Hirst, 2012-06-14 Internal communication is a growing field with the number of specialists increasing worldwide In spite of this and vast increases in spending on communication research shows that organizations are finding it difficult to raise the number of employees who feel well informed Now more than ever internal communication does not just concern communication managers In today s lean organizations line managers are taking on more and more of the burden of employee communication and managers of remote offices have to be their own communication managers Talking Business making communication work addresses the key issues in communication within organizations supported by case studies taken from experience of working with global businesses It provides a coherent theory of business communication and shows how a radical difference to communication practice and business performance can be made The authors employ an interactive structure throughout with signposts to link related cases and chapters **Virtual Coach, Virtual Mentor** David

Clutterbuck, Zulfi Hussain, 2010-10-01 In the case of virtual coaching and mentoring or e mentoring and ecoaching or coaching mentoring by wire choose your own preferred nomenclature there are hundreds perhaps thousands of programs and initiatives across the world Yet there is comparatively little in the way of comparison of good practice or academic evaluation of what does and doesn t work We found numerous individual case studies but a dearth of empirical research and no significant collection of cases to illustrate the diversity of applications Virtual Coach Virtual Mentor provides a wide variety of perspectives on a rapidly growing phenomenon We hope and intend that it should make a timely and significant contribution to good practice and to encouraging more practitioners and their clients and more organizations to experiment with using electronic media to enrich coaching and mentoring The view of ecoaching and e mentoring is firmly one that these

new media are less a replacement for traditional face to face than an enhancement of learning alliances in general We see no evidence of fewer face to face coaching or mentoring relationships on the contrary they continue to become more popular and widespread Rather we see that virtual coaching and mentoring both enrich predominantly face to face relationships by connecting partners at times between formal meetings and open up coaching and mentoring to new audiences and new applications
