Soviet Education Under Perestroika:

Soviet Education Under Perestroika John Dunstan, 1992 Since 1987 88 Soviet education has been undergoing rapid change Restructuring has been inhibited by economic constraints unreformed attitudes and behaviour and increasing decentralization of authority This book provides an analysis of developments across the educational spectrum A History of Education in Modern Russia Wayne Dowler, 2021-08-12 A History of Education in Modern Russia is the first book to trace the significance of education in Russia from Peter the Great's reign all the way through to Vladimir Putin and the present day Individual chapters open with an overview of the political social diplomatic and cultural environment of the period in order to orient the reader Dowler then goes on to analyse the aims of education initiatives in each era before considering the ways in which Russians experienced education both as students and as teachers Each chapter concludes with an assessment of the outcomes and consequences of education policies in the period both the successes and failures as well as the impact of education on the cultural social economic and ultimately political environments The chronologically arranged book also traces and then summarises underlying key themes like the tension between an open system of education and an estate based system the push and pull between utility and the broader goal of human development and the effects of centralized authoritarian control that for much of the period limited local initiative and starved the regions of adequate resources

Reforms in Higher Education Keith Watson, Celia Modgil, Sohan Modgil, 1997-01-01 This text addresses the reforms in the financial and administrative structure of higher education government intervention in introducing new managerial techniques and quality audits and the implications of these changes for both academics and administrators It is one of a series of four volumes which look at the educational dilemmas facing governments professional educators and practising administrators in the current climate in education The issues are addressed from international and comparative perspectives

Ferdinand J.M. Feldbrugge, 2023-08-28 The political economic and social reforms resulting from Gorbachev's perestroika have become more radical and comprehensive throughout the years Increasingly in their implementation a central role has been accorded to law The construction of a viable democratic system the establishment of an economy in which market factors are decisive the readmittance of a pluralistic civil society all of them presuppose in the eyes of the present Soviet leadership the creation of a reliable legal foundation Legislative activity in the Soviet Union during the past few years has therefore been hectic At the same time while law was being used as an instrument of change the character of Soviet law itself was deeply affected From being the obedient servant of a totalitarian master law is becoming the core element of a new order in which its supremacy is accepted as the starting point for redesigning all the major sectors of social life In this volume a number of leading Western experts consider the practical effect of this emancipatory process on the most important branches of Soviet law and investigate its philosophical dimensions [Educational Reform in Post-Soviet Russia](#)

Ben Eklof, Larry Eugene Holmes, Vera Kaplan, 2005 A collection of essays which examine the reform of the educational system in post Soviet Russia in historical and comparative perspective [An International Perspective on Economic Education](#)

William B. Walstad, 1994-01-31 Economics is taught in some form in the secondary schools of nations throughout the world The subject is rarely taught in elementary schools and while economics courses are offered in universities the majority of students end their formal education with secondary school Thus the best opportunity for the economic education of the youth of a nation occurs in secondary schools This book examines economic education at this critical level of the educational system The teaching of economics in secondary schools varies across countries These differences occur because of history the structure of education and other national factors At the same time there are common elements in the economic education of

many countries especially in content coverage This contrast between the common features and the uniqueness of economic education in secondary schools of major industrial nations exemplifies the international perspective presented in this book The international perspective is developed in the six sections of the volume The first section discusses why nations should include economics in school curricula and presents a framework for teaching economics that should have global appeal Dissension and consensus on economic issues among North American and European economists are examined in the second section The third section surveys the U S research literature on precollege economic education and assesses the current state of economics instruction in U S schools The economics curricula and educational practices in seven other nations the U K Canada Japan Germany Austria Korea and Australia are described in the fourth and fifth sections The fifth section also presents international comparisons of economic understanding based on national testing in six of those nations The sixth and final section explores the role of economic education in centrally planned economies and its effects on the transition to a market economy using Russia Bulgaria and China as case studies
