*South-East Asia* Charles A. Fischer, 1955      **South-East Asia** Charles Alfred Fisher, 1966      **The Making of Southeast Asia** Amitav Acharya, 2013-02-15

Developing a framework to study what makes a region Amitav Acharya investigates the origins and evolution of Southeast Asian regionalism and international relations He views the Association of Southeast Asian Nations ASEAN from the bottom up as not only a U S inspired ally in the Cold War struggle against communism but also an organization that reflects indigenous traditions Although Acharya deploys the notion of imagined community to examine the changes especially since the Cold War in the significance of ASEAN dealings for a regional identity he insists that imagination is itself not a neutral but rather a culturally variable concept The regional imagination in Southeast Asia imagines a community of nations different from NAFTA or NATO the OAU or the European Union In this new edition of a book first published as *The Quest for Identity* in 2000 Acharya updates developments in the region through the first decade of the new century the aftermath of the financial crisis of 1997 security affairs after September 2001 the long term impact of the 2004 tsunami and the substantial changes wrought by the rise of China as a regional and global actor Acharya argues in this important book for the crucial importance of regionalism in a different part of the world

**The Japanese in Colonial Southeast Asia** Takashi Shiraishi, Saya S. Shiraishi, 2018-05-31 This collection of essays by Japanese scholars deals with the role played by the Japanese in colonial Southeast Asia particularly the economic impact of Japan on these nations before and after World War II The introductory essay provides an overview of the Japanese presence in this region

**America's Strategy in Southeast Asia** James A. Tyner, 2006-12-21 Geography encompasses everything from the local where human beings live work and travel to metageographies like nations and regions James A Tyner s inventive and multidisciplinary ideas on geography similarly range from the personal his father s experience in the military during the Vietnam War to a broad discussion of how the United States has come to exercise power through the production of geographic knowledge in this case in Southeast Asia Since the end of the Second World War Southeast Asia has served as a surrogate space to further American imperial interests which are economic political territorial and moral in scope America s Strategy in Southeast Asia contends that the construction of Southeast Asia as a geographic entity has been a crucial component in the creation of the American empire For example America s most blatant experience of colonial rule occurred the Philippines America s longest war was fought in Vietnam and most recently some American policymakers have identified Southeast Asia as the Second Front in the War on Terror Yet America s overriding strategy in Southeast Asia and the region itself remains something of a mystery for the American populace a black box in America s geographical imagination This clear and innovative book educates readers about Southeast Asia s importance in American foreign policy

**The Sociology of Southeast Asia** Victor T. King, 2008 One of the main problems faced by teachers and students who have a scholarly interest in Southeast Asia is the lack of general user friendly texts in the social sciences The absence of an introduction to the

sociology of Southeast Asia is especially unfortunate This volume attempts to meet these needs This is then the first sole authored introductory sociology text on Southeast Asia that focuses on change and development in the region provides an overview of the important sociological and political economy writings and considers the key concepts and themes in the field since 1945 Some multiauthored works do exist but these either are outdated or focus on specialized topics Aimed primarily at undergraduates up to the final year it will also be a useful reference work for post graduates and researchers who lack such a general work

System And Process In Southeast Asia Donald G McCloud, 2019-06-26 Southeast Asia although not garnering the headlines of ten to twenty years ago is important in global politics Vietnam's domination of Indochina for example has polarized the region given the Soviet Union new regional access and magnified the military threat to Thailand Insurgency movements supported by the radical Left or Right continue to plague governments The Strait of Malacca the major sea lane through Southeast Asia provides primary access for the U S Pacific fleet to the Indian Ocean and the Middle East and is Japan's oil lifeline U S commercial and military interests remain strong in the Philippines and are expanding in Indonesia the world's fifth largest country with a population approaching 170 million people whereas Thailand Malaysia and Singapore are sources for investment raw materials and potential markets Thailand once closely allied with the United States has again renewed those ties in the face of Vietnam's expansion This comprehensive up to date textbook analyzes Southeast Asia in the context of regional and global political systems both traditional and contemporary After looking at the traditional patterns of interstate relations in the region Professor McCloud shows that Southeast Asia has been and continues to be dependent on the global system However he also identifies a neotraditional current in contemporary Southeast Asian politics as elements of traditional beliefs and values reassert themselves in policy and practice redefine the patterns of interstate behavior in the region and set the limits to dependence on the global system The book is intended as a primary text for courses on the history or politics of Asia or Southeast Asia regional development and integration and the role of Southeast Asia in world politics It will also be useful in survey courses in Asian studies comparative politics and Third World development

The world Ebihara described would soon be shattered by Pol Pot's Khmer Rouge. Fifty percent of the villagers perished in the reign of terror including those who had been Ebihara's adoptive parents and grandparents during her fieldwork. Never before published as a book, Ebihara's dissertation served as the foundation for much of our subsequent understanding of Cambodian history, society and politics.

