An International History of Terrorism Jussi M. Hanhimäki, Bernhard Blumenau, 2013-01-17 The aim of this book is to provide readers with the tools to understand the historical evolution of terrorism and counterterrorism over the past 150 years In order to appreciate the contemporary challenges posed by terrorism it is necessary to look at its evolution at the different phases it has gone through and the transformations it has experienced The same applies to the solutions that states have come up with to combat terrorism the nature of terrorism changes but still it is possible to learn from past experiences even though they are not directly applicable to the present This book provides a fresh look at the history of terrorism by providing in depth analysis of several important terrorist crises and the reactions to them in the West and beyond The general framework is laid out in four parts terrorism prior to the Cold War the Western experience with terrorism non Western experiences with terrorism and contemporary terrorism and anti terrorism The issues covered offer a broad range of historical and current themes many of which have been neglected in existing scholarship it also features a chapter on the waves phenomenon of terrorism against its international background This book will be of much interest to students of terrorism studies political violence international history security studies and IR

Landmark Cases in Public International Law Eirik Bjorge, Cameron Miles, 2017-12-28 The past two hundred years have seen the transformation of public international law from a rule based extrusion of diplomacy into a fully fledged legal system Landmark Cases in Public International Law examines decisions that have contributed to the development of international law into an integrated whole whilst also creating specialised sub systems that stand alone as units of analysis The significance of these decisions is not taken for granted with contributors critically interrogating the cases to determine if their reputation as landmarks is deserved Emphasis is also placed on seeing each case as a diplomatic artefact highlighting that international law while unquestionably a legal system remains reliant on the practice and consent of states as the prime movers of development The cases selected cover a broad range of subject areas including state immunity human rights the environment trade and investment international organisations international courts and tribunals the laws of war international crimes and the interface between international and municipal legal systems A wide array of international and domestic courts are also considered from the International Court of Justice to the European Court of Human Rights World Trade Organization Appellate Body US Supreme Court and other adjudicative bodies The result is a three dimensional picture of international

law what it was what it is and what it might yet become Argument and Change in World Politics Neta Crawford, 2002-07-25 Arguments have consequences in world politics that are as real as the military forces of states or the balance of power among them Neta Crawford proposes a theory of argument in world politics which focuses on the role of ethical arguments in fostering changes in long standing practices She examines five hundred years of history analyzing the role of ethical arguments in colonialism the abolition of slavery and forced labour and decolonization Pointing out that decolonization is the biggest change in world politics in the last five hundred years the author examines ethical arguments from the sixteenth century justifying Spanish conquest of the Americas and from the twentieth century over the fate of Southern Africa The book also offers a prescriptive analysis of how ethical arguments could be deployed to deal with the problem of humanitarian intervention Co winner of the APSA Jervis Schroeder Prize for the best book on international history and politics *The Legal Status of Territories Subject to Administration by International Organisations* Bernhard Knoll, 2008-06-12 The international community's practice of administering territories in post conflict environments has raised important legal questions Using Kosovo as a case study Bernhard Knoll analyses the identity of the administering UN organ the ways in which the territories under consideration have acquired partial subjectivity in international law and the nature of legal obligations in the fiduciary exercise of transitional administration developed within the League of Nations Mandate and the UN Trusteeship systems Knoll discusses Kosovo's internal political and constitutional order and notes the absence of some of the characteristics normally found in liberal democracies before proposing that the UN consolidates accountability guidelines related to the protection of human rights and the development of democratic standards should it engage in the transitional administration of territory The African Charter on Human and Peoples' Rights Volume 1 Nat Rubner, 2023 Landmark study of the African Charter on Human and Peoples Rights that positions it within the African Lives Matter struggle to assert an African identity rather than as simply a human rights document International Status in the Shadow of Empire Cait Storr, 2020-09-17 This book offers a new account of Nauru's imperial history and examines its significance in the history of international law The United Nations in the 1990s Peter R. Baehr, Leon Gordenker, 2016-07-27 At a time when the UN demonstrates new vitality this straightforward explanation of nearly a half century of the world organization's experience provides essential background It sets out the fundamental features of the structure of the UN and traces the political developments around such topics as maintaining international peace protecting human rights and improving economic welfare Its authors are longtime observers and recognized scholars Their transatlantic collaboration provides an extra edge of objectivity United States Participation in the United Nations United States. President, 1960 **The Settlement of International Disputes** Nii Lante Wallace-Bruce, 1998-02-18 The first part of this book deals with the general principles relating to international disputes settlement It starts by looking at the nature of an international dispute in contemporary international law and by discussing the principles governing the ascertainment of the existence of an

international dispute It then moves on to a consideration of the diplomatic means of an international dispute settlement The book not only focuses on the peaceful means but also considers other means in particular countermeasures A separate chapter is devoted to the International Court of Justice enabling in depth treatment of the issues The book critically analyses the cases in which Australia and New Zealand have been involved first as applicants and then as respondents thereby assessing the contributions made by these two countries to the development of the law relating to international disputes settlement

