Child Sexual Abuse: Whose Problem? Sue Richardson,Heather Bacon,2018-09-26

In Cleveland in 1987 a medical diagnosis of child sexual abuse was made in 127 children resulting in their removal from home The consequent intense scrutiny and public criticism around the case together with the subsequent Butler Sloss inquiry resulted in the medical evidence being discredited giving rise to a system which relies on children to speak out about their abuse This book argues that this 1987 crisis continues to shape child protection today resulting in opportunities to protect children being missed Now re issued with a substantial new introduction and concluding reflections this book provides the only account by key professionals directly involved in the Cleveland cases allowing readers to understand what really took place in Cleveland and why it continues to matter today It analyses the many failures to address the plight of sexually abused children and makes constructive suggestions for the way forward to provide more effective interventions for children at risk

Child Victims Jane Morgan,Lucia Zedner,1992

Child Victims explores the range and extent of crimes committed against children and assesses their impact The testimony of over two hundred children gives voice for the first time to their experiences their views and their needs It examines how children attain the status of victims in the criminal justice system Drawing on recent research findings the authors examine each stage of the legal process that a child encounters from the initial reporting of the offence through police investigation to the trial itself They contrast the specialist response to victims of child sexual abuse with the experience of children who are victims of other crimes thrust into an adult system which takes little account of their needs Child Victims concludes by examining the role of support services and agencies dealing with child victims and makes a number of key recommendations for future policy
