviet Union and how and why it has changed over the years He analyzes which societal groups influenced siting policy and of those which worked through established institutions and which did not and how all of that may affect the future of the industry He also compares the experience with that in capitalist countries Annotation copyright by Book News Inc Portland OR      *The New Geopolitics of Natural Gas* Agnia Grigas,2017-04-24 As the United States aggressively expands its exports of liquefied natural gas it stands poised to become an energy superpower This unanticipated reality is rewriting the conventional rules of intercontinental gas trade and realigning strategic relations among the United States the European Union Russia China and beyond as Agnia Grigas shows      **The Routledge Research Companion to Energy Geographies** Stefan Bouzarovski,Martin J Pasqualetti,Vanesa Castán Broto,2017-07-06 Energy has become a central concern of many strands of geographical inquiry from global climate change to the effects of energy decisions on our lives However many aspects of the black box of relationships at the energy society interface remain unopened especially in terms of the spatial underpinnings of energy production and consumption within nations cities and regions Debates focusing on the location and nature of energy flows frequently fail to consider the multiple geographical networks that illustrate and explain the distribution of fuels and services around the world Providing an integrated perspective on the complex interdependencies between energy and geography The Routledge Research Companion to Energy Geographies offers a timely conceptual framework to study the multiple facets of energy geography including security space and place planning environmental science economics and political science Illustrating how a geographic approach towards energy can aid decision making pathways in the domains of social justice and environment this book provides insights that will help move the international community toward greater cooperation stability and sustainability      **International Dimensions Of The Environmental Crisis** Richard N Barrett,2021-11-28 This volume is a collection of seventeen essays offering in depth and comparative

studies of areas faced with environmental crisis Arranged in five sections that include practical and philosophical problems Latin America Europe Asia and Africa With focus on the problems faced in the Sahara Desert the Amazon the Punjab and a comparative study of Ethiopia and Nigeria highlighting the seriousness of certain environmental trends and the action of governments

**Russian Transformations** Leo McCann,2004-07-31 The transition of Russia to a developed market economy has been slower more contradictory and less predictable than expected This book examines contemporary Russian socio economic development and explores the degree to which Russian experiences can be incorporated into current social science theories In particular it questions how far the concept of globalization is applicable to the situation in Russia

**The Depths of Russia** Douglas Rogers,2015-11-23 Russia is among the world s leading oil producers sitting atop the planet s eighth largest reserves Like other oil producing nations it has been profoundly transformed by the oil industry In *The Depths of Russia* Douglas Rogers offers a nuanced and multifaceted analysis of oil s place in Soviet and Russian life based on ethnographic fieldwork and archival research in the Perm region of the Urals Moving beyond models of oil calibrated to capitalist centers and postcolonial petrostates Rogers traces the distinctive contours of the socialist and then postsocialist oil complex showing how oil has figured in the making and remaking of space and time state and corporation exchange and money and past and present He pays special attention to the material properties and transformations of oil from depth in subsoil deposits to toxicity in refining and to the ways oil has echoed through a range of cultural registers *The Depths of Russia* challenges the common focus on high politics and Kremlin intrigue by considering the role of oil in barter exchanges and surrogate currencies industry sponsored social and cultural development initiatives and the city of Perm s campaign to become a European Capital of Culture Rogers also situates Soviet and post Soviet oil in global contexts showing that many of the forms of state and corporate power that emerged in Russia after socialism are not outliers but very much part of a global family of state corporate alliances gathered at the intersection of corporate social responsibility cultural sponsorship and the energy and extractive industries

[A Guide to Information Sources in the Geographical Sciences](#) Stephen Goddard,1983-01-01 Geography is a wide ranging discipline and the number of information sources available is truly enormous These include printed books and journal articles maps satellite photographs archives statistical information and much else One particular problem facing geographers is that when one studies a foreign country information may be available only in the foreign country and difficult to obtain This book discusses the information sources available to geographers

[CIR Staff Paper](#) ,1984

**Kazakhstan** Sally N. Cummings,2002-10-01 Kazakhstan is the largest state in Central Asia Rich in oil gas and other natural resources and sandwiched between China and Russia it occupies a key geopolitical position the importance of which was further heightened following the attacks of 9 11 and subsequent wars in the wider Middle East But Kazakhstan was born by default gaining independence only reluctantly as the Soviet Union collapsed Its political elite facing complex tasks of state building also lacked a monoethnic base on which to build its

legitimacy Based on original material and extensive interviews in the capital and three of the country's regions the book places the elite in the country's broader institutional and historical context analysing their identity behaviour and how they gained and secured power in the early independence years Kazakhstan Power and the Elite is essential reading for all those interested in the history politics and international relations of this fascinating country **1977 Consumption by Industrial Sector** Meredith M. Heinemeier,1986 *The Political Economy of Russia* Neil Robinson,2012-07-13 This timely book explores Russia's political development since the collapse of the USSR and how inextricably it has been bound up with economic change Tracing the evolution of Russia's political economy leading scholars consider how it may continue to develop going forward They assess the historical legacies of the Soviet period showing how despite policies implemented after the USSR dissolved in 1991 there are ongoing bitter battles over property and state revenues over land and over welfare The book puts these domestic issues in international and comparative perspective by considering Russia's position in the global economy and its growing role as a major energy producer Focusing especially on the nature and future of Russian capitalism the contributors weigh the political problems that confront Russia in its ongoing struggle to modernize and develop its economy Contributions by Andrew Barnes Paul T Christensen Linda J Cook Gerald M Easter Neil Robinson Richard Sakwa and Stephen K Wegren **Everyday Energy Politics in Central Asia and the Caucasus** David Gullette,Jeanne Féaux de la Croix,2017-10-02 The perception of Central Asia and its place in the world has come to be shaped by its large oil and gas reserves Literature on energy in the region has thus largely focused on related geopolitical issues and national policies However little is known about citizens needs within this broader context of commodities that connect the energy networks of China Russia and the West This multidisciplinary special issue brings together anthropologists economists geographers and political scientists to examine the role of all forms of energy here oil gas hydropower and solar power and their products especially electricity in people's daily lives throughout Central Asia and the Caucasus The papers in this issue ask how energy is understood as an everyday resource as a necessity and a source of opportunity a challenge or even as an indicator of exclusionary practices We enquire into the role and views of energy sector workers rural consumers and urban communities and their experiences of energy companies and national policies We further examine the legacy of Soviet and more recent domestic energy policies the environmental impact of energy use as well as the political impact of citizens energy grievances This book was published as a special issue of *Central Asian Survey* *Problems of Communism* ,1985 **Intelligence on the world energy outlook and its policy implications** United States. Congress. House. Permanent Select Committee on Intelligence,1980 [Green Library Journal](#) ,1992