Evolving Constitutions of International Organizations Tetsuo Sato, 2023-09-14 This book analyzes the law creating process relating to the interpretation of constituent instruments of international organizations This topic is one of the key issues concerning the structures and activities of international organizations It differs from other books in the field by suggesting that under the influences of the inherent dynamism of international organizations the interpretative framework of their constituent instruments is not the same as that of ordinary treaties It also concludes that the interpretation of the constituent instruments of international organizations deviates from the interpretative framework regulated by the law of treaties as codified by the Vienna Convention on the Law of Treaties The book will be of prime interest to academics in the fields of international law and international organization and treaty law

System as well as their effect on the shaping of international relations **Judicial Settlement of International Disputes**
Edward McWhinney, 2023-11-27 The record of the International Court of Justice and its predecessor the old Permanent Court of International Justice extends back now for about three quarters of a century During that time the Court has been transformed from a Western Eurocentric tribunal in terms both of its judges and also the disputes it was called on to resolve to an institution broadly representative of the layered pluralistic world community of today This is reflected in the fiercely contested battles for election to the Court or the regular triennial elections and also in the angry denunciations of the Court as a political tribunal rendering political decisions launched by some national foreign Ministry spokesmen in reaction to Court judgments involving their own states or what they consider as their own vital interests Within the Court's ranks in recent years there has been a marked philosophical division between those judges usually from Western or Western influenced states who have sought to maintain traditional positivist strict construction neutral approaches and those who would in American legal Realist style essay a more frankly critical liberal activist role in the updating or re making of old legal doctrines inherited from earlier eras in international relations The intellectual legal conflicts within the Court are canvassed in some of the major political legal cases of recent years South West Africa and Namibia Nuclear Tests Western Sahara Nicaragua v US The contemporary role of the Court and its relation to and cooperation with other principal United Nations especially the General Assembly organs in World Community problem solving are fully explored in terms of the potential problems but also the opportunities and challenges for the Court and its judges today in an historical era of transition and rapid change in the World Community *The Chagos Islanders and International Law* Stephen Allen, 2014-10-16 In 1965 the UK excised the Chagos Islands from the colony of Mauritius to create the British Indian Ocean Territory BIOT in connection with the founding of a US military facility on the island of Diego Garcia Consequently the inhabitants of the Chagos Islands were secretly exiled to Mauritius where they became chronically impoverished This book considers the resonance of international law for the Chagos Islanders It advances the argument that BIOT constitutes a Non Self Governing Territory pursuant to the provisions of Chapter XI of the UN Charter and for the wider purposes of international law In addition the book explores the extent to which the right of self determination indigenous land rights and a range of obligations contained in applicable human rights treaties could support the Chagossian right to return to BIOT However the rights of the Chagos Islanders are premised on the assumption that the UK possesses a valid sovereignty claim over BIOT The evidence suggests that this claim is questionable and it is disputed by Mauritius Consequently the Mauritian claim threatens to compromise the entitlements of the Chagos Islanders in respect of BIOT as a matter of international law This book illustrates the ongoing problems arising from international law's endorsement of the territorial integrity of colonial units for the purpose of decolonisation at the expense of the countervailing claims of colonial self determination by non European peoples that inhabited the same colonial unit The book uses the competing claims to the Chagos Islands to

demonstrate the need for a more nuanced approach to the resolution of sovereignty disputes resulting from the legacy of European colonialism *Historical Dictionary of International Organizations in Africa and the Middle East* Terry M.

Mays, 2015-06-18 The *Historical Dictionary of International Organizations in Africa and the Middle East* focuses on international organizations in Africa and the Middle East. This makes sense for political, cultural, and geographical reasons. North African countries and many located in the Sahel region are members of not only African but also Middle Eastern international organizations due to their cultural and religious heritage as well as geographic location between Sub-Saharan Africa and the Middle East. A limited number of global organizations are also included in this book when they have major programs focusing on Africa and/or the Middle East. This volume emphasizes intergovernmental organizations but many non-governmental organizations are also included. This is done through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, thematic topics, and major international issues affecting the region. This book is an excellent access point for students, researchers, and anyone wanting to know more about this subject. **The International Court of Justice and Some Contemporary**

Problems T.O. Elias, 2024-03-11 This series aims to provide authoritative guidance on all aspects of the law of international organizations. This area of law has over the years developed into a separate field of study within the discipline of public international law. While it covers the law of individual organizations such as the United Nations, the World Trade Organization, the International Criminal Court, and the European Union, it also includes thematic institutional law topics such as membership, decision-making, legal personality, and responsibility of international organizations. In these and other areas, international organizations face similar questions and share a number of common characteristics. The series aims to include works written by practitioners as well as academics.
