South Africa The Political Economy Of Transition:

South Africa: Limits To Change Hein Marais, 2001-09-08 Drawing on the rich structural and political understandings of radical South African intellectuals this book explains why the South African government has been unable to breach the boundaries of change erected by the privileged classes It reveals why it has adopted conservative economic policies and why the country's popular movement has failed to press home more radical opinions Hein Marais compellingly probes the hidden dynamics of South Africa's transition arguing that the democratic breakthrough was much less open ended than generally believed South Africa : Limits to Change ,1998 **The Political Economy of Transition in South Africa** Jeffrey Ira Herbst, 1993* *The Political Economy of South Africa's Transition* Jonathan Michie, Vishnu Padayachee, 1997 The Political Economy of South Africa's Transition provides the basis for a critical examination of the recent history and politics of the process of economic policy formulation in South Africa **South Africa Pushed to the Limit** Hein Marais, 2013-07-04 Since 1994 the democratic government in South Africa has worked hard at improving the lives of the black majority yet close to half the population lives in poverty jobs are scarce and the country is more unequal than ever For millions the colour of people's skin still decides their destiny In his wide ranging incisive and provocative analysis Hein Marais shows that although the legacies of apartheid and colonialism weigh heavy many of the strategic choices made since the early 1990s have compounded those handicaps Marais explains why those choices were made where they went awry and why South Africa's vaunted formations of the left old and new have failed to prevent or alter them From the real reasons behind President Jacob Zuma's rise and the purging of his predecessor Thabo Mbeki to a devastating critique of the country's continuing AIDS crisis its economic path and its approach to the rights and entitlements of citizens South Africa Pushed to the Limit presents a riveting benchmark analysis of the incomplete journey beyond apartheid **The Political Economy of South Africa's Post-apartheid Transition** Benjamin Fine, 2025-05-26 South Africa's post apartheid transition has proven disastrous It is marked by the emergence of a black elite of enriched capitalists out of the globalisation neoliberalisation and financialisation of the economy in general and of its Minerals Energy and Financial Complex in particular By contrast inequalities poverty and failing social provision have persisted Recent attention has shifted to how this disastrous trajectory was initiated some suggesting a lack of available alternative policy options at the time of transition This is shown to be false with a full range of progressive alternatives being rejected with corresponding consequences from state capture to electoral defeat The Political Economy of Clean Energy Transitions Douglas Arent, Channing Arndt, Mackay Miller, Finn Tarp, Owen Zinaman, 2017 A volume on the political economy of clean energy transition in developed and developing regions with a focus on the issues that different countries face as they transition from fossil fuels to lower carbon technologies *The Political Economy of Trade Reform in Emerging Markets* Peter Draper, Phil Alves, Razeen Sally, 2009-01-01 few if any other recent volumes offer a historical perspective on evolving trade policy in several countries this well written well edited volume is suitable for

graduate and research libraries M Larudee Choice This book is a refreshing reminder of the benefits of unilateral trade liberalisation in countries whose leaders dare An important story told with clarity and authority Ross Garnaut The Australian National University Australia That trade liberalization is good for emerging market economies and not just for the rich ones is now widely accepted by both economists and policy makers But the question remains how can these reforms be implemented in practice The answer to that important question lies in understanding the political economy of each reforming country This book makes a splendid contribution to our understanding of this issue by examining the experience of several countries It is therefore an important book to be read by not just students and researchers but also policy makers worldwide Jagdish Bhagwati Columbia University US This timely book brings fresh analysis to the important issue of trade policy reform in emerging markets The subject matter and its significance are comprehensively introduced with a review of developing country liberalization since the 1980s providing an analytical framework for the seven country case studies that follow The case studies Australia Brazil Chile India Malaysia New Zealand and South Africa cover a wide variety of political historical and economic issues but all make clear the important role that crisis or the threat of it plays in meaningful trade policy reform This is of particular relevance in the current global financial crisis These studies together with the conclusions which are drawn from them show how important the trade liberalization agenda remains in the 21st century Written by a combination of both experts and practitioners this highly topical book will make productive reading for policy makers concerned with trade policy in developed and developing countries as well as scholars working in trade policy Postgraduate students studying international business international relations economics politics and international law should not be without this book

Neoliberalism and the State of Belonging in South Africa Derick A. Becker, 2020-02-17 This book explains the making of the South African state and thereby contributes to the development theory by analyzing the concept of the embedded neoliberal state The author offers a theoretical exploration of state formation as an inherently interconnected international and domestic social process as applied to the history and development of South Africa A genuine social science that eschews disciplinary boundaries this will appeal to a wide audience of scholars in the fields of political development political science African and development studies

