**The Oxford Guide to Library Research** Thomas Mann, 2015 The information world has undergone drastic changes since the publication of the 3rd edition of The Oxford Guide to Library Research in 2005 and Thomas Mann a veteran reference librarian at the Library of Congress has extensively revised his text to reflect those changes This book will answer two basic questions First what is the extent of the significant research resources you will miss if you confine your research entirely or even primarily to sources available on the open Internet Second if you are trying to get a reasonably good overview of the literature on a particular topic rather than just something quickly on it what are the several alternative methods of subject searching which are not available on the

Web that are usually much more efficient for that purpose than typing keywords into a blank search box with the results displayed by relevance ranking computer algorithms This book shows researchers how to do comprehensive research on any topic It explains the variety of search mechanisms available so that the researcher can have the reasonable confidence that s he has not overlooked something important This includes not just lists of resources but discussions of the ways to search within them how to find the best search terms how to combine the terms and how to make the databases and other sources show relevant material even when you don t know how to specify the best search terms in advance The book s overall structuring by nine methods of searching that are applicable in any subject area rather than by subjects or by types of literature is unique among guides to research Also unique is the range and variety of concrete examples of what to do and of what not to do The book is not about the Internet it is about the best alternatives to the Internet the sources that are not on the open Web to begin with that can be found only through research libraries and that are more than ever necessary for any kind of substantive scholarly research More than any other research guide available this book directly addresses and provides solutions to the serious problems outlined in recent studies documenting the profound lack of research skills possessed by today s digital natives **Kenneth Kaunda, the United States and Southern Africa** Andy

What accounts for a taboo on the use of nuclear weapons so far and will it survive What is the present state of nuclear deterrence models built during the Cold War What is the relationship between the pursuit of civilian nuclear energy and the risks of proliferation Why are we witnessing a move away from non proliferation to counter proliferation The second section gives an overview of the evolving nuclear policies of the five established nuclear powers the USA Russia the United Kingdom France and the People s Republic of China Section three looks at the three de facto nuclear states India Pakistan and Israel The fourth section examines the three problem areas in the proliferation matrix today Iran North Korea and the potent mix of non state actors and nuclear weapons The fifth section sheds light on an important issue often ignored during discussions of nuclear proliferation cases where states have made a deliberate policy choice of either renouncing their nuclear weapons programme or have decided to remain a threshold state The cases of South Africa Egypt and Japan will be the focus of this section The final section will examine the present state of the global nuclear non proliferation regime which most observers agree is currently facing a crisis of credibility The three pillars of this regime the Nuclear Non Proliferation Treaty NPT the Comprehensive Test Ban Treaty CTBT and the Fissile Material Cut Off Treaty FMCT will be examined This is followed by an analysis of the present trends and prospects for US Russia nuclear arms control The impact of missile defenses and the US India civilian nuclear energy co operation pact will be examined so as to ascertain whether they have weakened or strengthened the global non proliferation regime The chapters in this volume aim to document the increasing complexity of the global nuclear proliferation dynamic and the inability of the international community to come to terms with a rapidly changing strategic milieu The future in all likelihood will be very different from the past and the chapters in this volume will try to develop a framework that may help gain a better understanding of the forces that will shape the nuclear proliferation debate in the years to come

*The Globalisation of the Cold War* Max Guderzo, Bruna Bagnato, 2010-01-04 This book focuses on the globalisation of the Cold War in the years 1975-85 highlighting the transformation from bipolar US Soviet competition to global confrontation Offering a detailed analysis of this fundamental shift that occurred during this period as well as the interconnections of this process with the new industrial technological revolution this book demonstrates how the United States returned to a position of global economic leadership In so doing the book aims to challenge the traditional and misleading paradigm that interprets the gradual development of the Cold War in basic bipolar terms in fact most of the

factors triggering superpower attitudes and interplay were linked to a complex web of relations with their allies as well as to the political economic social ideological and military factors structurally intrinsic to the peripheral regions where the confrontation actually took place Many of the essays in this volume focus on the foreign and security policies of the United States with the aim of reassessing the Carter administration as the foundation for Reagan's final showdown with the Soviet Union The contributors however go beyond the traditional patterns of foreign policy analysis giving due attention to transnational phenomena and institutional histories that better explain the gradual transformation in the years that prepared the world for the post Cold War globalisation era This book will be of much interest to students of Cold War studies international history US foreign policy European politics and IR in general Max Guderzo is Professor of the History of International Relations and holds the Jean Monnet Chair of the History of European Unification at the University of Florence Bruna Bagnato is Associate Professor of the History of International Relations at the University of Florence

**United States Relations with South Africa** Y. G.-M. Lulat, 2008 Relations between the United States and South Africa or the parts of the world these nations now occupy go nearly as far back as the very beginning of their inception as permanent European colonial intrusions This book is a critical overview of these relations from the late seventeenth century to the present Unprecedented in its scope and supported by substantive and detailed notes together with an extensive bibliography chronology glossary and appendices the book distinguishes itself from extant works in a

number of other ways Set against the backdrop of a wider interdisciplinary exploration of both ideational and structural issues of historical context it not only gives attention to the importance of contributions from nonofficial actors in shaping official relations but also considers the impact of the geo political location of South Africa within southern Africa where the presence of other nations particularly Angola Mozambique Namibia and Zimbabwe looms large Methodologically written from the perspectives of both traditional narrative history and Khaldunian interpretive historical analysis the book consequently sits at the interdisciplinary interstice of political economy and sociology where the aim is to advance our understanding of the Braudelian interconnectedness of world history as an important diachronic determinant of the diplomacy of foreign relations Written for both scholars and policy analysts this book s examination of the agency of the marginalized should also be of interest to activists and the reading public
