The Social Prelude to Stalinism Roger Pethybridge, 1974-06-18 *The Challenge of Revolution* Vladimir Mau, Irina Starodubrovskaya, 2001-02-22 This volume provides an challenging and controversial explanation of the recent events in Russia It examines the causes processes and consequences of Russia's recent political development Drawing on and criticizing the existing literature the book also shows how the recent Russian experience casts light on general theories of revolution and comparative political developments The transformation in Russia is usually compared with transformations in other post communist countries The authors argue that the Russian transformation should be explained in the logic of the great revolutions of the past such as the English Civil War the French Revolution and the Bolshevik Revolution The difficulties and inconsistency of Russian reforms are usually explained as a result of mistakes made by reformers This book argues however that these problems should be considered as a natural consequence of the weak state In revolution the weakness of state power is inevitable resulting from social fragmentation property rights transformation changes in the interests of different social groups Hence the authors argue that most of the transitional problems in Russia were unavoidable The authors go on to argue that revolutions are usually considered as rapid change made through violence However the spontaneous character of change in the situation of a weak state is a much more important feature of any revolution than violence The book contains unique interviews with four leaders of the Russian transformation Mikhail Gorbachev Alexander Yakovlev Yegor Gaidar and Gennadii Burbulis as well as the personal experience of the authors who were deeply involved in the practical process of Russian transformation

Communist Planning versus Rationality János Mátyás Kovács, 2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn

in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning

communist economic transformation **The Bread of Affliction** William Moskoﬀ, 2002-08-08 This book tells how the Soviet Union fed itself after the invasion by the Germans during World War II The author argues that central planning became much less important in feeding the population and civilians were thereby forced to become considerably more self reliant in feeding themselves A rationing system was instituted soon after the war began but quickly became irrelevant because of the chronic food shortages The breakdown in central supplies of food was accompanied by the diminished importance of the ruble which in many places was replaced by bread and clothing as the medium of exchange Although the Soviet army was given high precedence over civilians the author also shows that the population living under German occupation was much worse off than were Soviet civilians living in the rear In addition to extensive use of American and German archives from the war period the author interviewed more than thirty Soviet emigrés who survived the war *Britain and Poland 1939-1943* Anita Prazmowska, 1995-03-23 Poland was a problematic issue for the Big Powers throughout the Second World War For Britain Poland was a major stumbling block in British Soviet relations as Polish Soviet territorial disputes clashed with the needs of the British Soviet United States alliance As the Polish government in exile attempted to obtain a guarantee of British support and many thousands of Polish troops fought for the British cause the perception grew that the Churchill government had a debt to pay Ultimately however it was a debt which Britain could not discharge because of its dependence on Soviet participation in the war In this book Anita Prazmowska looks at British policies from the point of view of wartime strategy relating this to Polish government expectations and policies She describes a tragic situation where Polish soldiers were trapped between the grandiose and unrealistic plans of their government and the harsh realities of a war which they fought with no prospect of a satisfactory outcome for them or their country **The Planned Economies and International Economic Organizations** Jozef M. Brabant, 1991-04-26 This is the first comprehensive study of the role of socialist countries within the international economic order The author presents an overview of the emergence of the postwar economic order and examines the key features of three kinds of centrally planned economies He then analyzes the role of financial frameworks and the international trade system in ensuring smooth economic relations among market type economies and he details the problems of associating typical CPEs within them Finally Jozef van Brabant explores the possibility of reconstituting a multilateral economic order that can provide greater security predictability stability and reliability in international economic relations The Planned Economies and International Economic Organizations is written at a time when the Soviet Union and other centrally planned economies are seeking closer links with the mainstream world economy It will therefore be of interest to governments and institutional economists as well as to students and specialists of Soviet and East European studies international relations and comparative economics