South Africa's Energy Transition Andrew Lawrence, 2019-08-30 This book provides a succinct overview of the evolution of policies addressing energy and climate justice in South Africa Drawing on a range of analytical perspectives including socio technical studies just transitions and critical political economy it explains why South Africa's energy transition from a coal dependent centralised power generation and distribution system has been so slow and reveals the types of socio political inequalities that persist across regimes and energy sources Topics explored include critical approaches to the South African state and its state owned energy provider Eskom the political ecologies of coal and water the politics of non renewable energy alternatives as well as the trajectory and fate of the Renewable Energy Independent Power Producers Procurement Programme REIPPPP the country's major renewable energy

policy The book concludes with reflections on alternative neglected energy and development paths suggesting how the political economy of South Africa's energy system could be further transformed for the better *The Political Economy of South Africa's Transition* Jonathan Michie, Vishnu Padayachee, 1997 This edition analyzes and discusses economic policies over a range of macroeconomic and industrial areas which are required to see through the reconstruction and development of the South African economy It explores the recent history and politics of the processes of economic policy formulation

The Political Economy of Coal Michael Jakob, Jan C. Steckel, 2022-02-01 This volume provides an overview of the political economy of coal in diverse country contexts Coal is the largest source of greenhouse gas emissions globally accounting for about 40 percent of energy related CO₂ emissions Continued construction of coal fired power plants could make the climate targets of the Paris Agreement infeasible to achieve In spite of sharply declining costs for renewable energy sources many countries still heavily rely on coal to meet their energy demand The predominance of coal can only be adequately understood in light of the political factors that determine energy policy formulation To this end this edited volume assembles a wide variety of case studies exploring the political economy of coal for across the globe These includes industrial and developing nations coal importers and exporters as well as countries that are either substantial coal users are just beginning to ramp up their capacities or have already initiated a coal phase out Importantly all case studies are structured along a unifying framework that focuses on the central actors driving energy policy formulation their main objectives as well as the context that determines to what extent they can influence policy making This large set of comparable studies will permit drawing conclusions regarding key similarities as well as differences driving coal use in different countries This book will be of great interest to students and scholars of energy climate change resource management and sustainable development It will also appeal to practitioners and policymakers involved in sustainable development The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Smart Transitions in City Regionalism Tassilo Herrschel, Yonn Dierwechter, 2018-03-22 In recent years smartness has risen as a buzzword to characterize novel urban policy and development patterns As a result of this debates around what smart actually means both theoretically and empirically have emerged within the interdisciplinary arenas of urban and regional studies This book explores the changes in discourse rationality and selected responses of smartness through the theme of transition The concept of transition provides the broader context and points of reference for adopting smartness in reconciling competing interests and agendas in city regional governance Using case studies from around the world including North America Europe and South Africa the authors link external regime transition in societal values and goals with internal moves towards smartness While reflecting the growing integration of overarching themes and analytical concerns this volume further develops work on smartness smart growth transition city regionalism governance and sustainability *Smart Transitions in City Regionalism* explores how smart cities and city regions interact with conventional

state structures It will be of great interest to postgraduates and advanced undergraduates across urban studies geography sustainability studies and political science *Shadow of Liberation* Vishnu Padayachee,Robert Van Niekerk,2019-10-01

Shadow of Liberation explores the intricate twists turns contestations and compromises of ANC economic and social policymaking with a focus on the transition era of the 1990 s and the early years of democracy With the damning revelations by the Zondo Commission of Inquiry into State Capture on the massive corruption of the South African body politic the timing of this book could not be more relevant South Africans need to confront the economic and social policy choices that the liberation movement made and to see how these decisions may have facilitated the conditions for corruption to emerge and flourish Answers are needed Padayachee and van Niekerk focus their attention on the primary question of how and why the ANC given its historical anti inequality re distributive stance come in the 1990s to such a dramatic turn around and move towards an essentially market dominated approach Were they pushed or did they go willingly What role if any did Western governments and international financial institutions play And what of the role of the late apartheid state and South African business Did leaders and comrades sell out the ANC s emancipatory policy vision *Shadow of Liberation* tries to provide answers to these questions drawing on the best available primary archival evidence as well as extensive interviews with key protagonists across the political non government and business spectrum The authors argue that the ANC s emancipatory policy agenda was broadly to establish a social democratic welfare state upholding rights of social citizenship However its economic policy framework to realise this emancipatory mission was either non existent or egregiously misguided *A Just Transition to a Low Carbon Future in South Africa* Nqobile Xaba,Saliem Fakir,2022-02-01

