Jomo, 2013-04-03 This important collection is a timely contribution to the debate on the Asian financial crisis With chapters written by well established international experts in Asian economics this book constitutes a finely judged example of the varying opinions on the matter      **Southeast Asian Paper Tigers?** Jomo Kwame Sundaram, 2003 This collection is a contribution to the debate on the Asian financial crisis With chapters written by international experts in Asian economics this work constitutes an example of the varying opinions on the matter

**Developmental States** Linda Low, 2004 As the Asian crisis triggered or precipitated the meltdown a second objective is to explore the reasons and factors for the breakdown or redundancy of developmental states distinguishing between domestic transformative capacity and external global factors as identified A third objective is to cull experiences and lessons beyond East Asia With many transition economies in Central and Eastern Europe beside China and Indochinese states the theory and practice of developmental states may be a useful bridge These are by no means exhaustive and comprehensive aims questions and issues For individual developmental states covered in this volume country specific lessons may also be drawn for them to be reconfigured to stay relevant The most important consideration for this volume is to value add to the literature both the theory and principles of the Asian developmental state as well as empirical observations observed elsewhere This volume comprises 13 chapters in two parts      **Two Crises, Different Outcomes** T. J. Pempel, Keiichi Tsunekawa, 2015-05-06 Two Crises Different Outcomes examines East Asian policy reactions to the two major crises of the last fifteen years the global financial crisis of 2008 9 and the Asian financial crisis of 1997 98 The calamity of the late 1990s saw a massive meltdown concentrated in East Asia In stark contrast East Asia avoided the worst effects of the Lehman Brothers collapse incurring relatively little damage when compared to the financial devastation unleashed on North America and Europe Much had changed across the intervening decade not least that China rather than Japan had become the locomotive of regional growth and that the East Asian economies had taken numerous steps to buffer their financial structures and regulatory regimes This time Asia avoided disaster it bounced back quickly after the initial hit and has been growing in a resilient fashion ever since The authors of this book explain how the earlier financial crisis affected Asian economies why government reactions differed so widely during that crisis and how Asian economies weathered the Great Recession Drawing on a mixture of single country expertise and comparative analysis they conclude by assessing the long term prospects that Asian countries will continue their recent success      Understanding Management in China Malcolm Warner, 2013-11-12 China has become one of the fastest growing economies ever seen in the world in recent times In the last three decades China has transformed itself from a command economy to a market one albeit a nominally socialist one and its management systems have been reformed accordingly In the light of these changes Malcolm Warner one of the leading authorities on management in China explores the past present and future of Chinese management The first part of the work

examines the history of management practices in the Middle Kingdom outlining the influence of traditional Chinese values especially the Confucian inheritance and the legacy of the imperial bureaucracy with its meritocratic examination system as well as the role of industrialization and the influx of foreign owned businesses in the late nineteenth century and the twentieth century It next goes on to consider the current state of China s management showing how a new breed of manager has evolved since the beginning of Deng Xiaoping s reforms in the late 1970s and 1980s The resulting impact of this strategy which has continued into the 1990s and the 2000s up to the present day is then examined The final part of the book concludes with reflections on how management in China is likely to develop in the near future especially on how far it will converge with global practices or to what degree an indigenous form of management with Chinese characteristics will prevail

### **Intellectual Property and Free Trade Agreements in the Asia-Pacific Region** Christoph Antons, Reto M.

Hilty, 2014-12-05 This book is highly topical The shift from the multilateral WTO negotiations to bilateral and regional Free Trade Agreements has been going on for some time but it is bound to accelerate after the WTO Doha round of negotiations is now widely regarded as a failure However there is a particular regional angle to this topic as well After concluding that further progress in the Doha round was unlikely Pacific Rim nations recently have progressed with the negotiations of a greatly expanded Trans Pacific Partnership Agreement that includes industrialised economies and developed countries such as the United States Japan Australia and New Zealand recently emerged economies such as Singapore but also several developing countries in Asia and Latin America such as Malaysia and Vietnam US and EU led efforts to conclude FTAs with Asia Pacific nations are also bound to accelerate again after a temporary slowdown in the negotiations following the change of government in the United States and the expiry of the US President s fast track negotiation authority The book will provide an assessment of these dynamics in the world s fastest growing region It will look at the IP chapters from a legal perspective but also put the developments into a socio economic and political context Many agreements in fact are concluded because of this context rather than for purely economic reasons or to achieve progress in fields like IP law The structure of the book follows an outline that groups countries into interest alliances according to their respective IP priorities This ranges from the driving forces of the EU US and Japan via Asia Pacific resource rich but IP poor economies such as Australia and New Zealand recently emerged economies with strong IP systems such as Singapore and Korea to leading developing countries such as China and India and second tier industrializing economies such as Thailand Malaysia and Indonesia

Intellectual Property and the New Global Japanese Economy Ruth Taplin, 2009-04-02 This book examines how intellectual property IP is used in Japan and how in recent years it has developed a new approach to IP borrowed from the US and Europe stressing the importance of innovation to revitalise the Japanese economy from the stagnation and deflation that characterised the 1990s