**The Political Economy of Southeast Asia** Toby Carroll, Shahar Hameiri, Lee

Jones, 2020-03-03 This is not only the best collection of essays on the political economy of Southeast Asia but also as a singular achievement of the Murdoch School, one of the rarest of books that demonstrates how knowledge production travels across generations, institutions and time periods, thereby continually enriching itself. No course on Southeast Asia can afford to miss it as its core text. Professor Amitav Acharya, American University, USA. This book, the fourth in a path-breaking series, demonstrates why a critical political economy approach is more crucial than ever for understanding Southeast Asia's transformation. Across a wide range of topics, the book explains how capitalist development and globalisation are reshaping the societies, economies and politics of a diverse group of countries, casting light on the deep sources of economic and social power in the region. This is a book that every student of Southeast Asia needs to read. Professor Edward Aspinall, Australian National University, Australia. This book does what a work on political economy should do: challenge existing paradigms in order to gain a deeper understanding of the processes of social transformation. This volume is distinctive in three ways. First, it eschews methodological nationalism and focuses on how the interaction of national, regional and global forces are shaping and reshaping systems of governance, mass politics, economies, labor-capital relations, migration and gender relations across the region. Second, it is a bold effort to show how the Murdoch School, which focuses on the dynamic synergy of internal class relations and global capitalism, provides a better explanatory framework for understanding social change in Southeast Asia than the rival developmental, state and historical-institutionalist approaches. Third, alongside established luminaries in the field, it showcases the younger generation of political economists doing pathbreaking work on different dimensions of the political economy of the region. Walden Bello, State University of New York at Binghamton, USA and Former Member of the Philippines House of Representatives. This very timely fourth edition explores Southeast Asia's political economy within the context of hyperglobalisation and China's pronounced social-structural impacts on international politics, finance and economics over the past decade and a half. The volume successfully adopts a cross-cutting thematic approach while also conveying the diversity and divergences among the Southeast Asian states and economies. This will be an important resource for scholars of International Relations and Comparative Politics who need to take an interest in a dynamic and increasingly significant part of Asia. Professor Evelyn Goh, Australian National University, Australia. This ambitious collection takes a consistent theoretical approach and applies it to a thematic comparative analysis across Southeast Asia. The yield is impressive: the social, political and economic forces constituting the current conjuncture are not simply invoked; they are thoroughly identified and explained. By posing the deceptively simple questions of what is happening and why, the authors

demonstrate the reciprocal relation between theory building and empirical inquiry providing a model of engaged scholarship with global resonance Bravo Professor Tania Li University of Toronto Canada Counteracting the spaceless and flattened geography of much literature on uneven development this book delivers a forensic examination of the unevenness of geographical development in Southeast Asia and the relations of force shaping capital state nature and civil society This is the most compelling theoretical and empirical political economy book available on Southeast Asia Professor Adam David Morton University of Sydney Australia A vital book for all scholars students and practitioners concerned with political economy and development this volume combines cutting edge theory with rich and wide ranging empirical analysis It is terrific to see the continued success of this book with this fully revised fourth edition Professor Nicola Philips Kings College London UK The Political Economy of Southeast Asia has become a leading reference for students of the region With its breadth of geographic scope timely themes clarity of prose and rigour of analysis Carroll Hameiri and Jones have ensured that with this fourth edition the volume will continue its landmark status The book which brings together prominent experts in the field will not only be of immense interest to scholars studying Southeast Asia but also those seeking to understand the multifaceted nature of the political economy of uneven development in contemporary capitalism Professor Susanne Soederberg Queen s University Canada The Asia Research Centre at Murdoch University has long produced leading analyses of the social economic and political developments in Southeast Asia This volume carries on that wonderful tradition It brings together top class scholars to challenge our assumptions about one of the most dynamic parts of the world This collection is a crucial read for anyone interested in understanding trends in Southeast Asia s development today and into the future Professor Richard Stubbs McMaster University Canada This fourth volume in a distinguished series provides a welcome and timely update of the Murdoch School s distinctive approach to understanding the evolving political economy of Southeast Asia Its theoretical depth and wide empirical scope will be of great value to scholars students and practitioners seeking a systematic understanding of the political economy dynamics in the Asian region and more broadly of states and regions embedded in a complex unstable global political economy Professor Andrew Walter University of Melbourne This all new fourth edition of The Political Economy of Southeast Asia constitutes a state of the art comprehensive analysis of the political economic social and ecological development of one of the world s most dynamic regions With contributions from world leading experts the volume is unified by a single theoretical approach the Murdoch School of political economy which foregrounds struggles over power and resources and the evolving global context of hyperglobalisation Themes considered include gender populism the transformation of the state regional governance aid and the environment The volume will be of interest to scholars and students across multiple disciplines including political economy development studies international relations and area studies The findings of contributors will also be of value to civil society policymakers and anyone interested in Southeast Asia and its development

**The Thai Economy** Chris Dixon, 1998-12-03 This volume looks at the

origins and consequences of the accelerated growth of the Thai economy since the mid 1980s and explores the factors that set Thailand apart from other Asian African and Latin American countries      Southeast Asia Donald G Mccloud,2018-02-07

Bridging the perceived gap between Southeast Asia s historical and contemporary situations Donald McCloud focuses on continuities in the region s internal dynamics as well as its relationship to the greater global environment The author challenges widely held views that diversity and fragmentation are the hallmarks of the region identifying instead the commonalities that have bound the countries of Southeast Asia together through at least two millennia and have provided the basis for a unique regional dynamic It has only been since World War II that Southeast Asians long influenced by the global environment have defined and developed their own institutions social structures and communities Turning away from inadequate and unadaptable Western institutions they have begun to create structures more in tune with their own historical experiences Particularly in the political sphere many of these new structures seemed to be straightforward military dictatorships However time has shown them to be more complex and many unique organizational practices have developed that may presage more open political systems if not democracies by strict Western definitions With the expansion of regional cooperation through ASEAN and strong economic growth confidence among Southeast Asian states has grown as well The growing references to an Asian way of life have given verbal expression to a surge in neotraditional values and behavior that have always been part of the fabric of Asian life but that in the past were frowned upon as nonwestern This text traces the evolution of Southeast Asia and focuses for the first time on the neotraditional bases for contemporary independent development of the region      The Cambridge History of Southeast Asia Nicholas Tarling,1999 Volume 2 discusses Southeast Asia s interaction with foreign countries during the period c 1500 to c 1800