Deliberations on the just transition in South Africa have intensified and will continue to do so for the next few years and decades Climate change widening socio economic inequality the precarious future of work and emergent approaches to financing arrangements have brought new urgency to the issues It therefore remains critical to interrogate how South Africa can ensure a just transition to a low carbon economy This book underlines the fact that the low carbon transition in South Africa has to grapple with complex historical social economic cultural and political factors The main message is that the transition to a low carbon society is possible but it can only succeed if it is just and handled collaboratively In addition the book aims to broaden the discourse on low carbon transition and explore the opportunities in and impediments to making the transition fair affordable and socio economically viable **Business and Government Relations in Africa** Robert A. Dibie,2017-07-06

This book looks at the regulatory regimes that have an impact on business and provides a number of case studies of the relationships between government and economic development around the African continent highlighting different processes and practices It will be of interest both to students at an advanced level academics and reflective practitioners It addresses the topics with regard to business government relations and will be of interest to researchers academics policymakers and students in the fields of African politics comparative politics public policy business and politics sustainable development and sustainability economic

development and managerial economics **The Oxford Handbook of Energy Politics** Kathleen J. Hancock, Juliann Emmons Allison, 2020-12-02 The global regional and local energy landscape has changed dramatically in the twenty first century Many factors have affected what we know about energy a consensus among scientists on climate change and related support for renewable energy evolving energy and resource extraction technologies growing resource demand in the developing world new regional and global energy governance actors new major fossil fuel discoveries on land and underwater in states that have previously been under resourced rising interest in corporate social responsibility in energy companies and the need for energy justice The Oxford Handbook of Energy Politics synthesizes the diverse literature on these topics to provide a foundational resource for teaching and research on critical energy issues in international relations and comparative politics Through chapters authored by both scholars and practitioners the Handbook further develops the energy politics scholarship and community and generates sophisticated new work that will benefit all who work on energy issues State Formation Christian Krohn-Hansen, Knut G. Nustad, 2005-09-20 What is the state and how can we best study it This book investigates new ways of analysing the state The contributors argue that the state is not a fixed and definite object Our perceptions of it are constantly changing and differ from person to person What is your idea of the state if you are a refugee Or if you are living in post apartheid South Africa Our perceptions are formed and sustained by evolving discourses and techniques these come from institutions such as government but are also made by communities and individuals The contributors examine how state structures are viewed from the inside by official state bodies composed of bureaucrats and politicians and how these state manifestations are supported reproduced or transformed at a local level An outline of theoretical approaches is followed by nine case studies ranging from South Africa to Peru to Norway With a good range of contributors including Cris Shore Clifton Crais Ana Alonso and Bruce Kapferer this is a comprehensive critical analysis of anthropological approaches to the study of state formation **Handbook on Sustainability Transition and Sustainable Peace** Hans Günter Brauch, Úrsula Oswald Spring, John Grin, Jürgen Scheffran, 2016-08-10 In this book 60 authors from many disciplines and from 18 countries on five continents examine in ten parts Moving towards Sustainability Transition Aiming at Sustainable Peace Meeting Challenges of the 21st Century Demographic Imbalances Temperature Rise and the Climate Conflict Nexus Initiating Research on Global Environmental Change Limits to Growth Decoupling of Growth and Resource Needs Developing Theoretical Approaches on Sustainability and Transitions Analysing National Debates on Sustainability in North America Preparing Transitions towards a Sustainable Economy and Society Production and Consumption and Urbanization Examining Sustainability Transitions in the Water Food and Health Sectors from Latin American and European Perspectives Preparing Sustainability Transitions in the Energy Sector and Relying on Transnational International Regional and National Governance for Strategies and Policies Towards Sustainability Transition This book is based on workshops held in Mexico 2012 and in the US 2013 on a winter school at Chulalongkorn University Thailand 2013 and on commissioned

chapters The workshop in Mexico and the publication were supported by two grants by the German Foundation for Peace Research DSF All texts in this book were peer reviewed by scholars from all parts of the world

Development Planning in South Africa John Reynolds, 2018-06-15 Celebrated as a beacon of democracy and reconciliation many people in South Africa continue to live in severe poverty particularly in the Eastern Cape Province Backed by the United Nations Development Programme the Eastern Cape's provincial government consequently launched an historically ambitious programme the Provincial Growth and Development Plan aimed at tackling the province's poverty unemployment and inequality over a ten year period in a radical policy overhaul Drawing on the author's first hand engagement with the planning process Development Planning in South Africa is an empirically rich study that utilises a strategic relational approach to explore the ways in which this unprecedented challenge was negotiated and eventually undermined by the South African state The first work of its kind the book provides an indispensable micro level study with profound implications for how state power is understood to be organised and expressed in state policy Relevant beyond South Africa to policy implementation in both developing and developed states globally the book is essential reading for students and scholars of government studies political economy development policy studies and social movements
